Ice! The Amazing History Laurence Pringle, 2012-10-01 Think of a world without cold drinks, ice cream, and frozen foods. Believe it or not, such a world DID exist! Learn all about this fascinating history in this nonfiction book. In the early 1800s, people began to harvest ice, store it in ways that limited melting, and transport it to homes and businesses. Eventually, almost everyone had an icebox, and a huge, vital ice business grew. In this riveting book, acclaimed writer Laurence Pringle describes the key inventions and ideas that helped the ice business flourish. He points to the many sources of ice throughout the East and Midwest and spotlights Rockland Lake, the icebox of New York City, to offer a close-up look at the ice business in action. Pringle worked closely with experts and relied on primary documents, including archival photographs, postcards, prints, and drawings, to capture the times when everyone waited for the ice man and his wagon to deliver those precious blocks of ice.

The Routledge Handbook on Historic Urban Landscapes in the Asia-Pacific Kapila

Silva, 2019-12-23 The Routledge Handbook on Historic Urban Landscapes in the Asia-Pacific sheds light onto the balancing act of urban heritage management, focusing specifically on the Asia-Pacific regions in which this challenge is imminent and in need of effective solutions. Urban heritage, while being threatened amid myriad forces of global and ecological change, provides a vital social, cultural, and economic asset for regeneration and sustenance of liveability of inhabited urban areas worldwide. This six-part volume takes a critical look at the concept of Historic Urban Landscapes, the approach that UNESCO promotes to achieve holistic management of urban heritage, through the lens of issues, prospects, and experiences of urban regeneration of the selected geo-cultural context. It further discusses the difficult task that heritage managers encounter in conceptualizing, mapping, curating, and sustaining the plurality, poetics, and politics of urban heritage of the regions in question. The connective thesis that weaves the chapters in this volume together reinforces for readers that the management of urban heritage considers cities as dynamic entities, palimpsests of historical memories, collages of social diversity, territories of contested identities, and sites for sustainable liveability. Throughout this edited collection, chapters argue for recognizing the totality of the eco-cultural urban fabric, embracing change, building social cohesion, and initiating strategic socio-economic progress in the conservation of Historic Urban Landscapes. Containing thirty-seven contributions written by leading regional experts, and illustrated with over 200 black and white images and tables, this volume provides a much-needed resource on Historic Urban Landscapes for students,

scholars, and researchers.

Reframing Globalization After COVID-19 Pablo Baisotti, Pierfrancesco Moscuza, 2022-10-15 The pandemic has deepened existing trends in the international system, in particular the readjustment of alliances between nations and between regions. As spheres of influence disintegrate and reform, so national and regional security policies will change in unforeseen ways notwithstanding that individual state self-preservation will dominate policy choice. Three major dimensions are addressed. The first dimension is International Relations and Economy. The coronavirus has accelerated a global economic crisis comparable to those of 1929, 1987 and 2008. Are the major economic trading blocs moving to a war economy, and who might win or lose in this context? The second dimension of analysis is the growth of Information Communication. Hybrid and fragmented, especially in terms of the use of social media, the use of veiled threat and promoting discord in the form of providing provocative information on topics of the day can lead to conflict consequences and all its negative impacts. The third dimension is Geopolitical Reconfiguration. While world powers are always manoeuvring for an enhanced military and economic position, the pandemic offers new opportunities to capitalise on the changing power balance. The editors and contributors engage with the differing power polarities between China, the United States, India, Brazil, Russia, and the European Union. This book is one of the first to present research on the effects of COVID-19 on national public policy. Cross-cultural analysis of its effects, and the way in which different societies have addressed the fight against the virus, provides insight into the relations between states and possible solutions in the international arena. The work is essential reading for all those involved in international affairs and policy-making.

Cloud Analytics for Industry 4.0 Sirisha Potluri, Sachi Nandan Mohanty, Gouse Baig Mohammad, S. Shitharth, 2022-10-03 This book provides research on the state-of-the-art methods for data management in the fourth industrial revolution, with particular focus on cloud-based data analytics for digital manufacturing infrastructures. Innovative techniques and methods for secure, flexible and profitable cloud manufacturing will be gathered to present advanced and specialized research in the selected area.

Transforming Bangladesh Raquib Ahmed, Abdullah Al-Maruf, J. Craig Jenkins, 2023-12-16 This book focuses on the transformation of Bangladesh in respect to its people, geography, economy and environment. The authors discuss current problems such as vulnerability caused by environmental degradation in Bangladesh but also opportunities of this rapidly changing country. The book explains

how the country is rapidly transforming from a rural subsistence agrarian based economic system to a new economic partner contributing to global processes. Bangladesh is presented as an example for the changes in the Global South, where a mismatch is often observed in linking resources and activities with environmental sustainability, possibly due to insufficient base-line knowledge. As faster growth is marginalizing resources to increase the GDP, the sustainability of resource exploitation is being questioned. The authors describe the vulnerable situation caused by possible sea-level rise, soil degradation, biodiversity loss, climate extremities, urbanization, and population displacement. This volume offers comprehensive knowledge about the geography and environment of Bangladesh and aims to help readers further investigate the issues and work on solutions. The book appeals to academics, professionals and students at all levels interested in Bangladesh as well as environmental problems and geographical issues in a rapidly transforming country.

The Beloved Border Miriam Davidson,2021-09-28 Kids in cages, family separations, thousands dying in the desert. Police violence and corruption. Environmental devastation. These are just some of the dramatic stories recounted by veteran journalist Miriam Davidson in *The Beloved Border*. This groundbreaking work of original reporting also gives hope for the future, showing how border people are responding to the challenges with compassion and creativity. The book draws on a variety of sources to explain how border issues intersect and how the current situation, while made worse under the Trump administration, is in fact the result of decades of prohibition, crackdowns, and wall building on the border. Davidson addresses subjects such as violence in Mexico, particularly against the press; cross-border gun smuggling and legal gun sales; the rise in migrant detentions, deportations, and deaths since the crackdown began; controversy over humanitarian aid in the desert; border patrol crimes and abuses; and the legal, ethical, and moral issues raised by increased police presence and

militarization on the border. The book also looks at the environmental impact of wall building and construction of a planned copper mine near Tucson, especially on the jaguar and other endangered species. Davidson shares the history of sanctuary and argues that this social movement and others that have originated on the border are vanguards of larger global movements against the mistreatment of migrant workers and refugees, police brutality, and other abuses of human and natural rights. She gives concrete examples of positive ways in which border people are promoting local culture and cross-border solidarity through health care, commerce, food, art, and music. While death and suffering continue to occur, *The Beloved Border* shows us how the U.S.-Mexico border could be, and in many ways already is, a model for peaceful coexistence worldwide.
