**INTERNATIONAL CONFERENCE on FRONTIERS of ENVIRONMENT, ENERGY and BIOSCIENCE** Dawei Zheng, 2013-12-18 We cordially invite you to attend 2013 International Conference on Frontiers of Environment, Energy and Bioscience (ICFEEB 2013), which will be held in Beijing, China during October 24-25, 2013. The main objective of ICFEEB 2013 is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Environment, Energy and Bioscience. This conference provides opportunities for the delegates to exchange new ideas and experiences face to face, to establish business or research relations and to find global partners for future collaboration. ICFEEB 2013 received over 400 submissions which were all reviewed by at least two reviewers. As a result of our highly selective review process four hundred papers have been retained for inclusion in the ICFEEB 2013 proceedings, less than 40% of the submitted papers. The program of ICFEEB 2013 consists of invited sessions, and technical workshops and discussions covering a wide range of topics. This rich program provides all attendees with the opportunities to meet and interact with one another. We hope your experience is a fruitful and long lasting one. With your support and participation, the conference will continue its success for a long time. The conference is supported by many universities and research institutes. Many professors play an important role in the successful holding of the conference, so we would like to take this opportunity to express our sincere gratitude and highest respects to them. They have worked very hard in reviewing papers and making valuable suggestions for the authors to improve their work. We also would like to express our gratitude to the external reviewers, for providing extra help in the review process, and to the authors for contributing their research result to the conference. Special thanks go to our publisher DEStech Publications. At the same time, we also express our sincere thanks for the understanding and support of every author. Owing to time constraints, imperfection is inevitable, and any constructive criticism is welcome. We hope you will have a technically rewarding experience, and use this occasion to meet old friends and make many new ones. Do not miss the opportunity to explore in Beijing, China. And do not forget to take a sample of the many and diverse attractions in the rest of the China. We wish all attendees an enjoyable scientific gathering in Beijing, China. We look forward to seeing all of you next year at the conference. The Conference Organizing Committees October 24-25, 2013 Beijing, China

**Prospects for the American Age** Jamal Sanad Al-Suwaidi, 2014-10-28 The introduction, "Power Structure in the New World Order (Argument of the Book)," highlights the main theme around which the study revolves, namely the "new world order." It presents the hypothesis of the study regarding this new order, along with several questions including: what are the factors that indicate the coming of a new world order?; what are the most influential forces in that order?; how is that order structured?; and what are the most important and influential factors in the world order? The introduction also presents the main premise of the book — that the United States of America may be considered the dominant pole in the new world order, and that the world will continue to exist in an American age that is expected to extend for at least a further five decades. The qualitative supremacy of the United States of America has proven inescapable according to the data, statistics and information presented in this book, as well as the scales and variables of comparison adopted by the author in terms of economics, military advancement, energy resources, transportation, education, culture, and technological progress. According to these standards, the structure of the new world order may be described as a hierarchy, with the United States of America alone at the top, followed by a second tier comprising Russia, China and the European Union, a third tier consisting of Japan, India and Brazil, followed by the rest of world. The introduction to this book may be considered a basic foundation for the analysis presented in the following seven chapters, which examine the emergence, current status, and future of the new world order in its various dimensions. Under the heading, "The New World Order: Features and Concepts," the first chapter of Al-Suwaidi's new book presents a theoretical paradigm for the concept of the new world order in its various dimensions. It presents two main themes: the first deals with concepts relating to the

world order, drawing on literature that examines the evolution of the world order from the Peace of Westphalia in 1648 to the present day. It also presents various different views and arguments concerning the nature of the world order, and the distribution of power within it. The first theme also explores the political, military, economic, cultural, educational, technological and energy-related dimensions of the world order, and their importance in determining the relative powers of actors in the new world order. Moreover it explains how the United States of America has succeeded in utilizing all these tools to achieve its ends, and how it leads this world order according to a universal strategic vision aimed at maintaining US supremacy vis-à-vis other major powers. The first theme also presents an objective assessment of the different frameworks which are employed in analyzing the concept of the new world order. The second theme of this chapter discusses the main features of the new world order, which play a significant role in the interactions that occur within it, and which define it with regard to previous historical eras of the global system. Chapter II, "Factors Influencing the Structure of the New World Order," examines the factors and patterns of influence and interaction within the world order. These factors include: relations among civilizations, relative power in international relations, economic factors, military superiority, technological development, levels of knowledge, challenges and variables, and the behavior of major powers. Chapter III, "The World Order: Decisive Historic Junctures," aims to draw a comprehensive analytical map to help in understanding the historical transformations of the world order and, ultimately, the nature of contemporary global realities. The historical review presented in this chapter features an element that may make it unique; it tackles the historical evolution of the world order from the emergence of the Ottoman state in the East through the ages of the Spanish, Portuguese and other empires of the West. It is an effort to present a balanced, scholarly chronicle of the world order, without neglecting the influence of the East on international relations throughout history. Chapter IV, "The Economy, Trade and Energy in the New World Order," focuses on the role of economic factors in deciding the structure of the new world order and the hierarchy of powers within it. It reveals that despite the spectacular rise of the Chinese economy during the past two decades, it is still about half that of the United States, and China still falls within the ranks of developing countries in terms of its average GDP per capita. While the US economy is characterized by flexibility and high reliance on innovation and internal forces for growth, China depends on foreign investment and employing low-cost labor in export-oriented industries. This could make China more vulnerable to adverse economic shocks in the future. The author also expects that developments in the energy sector will greatly affect the ranking of powers in the new world order. The United States of America will increasingly become self-dependent in terms of energy, utilizing its various innovations in the field of shale gas and oil extraction, and its gradual shift toward unconventional energy sources from the western hemisphere (the Americas), giving it a strong comparative advantage in the future. Chapter V, "Public Opinion Regarding the New World Order: A Sample Survey of UAE Citizens," resents the findings of a public opinion survey in the UAE concerning the new world order. The survey focuses on nationality, age, gender and educational level as explanatory variables of differences in public opinion toward the new world order. In Chapter VI, "Prospective Structural Changes and their Consequences for the New World Order," the author discusses the potential structural, strategic changes in the new world order in the coming five decades; stressing that unipolarity will have a variety of impacts on the world. The author anticipates that US influence in international financial institutions will increase, and that over the next decade Washington will reduce its dependence on oil from regions plagued by risk and instability.

