**Bureau of Land Management Camping** Ultimate Campgrounds,2020-07-03 The Ultimate Public Campground Project was conceived in 2008 to provide a consolidated and comprehensive source for public campgrounds of all types. It all began with a simple POI (Point of Interest) list of GPS coordinates and names, nothing more, totaling perhaps 5,000 locations. As the list grew in size and information provided, a website was designed to display the data on a map. Next came mobile apps, first iOS and Mac apps and more recently Android versions. Now this information is available in various paperback books. Work continues on the Project with information updated regularly. This book describes 1,142 camping areas in the Western United States that are managed by the Bureau of Land Management.

**Thirtyfour Campgrounds** Martin Hogue,2016 Camping can make us feel a powerful connection to nature and our rugged backwoods forebears. Campers once confronted the elemental facts of life, but now, the millions of Americans taking to the road on camping trips are more likely to drive to a campground, hook up service conduits, connect to WiFi, drop their awnings, and set out patio chairs. It is as if, Martin Hogue observes, each campsite functions as a stage upon which campers perform a series of ritualized activities (pitching the tent, building a fire, cooking over flames). In Thirtyfour Campgrounds, Hogue investigates these sites, individually and in multiples, offering a photographic and typological survey of nearly 6,500 American campsites, mapping subtle differences within the apparently identical. The central part of the book consists of color photographs of individual campsites, downloaded from such online reservation websites as koa.com and recreation.gov, organized by zip code, and arranged in grids across the pages. Hogue nods to artist Ed Ruscha's Thirtyfour Parking Lots for his title and its attitude, and to the work of Bernd and Hilla Becher for the serial arrangement of images in grids. The campsite pictures seem at first endlessly repetitious; but then the repetition makes way for difference. Time reveals itself in fading light and passing clouds, the weather changes between photographs of neighboring sites, leaves turn color and fall, in an unexpected kind of time-lapse photography. This is a book that was made so seriously that it must (not) be taken too seriously. More scientific than any campground literature, Thirtyfour Campgrounds calls the very nature of scientific survey, research, and publication into question.
