Ian Goldberg, Tyler Moore

Automated Validation & Verification of UML/OCL Models Using Satisfiability Solvers

Nils Przigoda, Robert Wille, Judith Przigoda, Rolf Drechsler, 2018-01-22 This book provides a comprehensive discussion of UML/OCL methods and design flow, for automatic validation and verification of hardware and software systems. While the presented flow focuses on using satisfiability solvers, the authors also describe how these methods can be used for any other automatic reasoning engine. Additionally, the design flow described is applied to a broad variety of validation and verification tasks. The authors also cover briefly how non-functional properties such as timing constraints can be handled with the described flow.

Python Essentials 2: Aligned with PCAP Certified Associate in Python Programming The OpenEDG Python Institute, 2023-08-22 Immerse yourself in some of the more advanced Python concepts, master Object-Oriented Programming, and gear up for the prestigious PCAP™ - Certified Associate Python Programmer certification. By the end of this book, you'll be equipped with the expertise to carry out more sophisticated Software Development, Security, Networking, IoT, and engineering roles. Additionally, this book will prepare you to tackle the PCAP qualification exam and take your programming skills to the next level. Being PCAP qualified means that both employers and your fellow programmers will be able to recognize your programming aptitude and rely on you to get jobs done. Python Essentials 2 takes you through some of the more advanced Python concepts and arms you with skills such as: Algorithmic and Analytical Thinking, to help you design and create your own applications Multi-Module Application Development and Debugging, to ensure that your coding skills are second-to-none Best Programming Practices of Python Professionals Solutions Architecture, so that you can successfully scale up your projects, collaborate with other

programmers, and consistently deliver high-performing code Object-Oriented Programming, to ensure that your software is robust and adheres to the latest industry standards. This book builds upon your knowledge from Python Essentials 1, covering advanced techniques such as modules, packages, exceptions, file processing, and object-oriented programming. By learning these skills, you will become a proficient Python programmer and a valued member of the Python Programming Community, well-equipped to handle complex projects and codebases. With 24 chapters split into four parts, 22 lab exercises with hints and sample solutions and 23 quizzes, this book sets you on the path to becoming a certified python programmer. Elevate your coding prowess for future success; embark on your next Python journey now.

Financial Cryptography and Data Security Ian Goldberg,Tyler Moore,2019-10-11 This book constitutes the thoroughly refereed post-conference proceedings of the 23rd International Conference on Financial Cryptography and Data Security, FC 2019, held in St. Kitts, St. Kitts and Nevis in February 2019.The 32 revised full papers and 7 short papers were carefully selected and reviewed from 179 submissions. The papers are grouped in the following topical sections: Cryptocurrency Cryptanalysis, Measurement, Payment Protocol Security, Multiparty Protocols, Off-Chain Mechanisms, Fraud Detection, Game Theory, IoT Security and much more.

Human Aspects of Information Security, Privacy, and Trust Theo Tryfonas,2016-07-04 This book constitutes the proceedings of the 4th International Conference on Human Aspects of Information Security, Privacy, and Trust, HAS 2016, held as part of the 18th International Conference on Human-Computer Interaction, HCII 2016, held in Toronto, ON, Canada, in July 2016 and received a total of 4354 submissions, of which 1287 papers were accepted for publication after a careful reviewing process. These papers address the latest research and development efforts and

highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 25 papers presented in the HAS 2016 proceedings are organized in topical sections as follows: human factors of authentication; security, privacy, and human behavior; and security technologies.

Joe Celko's Data, Measurements and Standards in SQL Joe Celko, 2009-09-22 Joe Celko has looked deep into the code of SQL programmers and found a consistent and troubling pattern - a frightening lack of consistency between their individual encoding schemes and those of the industries in which they operate. This translates into a series of incompatible databases, each one an island unto itself that is unable to share information with others in an age of internationalization and business interdependence. Such incompatibility severely hinders information flow and the quality of company data. *Data, Measurements and Standards in SQL* reveals the shift these programmers need to make to overcome this deadlock. By collecting and detailing the diverse standards of myriad industries, and then giving a declaration for the units that can be used in an SQL schema, Celko enables readers to write and implement portable data that can interface to any number of external application systems! This book doesn't limit itself to one subject, but serves as a detailed synopsis of measurement scales and data standards for all industries, thereby giving RDBMS programmers and designers the knowledge and know-how they need to communicate effectively across business boundaries. * Collects and details the diverse data standards of myriad industries under one cover, thereby creating a definitive, one-stop-shopping opportunity for database programmers. * Enables readers to write and implement portable data that can interface to any number external application systems, allowing readers to cross business boundaries and move up the career ladder. * Expert

advice from one of the most-read SQL authors in the world who is well known for his ten years of service on the ANSI SQL standards committee and Readers Choice Award winning column in Intelligent Enterprise.