*The Palgrave Handbook of Critical Race and Gender* Shirley Anne Tate,Encarnación Gutiérrez Rodríguez,2022-03-07 This handbook unravels the complexities of the global and local entanglements of race, gender and intersectionality within racial capitalism in times of #MeToo, #BlackLivesMatter, the Chilean uprising, Anti-Muslim racism, backlash against trans and queer politics, and global struggles against modern colonial femicide and extractivism. Contributors chart intersectional and decolonial perspectives on race and gender research across North America, Europe, Latin America, the Caribbean, and South Africa, centering theoretical understandings of how these categories are imbricated and how they operate and mean individually and together. This book offers new ways to think about what is absent/present and why, how erasure works in historical and contemporary theoretical accounts of the complexity of lived experiences of race and gender, and how, as new issues arise, intersectionalities (re)emerge in the politics of race and gender. This handbook will be of interest to students and scholars across the social sciences and humanities.

*An Introduction to Quantitative Finance* Christopher Hian Ann Ting, 2015-09-16 This concise textbook provides a unique framework to introduce Quantitative Finance to advanced undergraduate and beginning postgraduate students. Inspired by Newton's three laws of motion, three principles of Quantitative Finance are proposed to help practitioners also to understand the pricing of plain vanilla derivatives and fixed income securities. The book provides a refreshing perspective on Box's thesis that all models are wrong, but some are useful. Being practice- and market-oriented, the author focuses on financial derivatives that matter most to practitioners. The three principles of Quantitative Finance serve as buoys for navigating the treacherous waters of hypotheses, models, and gaps between theory and practice. The author shows that a risk-based parsimonious model for modeling the shape of the yield curve, the arbitrage-free properties of options, the Black-Scholes and binomial pricing models, even the capital asset pricing model and the Modigliani-Miller propositions can be obtained systematically by applying the normative principles of Quantitative Finance.

**Agricultural Cooperative Management and Policy** Constantin Zopounidis, Nikos Kalogeras, Konstadinos Mattas, Gert van Dijk, George Baourakis, 2014-06-05 This book focuses on the use of farm level, micro- and macro-data of cooperative systems and networks in developing new robust, reliable and coherent modeling tools for agricultural and environmental policy analysis. The efficacy of public intervention on agriculture is

largely determined by the existence of reliable information on the effects of policy options and market developments on farmers' production decisions and in particular, on key issues such as levels of agricultural and non-agricultural output, land use and incomes, use of natural resources, sustainable-centric management, structural change and the viability of family farms. Over the last years, several methods and analytical tools have been developed for policy analysis using various sets of data. Such methods have been based on integrated approaches in an effort to investigate the above key issues and have thus attempted to offer a powerful environment for decision making, particularly in an era of radical change for both agriculture and the wider economy.

**Making the Revolution Global** Theo Williams, 2022-10-18 How black radicals reshaped the British left Making the Revolution Global shows how black radicals transformed socialist politics in Britain in the years before decolonisation. African and Caribbean activist-intellectuals, such as Amy Ashwood Garvey, C.L.R. James, Jomo Kenyatta, Kwame Nkrumah and George Padmore, came to Britain during the 1930s and 1940s and intervened in debates about capitalism, imperialism, fascism and war. They consistently argued that any path towards international socialism must have colonial liberation at its heart. Although their ideas were met with opposition from many on the British Left, they convinced significant sections of the movement of the revolutionary potential of colonised peoples. By centring the entanglements between black radicals and the wider British socialist movement, Theo Williams casts new light on responses to the 1935 Italian invasion of Ethiopia, the 1945 Fifth Pan-African Congress, and a wealth of other events and phenomena. In doing so, he showcases a revolutionary tradition that, as illustrated by the global Black Lives Matter demonstrations of 2020, is still relevant today.

The book looks at a range of topics including: the low priority and resources allocated to fraud; EU regulatory efforts to fight financial crime; protecting whistleblowers in the financial industry; the criminality of the rogue trader; the evolution of financial crime in cryptocurrencies; and the levying of financial penalties against banks and corporations by the US Department of Justice and Securities and Exchange Commission.
