Mastering ArchiMate Edition 3.1 Gerben Wierda,2021-04 Mastering ArchiMate Edition 3.1 is the fourth edition of a much praised book about the ArchiMate(R) Enterprise Architecture Modeling Language, which is a standard and a Registered Trade Mark of The Open Group. The book gives an introduction to the language, then goes on to show you key aspects of successful modeling, and many different patterns for its use. From Business to Infrastructure, from Risk & Security to Application Exploitation and Maintenance. While the aim of the book is to teach the language, it often also offers necessary background, so that the patterns can make sense to the reader not familiar with a subject. Thus, it also contains introductions to subjects such as virtualization, bitcoin/blockchain, infrastructure as code, processes versus functions, SOA/API, ESB, Terminal Services, etc. It also contains a short introduction to BPMN(TM) in order to describe a linking of both major languages. Forewords by Marc Lankhorst and Jean-Baptiste Sarrodie. Gerben Wierda (1961) is author of Chess and the Art of Enterprise Architecture, and is Lead Architect at APG, one of the largest Fiduciary Managers in the world. Before, he was Lead Architect of the Judiciary of The Netherlands, and Lead Architect of APG Asset Management. He has overseen the construction of one of the largest single ArchiMate models in the world to date. He holds an M.Sc. in Physics from the University of Groningen and an MBA from RSM Erasmus, Rotterdam.

The Big Humanities Richard J. Lane,2016-11-25 This book provides an accessible introduction to, and overview of, the digital humanities, one of the fastest growing areas of literary studies. Lane takes a unique approach by focusing on the technologies and the new environment in which the digital humanities largely takes place: the digital laboratory. The book provides a brief history of DH, explores and explains the methodologies of past and current DH projects, and offers resources such

as detailed case studies and bibliographies. Further, the focus on the digital laboratory space reveals affiliations with the types of research that have traditionally taken place in the sciences, as well as convergences with other fast-growing research spaces, namely innovation labs, fabrication labs, maker spaces, digital media labs, and change labs. The volume highlights the profound transformation of literary studies that is underway, one in which the adoption of powerful technology – and concomitantly being situated within a laboratory environment – is leading to an important re-engagement in the arts and humanities, and a renewed understanding of literary studies in the digital age, as well as a return to large-scale financial investment in humanistic research. It will be useful to students and teachers, as well as administrators and managers in charge of research infrastructure and funding decisions who need an accessible overview of this technological transformation in the humanities. Combining useful detail and an overview of the field, the book will offers accessible entry into this rapidly growing field.

Books: Publishers, Librarians, and Users provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

The Scotch Gambit Alex Fishbein,2017-07-26 Seize the Initiative Right from the Start! Are you bored with slow maneuvering in systems such as the the Italian game with d2-d3 and the anti-Berlin? Do you enjoy confrontation in the center and sharp, tactical play? Alex Fishbein shows how the Scotch Gambit can give you exciting yet sound positions where you aim at the enemy king. In the Scotch Gambit, White immediately strikes in the center and attacks the f7-pawn, provoking concessions from Black. An imbalance typically results, where White has attacking chances on the kingside. The Scotch Gambit will help you develop a finer feeling for the initiative and improve your combinational vision. You will also better understand strategic concepts, such as weak squares of one color and pawn structure nuances. Fishbein, an experienced player and author, takes you into a modern grandmaster's research lab. Here, all ideas are scrutinized and prepared for use against an opponent

who is similarly armed with the latest theory and technology. The most critical responses for Black receive special emphasis. Alex Fishbein is an American grandmaster. His peak world ranking was #150. He was competitive in each of his four U.S. Championship appearances, including in 2004 when he won the Bent Larsen prize for the most uncompromising chess. A lifelong 1.e4 player, Fishbein is known for interesting and creative play.

