In last few decades, we have embraced AI in our daily life to solve a plethora of problems, one of the notable problems is cyber security. In coming years, the traditional AI algorithms are not able to address the zero-day cyber attacks, and hence, to capitalize on the AI algorithms, it is absolutely important to focus more on XAI. Hence, this book serves as an excellent reference for those who are working in cyber security and artificial intelligence.

### **COTS-Based Software Systems** Rick Kazman, Dan

Port, 2004-04-14 In the short space of about a decade, Commercial-Off-the-Shelf (COTS) software has evolved through being a relatively minor aspect of software development; a management-endorsed silver bullet solution for software development; a disruptive technology requiring people and organizations to extensively rethink their approaches to software development; to an increasingly well-understood software phenomenon for which effective solutions are being developed. Part of this understanding has been to recognize that different COTS application sectors can be at different stages of this evolution. Some sectors are just beginning to become COTS-intensive. Some have evolved COTS solutions that are very well matched to their problem domain. Others, including most large-scale applications, still involve their developers in rethinking how to adapt their traditional software architectures, processes, management practices, and personnel skills to accommodate economically attractive but complex combinations of powerful but incompletely compatible and independently evolving COTS products. The series of International Conferences on COTS-Based Software Systems (ICCBSS) has been established as a continuing forum for bringing together CBSS developers, suppliers, and researchers to summarize and discuss progress toward understanding and resolving CBSS problems. This year's conference theme, "Matching Solutions to Problems, reflects this objective. We have been fortunate to have three outstanding keynote speakers, David Carr, Tricia Oberndorf, and

Douglas Schmidt, who have contributed significantly both in analyzing CBSS problems and developing better CBSS solutions. The contributed papers and summaries of workshops, panels, and tutorials in these

Proceedings give a good understanding of the nature and directions of evolution of CBSS problems and solutions. As has been my experience with previous ICCBSS Proceedings volumes, I believe that you will find lasting value in the content of the Proceedings.
