**The World's Top 100 Retailers ,
Working Time and Workers' Preferences in
Industrialized Countries** Jon C.

Messenger, 2004-09-09 Globalization, demographic changes, increasing numbers of women in the labour market : all these changes have resulted in working time arrangements which often look vastly different than they did several decades ago. These changes have significant ramifications both economically and sociologically. This volume examines the changing nature of working time in industrialized countries. This volume will greatly interest those researchers and academics working on labour economics, employment issues and more specifically working time. The policy ramifications that this book uncovers mean that it will also be a useful reference for policy-makers.--Jacket.

Regulation of the Contractile Cycle in Smooth Muscle Takeshi Nakano, David J.

Hartshorne, 2012-12-06 At the Mie International Symposium held in Japan in April 1994, leading scientists reviewed recent advances in the understanding of the contractile mechanism in smooth muscle. The present volume collects the papers presented at the symposium, summarizing the latest advances in smooth muscle function and emphasizing important components of the

contraction-relaxation cycle. Topics include a discussion of the smooth muscle cell membrane, with emphasis on its ion channels; the regulation of cytosolic Ca²⁺ levels and the relationship to force in smooth muscle; aspects of the two key regulatory enzymes involved with myosin phosphorylation-dephosphorylation; the molecular basis for pharmacomechanical coupling in smooth muscle; developments in the basic contractile mechanisms involving the crossbridge cycle of tonic and phasic muscle; the role of myosin light chains; and many others. The approach is broad and presents contemporary opinions in pharmacology, physiology, and biochemistry as they relate to smooth muscle function. The book will appeal not only to those working in these disciplines, but to vascular clinicians, obstetric-gynecological physicians, and gastroenterologists as well.

Red Snow Will Dean, 2023-05-01 TWO BODIES One suicide. One cold-blooded murder. Are they connected? And who's really pulling the strings in the small Swedish town of Gavrik? TWO COINS Black Grimberg liquorice coins cover the murdered man's eyes. The hashtag #Ferryman starts to trend as local people stock up on ammunition. TWO WEEKS Tuva Moodyson, deaf reporter at the local paper, has a fortnight to investigate the deaths before she starts her new job in the south. A blizzard moves in. Residents, already terrified, feel increasingly cut-off. Tuva must go deep inside the Grimberg factory to stop the killer before she leaves town for good. But who's to say the Ferryman will let her go?

Command Of The Air General Giulio

Douhet,2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Zack Mons Kallentoft,Markus Lutteman,2018-01-23 The gripping first thriller in a chilling new series from the reigning master of Scandinavian crime fiction-Mons Kallentoft, author of the acclaimed Malin Fors novels-is an instant international sensation. Zack Herry is the golden boy who has stumbled into a career in the Stockholm police force. At night, he hangs out at

the clubs, partying with the people he should really be arresting. He knows that it won't last, but he can't help himself, even as he starts being investigated by internal affairs. But when four Thai women from a massage parlor in Stockholm are found brutally executed and a fifth badly mutilated and dumped outside a nearby hospital, Zack must get his act together and try to figure out the motives behind the vicious murders, together with his partner, Deniz. Only one thing is for sure: more women will die unless they find the killer.

Territories, Environments, Politics Andrea Mubi Brighenti, Mattias Kärrholm, 2022-04-19 This collection seeks to illustrate the state of the art in territoriological research, both empirical and theoretical. The volume gathers together a series of original, previously unpublished essays exploring the newly emerging territorial formations in culture, politics and society. While the globalisation debate of the 1990s largely pivoted around a 'general deterritorialisation' hypothesis, since the 2000s it has become apparent that, rather than effacing territories, global connections are added to them, and represent a further factor in the increase of territorial complexity. Key questions follow, such as: How can we further the knowledge around territorial complexities and the ways in which different processes of territorialisation co-exist and interact, integrating scientific advances from a plurality of disciplines? Where and what forms does territorial complexity assume, and how do complex territories operate in specific instances? Which technological, political and cultural facets of territories should be tackled to make sense of the life of territories? How and by what different or combined methods can we describe territories, and do justice to their articulations and meanings? How can the territoriological vocabulary

relate to contemporary social theory advancements such as ANT, the ontological turn, the mobilities paradigm, sensory urbanism, and atmospheres research? How can territorial phenomena be studied across disciplinary boundaries? Territories, Environments, Politics casts a fresh perspective onto a number of key contemporary socio-spatial phenomena. Refraining from the attempt to ossify territoriology into some disciplinary straightjacket, the collection aims to illustrate the scope of current territoriological research, its domain, its promises, its theoretical advancements, and its methodological reflection in the making. Scholars interested in social research will find in this collection a rich and imaginative theoretical-methodological toolkit. Students in human geography, anthropology and sociology, socio-legal studies, architecture and urban planning will find Territories, Environments, Politics of interest.

Who Owns Whom ,2002

What Should We Know About Prevented, Diagnostic, and Interventional Therapy in Coronary Artery Disease Baskot Branislav,2013-03-20 The mortality from ischemic heart disease has decreased in recent years. The better understanding of risk factors associated with development of coronary artery disease has significantly contributed to this decline. Improvements in medical and interventional therapy have reduced the complications associated with acute myocardial infarction as well as revascularization. After the introduction of imaging modalities, the noninvasive characterization of regional function, perfusion and metabolism allowed for more sophisticated tissue characterization to identify reversible dysfunction with high diagnostic and prognostic accuracy. We now can legitimately claim that computed tomography angiography (CTA) of the coronary arteries is available. In the evaluation

of patients with suspected coronary artery disease, many guidelines today consider CTA an alternative to stress testing. However the nuclear technique most frequently used by cardiologists is myocardial perfusion imaging (MPI). The combination of a nuclear camera with CTA allows for the attainment of coronary anatomic, cardiac function and MPI from one piece of equipment. Assessing cardiac viability is now fairly routine with these enhancements to cardiac imaging. Traditional coronary angiography presents a variety of limitations related to image acquisition, content, interpretation, and patient safety. Barriers to such improvements include the paucity of clinical outcomes studies related to new imaging technology, the need for physician and staff member training, and the costs associated with acquiring and effectively using these advances in coronary angiography. This issue is full of important information that every cardiologist needs to now.