Emotion Concepts of the Ibans in Sarawak Lilly Metom, 2013 This book explains the emotion concepts of the Ibans, one of the indigenous peoples in Sarawak, Malaysia. It is an outcome of a research study, which aims to analyse the Iban emotion concepts utilizing Natural Semantic Metalanguage (NSM), an analytical tool developed by Anna Wierzbicka (1991), and the concrete/abstract cultural continuum framework, a framework introduced by J. Vin D'Cruz and G. Tham (1993), and later, J. Vin D'Cruz and William Steele (2000). NSM enables emotion terminologies in Iban to be explicated and further defined along the concrete/abstract cultural continuum framework. The respondents of this study were the village community of Sbangki Panjai, a longhouse located in Lubok Antu, Sarawak. The findings reveal the core cultural values that underlie the people's behaviours in the ways they express their emotions. The complex 'rules of logic' called adat and the rules of speaking in this speech community are discussed in detail in this book, which explain the Ibans' communicative behaviours. Although the semantic analysis of the emotion words is exhaustive and comprehensive, it is necessary in order to reveal the complete meaning of the emotions being examined without creating ethnocentric bias. Thus, this book essentially describes how the Ibans relate themselves to others in their interaction.

The Design of Web APIs Arnaud Lauret, 2019-10-08 Summary The Design of Web APIs is a practical, example-packed guide to crafting extraordinary web APIs. Author Arnaud Lauret demonstrates fantastic design principles and techniques you can apply to both public and private web APIs. About the technology An API frees developers to integrate with an application without

knowing its code-level details. Whether you're using established standards like REST and OpenAPI or more recent approaches like GraphQL or gRPC, mastering API design is a superskill. It will make your web-facing services easier to consume and your clients—internal and external—happier. About the book Drawing on author Arnaud Lauret's many years of API design experience, this book teaches you how to gather requirements, how to balance business and technical goals, and how to adopt a consumer-first mindset. It teaches effective practices using numerous interesting examples. What's inside Characteristics of a well-designed API User-oriented and real-world APIs Secure APIs by design Evolving, documenting, and reviewing API designs About the reader Written for developers with minimal experience building and consuming APIs. About the author A software architect with extensive experience in the banking industry, Arnaud Lauret has spent 10 years using, designing, and building APIs. He blogs under the name of API Handyman and has created the API Stylebook website.

Foreign Exchange Operations David F. DeRosa,2013-10-28 The ultimate nuts-and-bolts guide to foreign exchange operations The foreign exchange landscape is particularly risky since so much of the world is unregulated and takes place over the counter (off exchange). Brilliant traders and money managers who are profitable may find themselves underperforming, or worse, losing, simply because they failed to establish strong operations. In this book, David DeRosa provides industry

players with everything they need for strong operational functions from all the types of trades to execution, master trading agreements, documentation, settlement, margin and collateral, and prime brokerage services. Contains vital work flow solutions for trading in the volatile foreign exchange marketplace Offers information for mastering the operational aspect of foreign exchange trading to help determine best partners such as prime brokers and others Written by David DeRosa a leading foreign exchange expert who has consulted to hundreds of financial institutions Foreign Exchange Operations helps traders mitigate risks and offers a guide to all aspects of trading operations from mastering trading agreements to margin documentation.

Secure Information Networks Bart Preneel, 2013-03-14 This volume contains papers presented at the fourth working conference on Communications and Multimedia Security (CMS'99), held in Leuven, Belgium from September 20-21, 1999. The Conference, arranged jointly by Technical Committees 11 and 6 of the International Federation of Information Processing (IFIP), was organized by the Department of Electrical Engineering of the Katholieke Universiteit Leuven. The name Communications and Multimedia Security was used for the first time in 1995, when Reinhard Posch organized the first in this series of conferences in Graz, Austria, following up on the previously national (Austrian) IT Sicherheit conferences held in Klagenfurt (1993) and Vienna (1994). In 1996, CMS took place in Essen, Germany; in 1997 the conference moved to Athens, Greece. The Conference aims to provide an international forum for presentations and discussions on protocols and techniques for providing secure information networks. The contributions in this volume review the state-of-the-art in communications and multimedia security, and discuss practical of topics experiences and new developments. They cover a wide spectrum including network security, web security, protocols for entity authentication and key agreement, protocols for mobile

environments, applied cryptography, watermarking, smart cards, and legal aspects of digital signatures.