Textual Strategies Josue V. Harari,2019-06-30 A stellar cast of fifteen contributors seeks to show the direction in which continental and continentally oriented American literary criticism has evolved in recent years. Nine of the essays are published here for the first time; five of the remaining six were translated, by the editor, from the French; only one has previously appeared in English. The essays make available some of the most important and most representative work that has been done in the wake of structuralism. Among the topics treated are the relationships between semiology and literature, anthropology and literature, and psychoanalysis and literature; modern American poetics; algebraic models as epistemological operators; the modes of production of a poem; Flaubert's view of history; and poetic language. Professor Harari has arranged the essays to move from the general to the particular and from the abstract to the concrete. In an informative and ambitious introduction, he discusses each essay in relation to the whole and explains the interrelationships among the various theories and strategies that are represented in the anthology. A book meant for the specialist as well as the novice, for the teacher of literature and criticism as well as the student, Textual Strategies is a brilliant introduction to post-structuralist critical theories and practices.

The Ethics of Identity Kwame Anthony Appiah,2023-10-03 A bold vision of liberal humanism for navigating today's complex world of growing identity politics and rising nationalism Collective identities such as race, nationality, religion, gender, and sexuality clamor for recognition and respect, sometimes at the expense of other things we value. To what extent do they constrain our freedom, and to what extent do they enable our individuality? Is diversity of value in itself? Has the rhetoric of human rights been overstretched? Kwame Anthony Appiah draws on thinkers through the ages and across the globe to explore such questions, developing an account of ethics that connects moral obligations with collective allegiances and that takes aim at clichés and received ideas about identity. This classic book takes seriously both the claims of individuality—the task of making a life—and the claims of identity, these large and often abstract social categories through which we define ourselves.

Smellosophy A. S. Barwich,2020-07-14 An NRC Handelsblad Book of the Year "Offers rich discussions of olfactory perception, the conscious and subconscious impacts of smell on behavior and emotion." —Science Decades of cognition research have shown that external stimuli "spark" neural patterns in particular regions of the brain. We think of the brain as a space we can map: here it responds to faces, there it perceives a sensation. But the sense of smell—only recently attracting broader attention in neuroscience—doesn't work this way. So what does the nose tell the brain, and

how does the brain understand it? A. S. Barwich turned to experts in neuroscience, psychology, chemistry, and perfumery in an effort to understand the mechanics and meaning of odors. She discovered that scents are often fickle, and do not line up with well-defined neural regions. Upending existing theories of perception, Smellosophy offers a new model for understanding how the brain senses and processes odors. "A beguiling analysis of olfactory experience that is fast becoming a core reference work in the field." —Irish Times "Lively, authoritative...Aims to rehabilitate smell's neglected and marginalized status." —Wall Street Journal "This is a special book...It teaches readers a lot about olfaction. It teaches us even more about what philosophy can be." —Times Literary Supplement

All the Light We Cannot See Anthony Doerr,2014-05-06 *NOW A NETFLIX LIMITED SERIES—from producer and director Shawn Levy (Stranger Things) starring Mark Ruffalo, Hugh Laurie, and newcomer Aria Mia Loberti* Winner of the Pulitzer Prize and National Book Award finalist, the beloved instant New York Times bestseller and New York Times Book Review Top 10 Book about a blind French girl and a German boy whose paths collide in occupied France as both try to survive the devastation of World War II. Marie-Laure lives with her father in Paris near the Museum of Natural History where he works as the master of its thousands of locks. When she is six, Marie-Laure goes blind and her father builds a perfect miniature of their neighborhood so she can memorize it by touch and navigate her way home. When she is twelve, the Nazis occupy Paris, and father and daughter flee to the walled citadel of Saint-Malo, where Marie-Laure's reclusive great uncle lives in a tall house by the sea. With them they carry what might be the museum's most valuable and dangerous jewel. In a mining town in Germany, the orphan Werner grows up with his younger sister, enchanted by a crude radio they find. Werner becomes an expert at building and fixing these crucial new instruments, a talent that wins him a place at a brutal academy for Hitler Youth, then a special assignment to track the Resistance. More and more aware of the human cost of his intelligence, Werner travels through the heart of the war and, finally, into Saint-Malo, where his story and Marie-Laure's converge. Doerr's "stunning sense of physical detail and gorgeous metaphors" (San Francisco Chronicle) are dazzling. Deftly interweaving the lives of Marie-Laure and Werner, he illuminates the ways, against all odds, people try to be good to one another. Ten years in the writing, All the Light We Cannot See is a magnificent,

deeply moving novel from a writer "whose sentences never fail to thrill" (Los Angeles Times).
