Pi: A Source Book Jonathan M. Borwein,2013-06-29 Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

Captain Swing Eric Hobsbawm,George Rude,2014-08-12 Sir Your name is down amongst the Black hearts in the Black Book and this is to advise you and the like of you, who are Parson Justasses, to make your wills Ye have been the Blackguard Enemies of the People on all occasions, Ye have not yet done as ye ought - Swing In our increasingly mechanized age, the Swing revolts are a timely record of the relationship between technological advance, labour and poverty. With the onset of the Industrial Revolution, capitalism swept from the cities into the countryside, and tensions mounted between agricultural workers and employers. From 1830 on, a series of revolts, known as the Swing shook England to its core. Landowners wanting to make their land more profitable started to use machinery to harvest crops, causing widespread misery among rural communities. Captain Swing reveals the background to that upheaval, from its rise to its fall, and shines a light on the people who tried to change the world and save their livelihoods.

Global Land Ice Measurements from Space Jeffrey S. Kargel, Gregory J. Leonard, Michael P. Bishop, Andreas Käb, Bruce H.

Raup,2014-07-08 An international team of over 150 experts provide up-to-date satellite imaging and quantitative analysis of the state and dynamics of the glaciers around the world, and they provide an in-depth review of analysis methodologies. Includes an e-published supplement. Global Land Ice Measurements from Space - Satellite Multispectral Imaging of Glaciers (GLIMS book for short) is the leading state-of-the-art technical and interpretive presentation of satellite image data and analysis of the changing state of the world's glaciers. The book is the most definitive, comprehensive product of a global glacier remote sensing consortium, Global Land Ice Measurements from Space (GLIMS, <http://www.glims.org>). With 33 chapters and a companion e-supplement, the world's foremost experts in satellite image analysis of glaciers analyze the current state and recent and possible future changes of glaciers across the globe and interpret these findings for policy planners. Climate change is with us for some time to come, and its impacts are being felt by the world's population. The GLIMS Book, to be released about the same time as the IPCC's 5th Assessment report on global climate warming, buttresses and adds rich details and authority to the global change community's understanding of climate change impacts on the cryosphere. This will be a definitive and technically complete reference for experts and students examining the responses of glaciers to climate change. World experts demonstrate that glaciers are changing in response to the ongoing climatic upheaval in addition to other factors that pertain to the circumstances of individual glaciers. The global mosaic of glacier changes is documented by quantitative analyses and are placed into a perspective of causative factors. Starting with a Foreword, Preface, and Introduction, the GLIMS book gives the rationale for and history of glacier monitoring and satellite data analysis. It includes a comprehensive set of six how-to methodology chapters, twenty-five chapters detailing regional glacier state and dynamical changes, and an in-depth summary and interpretation chapter placing the observed glacier changes into a global context of the coupled atmosphere-land-ocean system. An accompanying e-supplement will include oversize imagery and other other highly visual renderings of scientific data.

The Pharisees Joseph Sievers,Amy-Jill Levine,2021-12-02 A multidisciplinary appraisal of the Pharisees: who they were, what they taught, and how they've been understood and depicted throughout history For centuries, Pharisees have been well known but little understood—due at least in part to their outsized role in the Christian imagination arising from select negative stereotypes based in part on the Gospels. Yet historians see Pharisees as respected teachers and forward-thinking innovators who helped make the Jewish tradition more adaptable to changing circumstances and more egalitarian in practice. Seeking to bridge this gap, the contributors to this volume provide a multidisciplinary appraisal of who the Pharisees actually were, what they believed and taught, and how they have been depicted throughout history. The topics explored within this authoritative resource include: the origins of the Pharisees the meaning of the name “Pharisee” Pharisaic leniency, relative to the temple priesthood, in judicial matters Pharisaic concerns for the Jewish laity Pharisaic purity practices and why they became popular the varying depictions of Pharisaic practices and

beliefs in the New Testament Jesus's relationship to the Pharisees the apostle Paul and his situation within the Pharisaic tradition the question of continuity between the Pharisaic tradition and Rabbinic Judaism the reception history of the Pharisees, including among the rabbis, the church fathers, Rashi, Maimonides, Luther, and Calvin the failures of past scholarship to deal justly with the Pharisees the representations, both positive and negative, of the Pharisees in art, film, passion plays, and Christian educational resources how Christian leaders can and should address the Pharisees in sermons and in Bible studies Following the exploration of these and other topics by a team of internationally renowned scholars, this volume concludes with an address by Pope Francis on correcting the negative stereotypes of Pharisees that have led to antisemitic prejudices and finding resources that "will positively contribute to the relationship between Jews and Christians, in view of an ever more profound and fraternal dialogue." Contributors: Luca Angelelli, Harold W. Attridge, Vasile Babota, Shaye J. D. Cohen, Philip A. Cunningham, Deborah Forger, Paula Fredriksen, Yair Furstenburg, Massimo Grilli, Susannah Heschel, Angela La Delfa, Amy-Jill Levine, Hermut Löhr, Steve Mason, Eric M. Meyers, Craig E.