Borneo Studies in History, Society and Culture Victor T. King, Zawawi Ibrahim, Noor Hasharina Hassan, 2016-08-12 This edited book is the first major review of what has been achieved in Borneo Studies to date. Chapters in this book situate research on Borneo within the general disciplinary fields of the social sciences, with the weight of attention devoted to anthropological research and related fields such as development studies, gender studies, environmental studies, social policy studies and cultural studies. Some of the chapters in this book are extended versions of presentations at the Borneo Research Council's international conference hosted by Universiti Brunei Darussalam in June 2012 and a Borneo Studies workshop organised in Brunei in 2012. The volume examines some of the major debates and controversies in Borneo Studies, including those which have served to connect post-war research on Borneo to wider scholarship. It also assesses some of the more recent contributions and interests of locally based researchers in universities and other institutions in Borneo itself. The major strength of the book is the inclusion of a substantial amount of research undertaken by scholars working and teaching within the Southeast Asian region. In particular there is an examination of research materials published in the vernacular, notably the outpouring of work published in Indonesian by the Institut Dayakologi in Pontianak. In doing so, the book also addresses the urgent matters which have not received the attention they deserve, specifically subjects, themes and issues that have already been covered but require further contemplation, elaboration and research, and the scope for disciplinary and multidisciplinary collaboration in Borneo Studies. The book is a valuable resource and reference work for students and researchers interested in social science scholarship on Borneo, and for those with wider

interests in Indonesia and Malaysia, and in the Southeast Asian region.

Verification 1995 J. B. Poole, 2019-09-18 This fifth volume of annual reviews of developments in the implementation of arms control and environmental agreements and in peacekeeping activities covers recent developments. It discusses nuclear proliferation, nuclear testing, a fissile materials cut-off and the counter-proliferation concept.

Review of Some Online Banks and Visa/Master Cards Issuers Dr. Hedaya Mahmood Alasooly, 2020-09-22 A digital wallet also known as e-Wallet refers to an electronic device, online service, or software program that allows one party to make electronic transactions with another party bartering digital currency units for goods and services. This can include purchasing items online with a computer or using a smartphone to purchase something at a store. Money can be deposited in the digital wallet prior to any transactions or, in other cases; an individual's bank account can be linked to the digital wallet. Users might also have their driver's license, health card, loyalty card(s) and other ID documents stored within the wallet. The credentials can be passed to a merchant's terminal wirelessly via near field communication (NFC). Increasingly, digital wallets are being made not just for basic financial transactions but to also authenticate the holder's credentials. For example, a digital wallet could verify the age of the buyer to the store while purchasing alcohol. The system has already gained popularity in Japan, where digital wallets are known as wallet mobiles". A crypto currency wallet is a digital wallet where private keys are stored for crypto currencies like bitcoin. Online banking, also known as internet banking or web banking, is an electronic payment system that enables customers of a bank or other financial institution to conduct a range of financial transactions through the financial institution's website. The online banking system will typically connect to or be part of the core banking system operated by a bank and is in

contrast to branch banking which was the traditional way customers accessed banking services. Some banks operate as a direct bank (or “virtual bank”), where they rely completely on internet banking. Internet banking software provides personal and corporate banking services offering features such as viewing account balances, obtaining statements, checking recent transactions, transferring money between accounts, and making payments. A crypto currency exchange, or a digital currency exchange (DCE), is a business that allows customers to trade crypto currencies or digital currencies for other assets, such as conventional fiat money or other digital currencies. A crypto currency exchange can be a market maker that typically takes the bid-ask spreads as a transaction commission for its service or, as a matching platform, simply charges fees. A debit card is a payment card that deducts money directly from a consumer's checking account to pay for a purchase. Debit cards eliminate the need to carry cash or physical checks to make purchases directly from your savings. It is similar to a credit card, but unlike a credit card, the money is immediately transferred directly from the cardholder's bank account when performing any transaction. A credit card is a payment card issued to users (cardholders) to enable the cardholder to pay a merchant for goods and services based on the cardholder's promise to the card issuer to pay them for the amounts plus the other agreed charges.[1] The card issuer (usually a bank) creates a revolving account and grants a line of credit to the cardholder, from which the cardholder can borrow money for payment to a merchant or as a cash advance. As Electronic banks and E-wallets and Crypto currency Exchanges are important in internet shopping and Ecommerce and crypto currency trading. We have nowadays many online payment providers and so it becomes very difficult for the users to compare in between them to choose the best in term of deposit and withdraw fees. I will not go in detail on each payment provider services, rules and fees. I will just list roughly most

commonly used online payment providers for sort of comparison in between them. I will specifically compare the withdraw and deposit fees for each one. I will mention also some of the difficulties I met with some of them because lack of their services in my country Palestine. I will also show how to get Visa and Master Debit Cards online.

