Mastering Shiny Hadley Wickham,2021-04-29 Master the Shiny web framework—and take your R skills to a whole new level. By letting you move beyond static reports, Shiny helps you create fully interactive web apps for data analyses. Users will be able to jump between datasets, explore different subsets or facets of the data, run models with parameter values of their choosing, customize visualizations, and much more. Hadley Wickham from RStudio shows data scientists, data analysts, statisticians, and scientific researchers with no knowledge of HTML, CSS, or JavaScript how to create rich web apps from R. This in-depth guide provides a learning path that you can follow with confidence, as you go from a Shiny beginner to an expert developer who can write large, complex apps that are maintainable and performant. Get started: Discover how the major pieces of a Shiny app fit together Put Shiny in action: Explore Shiny functionality with a focus on code samples, example apps, and useful techniques Master reactivity: Go deep into the theory and practice of reactive programming and examine reactive graph components Apply best practices: Examine useful techniques for making your Shiny apps work well in production

**Engineering Production-Grade Shiny Apps** Colin Fay,Sébastien Rochette,Vincent Guyader,Cervan Girard,2021-09-27 From the Reviews [This book] contains an excellent blend of both Shiny-specific topics ... and practical advice from software development that fits in nicely with Shiny apps. You will find many nuggets of wisdom sprinkled throughout these chapters.... Eric Nantz, Host of the R-Podcast and the Shiny Developer Series (from the Foreword) [This] book is a gradual and pleasant invitation to the production-ready shiny apps world. It ...exposes a comprehensive and robust workflow powered by the {golem} package. [It] fills the not yet covered gap between shiny app development and deployment in such a thrilling way that it may be read in one sitting.... In the industry world, where processes robustness is a key toward productivity, this book will indubitably have a tremendous impact. David Granjon, Sr. Expert Data Science, Novartis Presented in full color, Engineering Production-Grade Shiny Apps helps people build production-grade shiny applications, by providing advice, tools, and a methodology to work on web applications with R. This book starts with an overview of the challenges which arise from any big web application project: organizing work, thinking about the user interface, the challenges of teamwork and the production environment. Then, it moves to a step-by-step methodology that goes from the idea to the end application. Each part of this process will cover in detail a series of tools and methods to use while building production-ready shiny applications. Finally, the book will end with a series of approaches and advice about optimizations for production. Features Focused on practical matters: This book does not cover Shiny concepts, but practical tools and methodologies to use for production. Based on experience: This book is a formalization of several years of experience building Shiny applications. Original content: This book presents new methodologies and tooling, not just a review of what already exists. Engineering Production-Grade Shiny Apps covers medium to advanced content about Shiny, so it will help people that are already familiar with building apps with Shiny, and who want to go one step further.

Rendezvous With Destiny: A History Of The 101st Airborne Division Leonard Rapport,Arthur Northwood Jr.,2015-11-06 Includes over 100 maps and dozens of illustrations New York Times review: “For sheer adventure few writers of fiction surpass this real-life, name-and-date story of men bound together in a combat outfit.” “The 101st Airborne Division, which was activated on August 16, 1942, at Camp Claiborne, Louisiana, has no history, but it has a rendezvous with destiny...” Maj.-Gen. William Lee commanding officer 1942. Rendezvous with Destiny: A History of the 101st Airborne Division, is unique among military histories. Never before has such a detailed study been made of the organization, training and operations of a single division of the United States Army. Each action in which the Division took part has been minutely studied and checked against available operations reports and the memories of the men who were there. From the beaches of Normandy to Hitler’s Berchtesgaden hideaway the 101st Airborne fought their way across Nazi-Occupied Europe to Victory.

101 Damnations Ned Boulting,2014-11-06 Join Ned Boulting as he reports on his dozen-th Tour de France, an event in which blokes do amazing things on bikes, and, we’re oft told, the biggest annual sporting event in the world. 101 Damnations is a chance to relive the 2014 race, stage for stage, fall after fall, tantrum by tantrum; just the good bits mind, without all the aerial shots of castles. Or sunflowers. (Though it does wax lyrical about some stunning Alpine scenery . . . and, with the race starting in Yorkshire, even some stunning scenery not far from Bradford). From Leeds to Paris (how often do you say that?), Ned details the minutiae of his encounters with the likes of Vincenzo Nibali, David Millar, Chris Froome, Chris Boardman (or ‘Broadman’ as some would have it), Marcel Kittel, Mrs Cavendish (Mark’s wife), Peter Sagan and the rest. Their endeavours, achievements, humour and occasional rancour, sit alongside his own decade-long quest for the ideal end-of-race T-shirt. Ned weaves together the interesting, amusing and unheralded threads of the race itself, and reflects on his own perennial struggle to get round, get on and get by. 101 Damnations encapsulates all that is incredible – and incredibly ordinary – about the greatest race on earth.
