The Ice Cube is Melting Lyle E. Schaller,2004 The contagious disease of intradenominational quarreling has brought the United Methodist Church to this critical time of institutional stress fracture. Lyle Schaller offers a diagnosis of a dysfunctional denominational system and a culture of mistrust. Looking beneath flash-point arguments that polarize and cause an impasse in communication, he recognizes that the most difficult step in the process is to gain agreement on what are the non-negotiable issues in the disagreements and has recruited a number of committed individuals for the task ahead.

Brave New Arctic Mark C. Serreze,2020-03-03 In the 1990s, researchers in the Arctic noticed that floating summer sea ice had begun receding. This was accompanied by shifts in ocean circulation and unexpected changes in weather patterns throughout the world. The Arctic's perennially frozen ground, known as permafrost, was warming, and treeless tundra was being overtaken by shrubs. What was going on? *Brave New Arctic* is Mark Serreze's riveting firsthand account of how scientists from around the globe came together to find answers--Publisher's description

Aquatic Physiosphere-Biosphere Dynamics and Modelling Aike Beckmann, 2021-02-10 This encyclopedia is a reference for aquatic physical, biological and biogeochemical sciences, collecting and connecting a number of topics, concepts and facts about aquatic systems and their scientific investigation. The scope of the book comprises the aquatic physiosphere-biosphere transition zone, an entity that encompasses both inanimate matter and collectives (the physiosphere) as well as living organisms and collectives (the biosphere). This combined approach is meaningful because both realms are intimately linked and because available methods of investigation are often similar. Much can be gained from considering both spheres at and across their interface jointly, and while there is a strong focus on marine systems, most concepts presented are also applicable to freshwater systems. This presented snapshot of knowledge of the transition zone between the aquatic physiosphere and biosphere is taken from a very specific angle: the point of view of a modeler. Modeling is not only a state-of-the-art mode of scientific investigation, but also requires the explicit specification of all assumptions (helping to avoid fallacies), and offers the advantage of being quantitative and allows for

theoretical what if scenarios. As in any reference work, equal emphasis is given to fundamental facts, the definition of terms and the explanation of concepts, in an attempt to establish a joint language for physicists, biologists and biogeochemists. Although originating from a modeler's approach to nature, the resulting suite of compatible concepts may also be useful beyond modeling purposes.

Furthermore, the material is presented in a condensed, straightforward way. Hence, the length of each entry is limited to one (occasionally two) pages, thus offering a quick introductory overview. This excludes lengthy derivations and very specialized details. The book is geared towards researchers, teachers and advanced students in the field of aquatic (marine and limnic) sciences, in particular those interested or involved in interdisciplinary work.

Insights, 2003 Designed to provide students with exciting science experiences that extend their natural fascination with the world and help them learn the science skills and concepts needed later in life.

Climate Change and the Future of Sustainability Muyiwa Adaramola, 2017-03-03 This title includes a number of Open Access chapters. Renewable resources such as wind, solar, and geothermal are often perceived as being the answer to the fossil fuel crisis. Ironically, however, climate change may also negatively impact on these energy sources. All forms of renewable energy are somewhat sensitive to climate variation. This new compendium looks at the impact of renewable resources on climate change from a variety of perspectives.

Fear Stalks the Land! Thom Yorke, Stanley Donwood, 2021-11-11 In which the writings of the authors Thom Yorke and Stanley Donwood are gathered together. This commonplace book includes faxes, notes, fledgling lyrics, sketches, lists of all kinds and scribblings towards nirvana, as were sent between the two authors during the period 1999 to 2000 during the creation of the Radiohead albums

Kid A and Amnesiac. This is a document of the creative process and a mirror to the fears, portents and fantasies invoked by the world as its citizens faced a brave new millennium.

Why Are the Ice Caps Melting? Anne Rockwell, 2006-11-07 The earth is getting hotter, and not just in the summer. The climate of your own hometown is changing. But why is this happening, and can we stop it? Read and find out!