Electronic Design Automation for IC System Design, Verification, and Testing Luciano Lavagno, Igor L. Markov, Grant Martin, Louis K. Scheffer, 2017-12-19 The first of two volumes in the Electronic Design Automation for Integrated Circuits Handbook, Second Edition, Electronic Design Automation for IC System Design, Verification, and Testing thoroughly examines system-level design, microarchitectural design, logic verification, and testing. Chapters contributed by leading experts authoritatively discuss processor modeling and design tools, using performance metrics to select microprocessor cores for integrated circuit (IC) designs, design and verification languages, digital simulation, hardware acceleration and emulation, and much more. New to This Edition: Major updates appearing in the initial phases of the design flow, where the level of abstraction keeps rising to support more functionality with lower non-recurring engineering (NRE) costs Significant revisions reflected in the final phases of the design flow, where the complexity due to smaller and smaller geometries is compounded by the slow progress of shorter wavelength lithography New coverage of cutting-edge applications and approaches realized in the decade since publication of the previous edition—these are illustrated by new chapters on high-level synthesis, system-on-chip (SoC) block-based design, and back-annotating system-level models Offering improved depth and modernity, Electronic Design Automation for IC System Design, Verification, and Testing provides a valuable, state-of-the-art reference for electronic design automation (EDA) students, researchers, and professionals.

Cloud Security Auditing Suryadipta Majumdar, Taous Madi, Yushun Wang, Azadeh Tabiban, Momen Oqaily, Amir Alimohammadifar, Yosr Jarraya, Makan Pourzandi, Lingyu Wang, Mourad Debbabi, 2019-08-28 This book provides a comprehensive review of the most up to date research related to cloud security auditing and discusses auditing the cloud infrastructure from the structural point of view, while focusing on virtualization-related security properties and consistency between multiple control layers. It presents an off-line automated framework for auditing consistent isolation between virtual networks in OpenStack-managed cloud spanning over overlay and layer 2 by considering both cloud layers' views. A runtime security auditing framework for the cloud with special focus on the user-level including common access control and authentication mechanisms e.g., RBAC, ABAC and SSO is covered as well. This book also discusses a learning-based proactive security auditing system, which extracts probabilistic dependencies between runtime events and applies such dependencies to proactively audit and prevent security violations resulting from critical events. Finally, this book elaborates the design and implementation of a middleware as a pluggable interface to OpenStack for intercepting and verifying the legitimacy of user requests at runtime. Many companies nowadays leverage cloud services for conducting major business operations (e.g., Web service, inventory management, customer service, etc.). However, the fear of losing control and governance still persists due to the inherent lack of transparency and trust in clouds. The complex design and implementation of cloud infrastructures may cause numerous vulnerabilities and misconfigurations, while the unique properties of clouds (elastic, self-service, multi-tenancy) can bring novel security challenges. In this book, the authors discuss how state-of-the-art security auditing solutions may help increase cloud tenants' trust in the service providers by providing assurance on the compliance with the applicable laws, regulations, policies, and standards. This

book introduces the latest research results on both traditional retroactive auditing and novel (runtime and proactive) auditing techniques to serve different stakeholders in the cloud. This book covers security threats from different cloud abstraction levels and discusses a wide-range of security properties related to cloud-specific standards (e.g., Cloud Control Matrix (CCM) and ISO 27017). It also elaborates on the integration of security auditing solutions into real world cloud management platforms (e.g., OpenStack, Amazon AWS and Google GCP). This book targets industrial scientists, who are working on cloud or security-related topics, as well as security practitioners, administrators, cloud providers and operators. Researchers and advanced-level students studying and working in computer science, practically in cloud security will also be interested in this book.

Joe Celko's SQL Programming Style Joe Celko, 2005-05-19 Are you an SQL programmer that, like many, came to SQL after learning and writing procedural or object-oriented code? Or have switched jobs to where a different brand of SQL is being used, or maybe even been told to learn SQL yourself? If even one answer is yes, then you need this book. A Manual of Style for the SQL programmer, this book is a collection of heuristics and rules, tips, and tricks that will help you improve SQL programming style and proficiency, and for formatting and writing portable, readable, maintainable SQL code. Based on many years of experience consulting in SQL shops, and gathering questions and resolving his students' SQL style issues, Joe Celko can help you become an even better SQL programmer. Help you write Standard SQL without an accent or a dialect that is used in another programming language or a specific flavor of SQL, code that can be maintained and used by other people. Enable you to give your group a coding standard for internal use, to enable programmers to use a consistent style. Give you the mental tools to approach a new problem with SQL as your tool, rather than another programming language — one that someone else might not
