**iOLab** Mats Selen, Tim Stelzer, 2015-06-15 iOLab is a handheld data-gathering device that communicates wirelessly to its software, and gives students a unique opportunity to see the concepts of physics in action. Students gain hands-on experience and watch their data graphed in real time. This can happen anywhere you have an iOLab device and a laptop: in the lab, in the classroom, in the dorm room, or in your basement. iOLab is flexible and makes it easy for instructors to design and implement virtually any experiment they want to assign their students or demonstrate in lecture.

**Discussion in the College Classroom** Jay R. Howard, 2015-05-18 Keep students engaged and actively learning with focused, relevant discussion. Second only to lecture as the most widely used instructional strategy, there's no better method than classroom discussion to actively engage students with course material. Most faculty are not aware that there is an extensive body of research on the topic from which instructors can learn to facilitate exceptional classroom discussion. *Discussion in the College Classroom* is a practical guide which utilizes that research, frames it sociologically, and offers advice, along with a wide variety of strategies, to help you spark a relevant conversation and steer it toward specific learning goals. Applicable across a spectrum of academic disciplines both online and on campus, these ideas will help you overcome the practical challenges and norms that can undermine discussion, and foster a new atmosphere of collaborative learning.

and critical thinking. Higher education faculty are increasingly expected to be more intentional and reflective in their pedagogical practice, and this guide shows you how to meet those expectations, improve student outcomes, and tackle the perennial problem of lagging engagement. Thoroughly grounded in the scholarship of teaching and learning, this book gives you concrete guidance on integrating discussion into your courses. You'll learn to: Overcome the challenges that inhibit effective discussion Develop classroom norms that facilitate discussion Keep discussion focused, relevant, and productive Maximize the utility of online student discussions The kind of discussion that improves learning rarely arises spontaneously. Like any pedagogical technique, careful planning and smart strategy are the keys to keeping students focused, engaged, and invested in the conversation. Discussion in the College Classroom helps you keep the discussion applicable to the material at hand while serving learning goals.

The Basic Practice of Statistics David S. Moore, 2010 This is a clear and innovative overview of statistics which emphasises major ideas, essential skills and real-life data. The organisation and design has been improved for the fifth edition, coverage of engaging, real-world topics has been increased and content has been updated to appeal to today's trends and research.

Scientific American: Presenting Psychology Deborah Licht, Misty Hull, Coco Ballantyne, 2021-09-02 Written by two teachers and a science journalist, Presenting Psychology

introduces the basics to psychology through magazine-style profiles and video interviews of real people, whose stories provide compelling contexts for the field's key ideas.

**Connections** Paul A. Gore, Wade Leuwerke, A. J.

Metz, 2018-10-12 Connections is an innovative program, built from the ground up with a growth-mindset approach to college and career success. Written by counseling psychologists Paul Gore, Wade Leuwerke, and A.J. Metz, Connections shows students from day one how to be learners, whose mindset, drive, and strengths will help them meet any challenge on their way to college, personal, and career success. The expertly designed program is firmly rooted in the most current research in positive psychology, using self-reflection as a tool for goal-setting; goal-setting as a tool for imagining one's potential; and imagining one's potential as the motivation for realizing it. Connections puts students at the center of their own personalized learning path, facilitates their purposeful choice of an academic and career plan, and develops all the skills they need--cognitive and non-cognitive, academic and life--to foster their self-growth and success. Built around the

most common issues faced in the classroom, LaunchPad for Connections, Second Edition gives students everything they need to prepare for class and exams, including author-developed digital tools linked directly to the eBook, the ACES student self-assessment (taken at the start and end of term), and our acclaimed LearningCurve adaptive quizzing. For instructors, LaunchPad offers everything they need to quickly set up a course, customize the content, prepare presentations and lectures, assign and assess homework, and guide the progress of individual students and the class as a whole.

**Microeconomics** Austan Goolsbee, Steven Levitt, Chad Syverson, 2015-12-03 Like no other text for the intermediate microeconomics course, Goolsbee, Levitt, and Syverson's Microeconomics bridges the gap between today's theory and practice, with a strong empirical dimension that lets students test theory and successfully apply it. With carefully crafted features and vivid examples, Goolsbee, Levitt, and Syverson's text helps answer two critical questions students ask, Do people and firms really act as theory suggests? and How can someone use microeconomics in a practical way? The authors teach in economics departments and business schools and are active empirical microeconomics researchers. Their grounding in different areas of empirical research allows them to present the evidence developed in the last 20 years that has tested and refined fundamental theories. Their teaching and professional experiences are reflected in an outstanding presentation of theories and

applications.

*Mobile Technologies and Applications for the Internet of Things* Michael E. Auer, Thrasyvoulos Tsiatsos, 2019-04-17 This book discusses and assesses the latest trends in the interactive mobile field, and presents the outcomes of the 12th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2018), which was held in Hamilton, Canada on October 11 and 12, 2018. Today, interactive mobile technologies are at the core of many – if not all – fields of society. Not only does the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions coming out practically every day are further strengthening this trend. Since its inception in 2006, the conference has been devoted to highlighting new approaches in interactive mobile technologies with a focus on learning. The IMCL conferences have since established themselves as a valuable forum for exchanging and discussing new research results and relevant trends, as well as practical experience and best-practice examples. This book contains papers in the fields of: Interactive Collaborative Mobile Learning Environments Mobile Health Care Training Game-based Learning Design of Internet of Things (IoT) Devices and Applications Assessment and Quality in Mobile Learning. Its potential readership includes policymakers, educators and researchers in pedagogy and learning theory, schoolteachers, the learning industry, further

education lecturers, etc.

Teaching Large Classes Elisa Lynn Carbone, Elisa Carbone, 1998-05-27 In this useful and practical book, Elisa Carbone offers a wealth of sound advice on how to deal with a large class, from the first day to end of term evaluations. Full of examples taken from many different disciplines, Teaching Large Classes will be an ideal companion for any teacher facing the challenge of the large introductory class.

**Sociology** David M. Newman, 2010 This carefully edited companion anthology provides provocative, eye-opening examples of the practice of sociology in a well-edited, well-designed, and affordable format. It includes short articles, chapters, and excerpts that examine common everyday experiences, important social issues, or distinct historical events that illustrate the relationship between the individual and society. The new edition will provide more detail regarding the theory and/or history related to each issue presented. The revision will also include more coverage of global issues and world religions.

**Discussion as a Way of Teaching** Stephen Brookfield, Stephen Preskill, 1999-01-01 This book is written for all university and college teachers interested in experimenting with discussion methods in their classrooms. Discussion as a Way of Teaching is a book full of ideas, techniques, and usable suggestions on: \* How to prepare students and teachers to participate in discussion \* How to get discussions started \* How to keep discussions going \* How to ensure that teachers' and students' voices are kept in some sort of

balance It considers the influence of factors of race, class and gender on discussion groups and argues that teachers need to intervene to prevent patterns of inequity present in the wider society automatically reproducing themselves inside the discussion-based classroom. It also grounds the evaluation of discussions in the multiple subjectivities of students' perceptions. An invaluable and helpful resource for university and college teachers who use, or are thinking of using, discussion approaches.

**Active Learning** Charles C. Bonwell, James A. Eison, 1991 This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled The Modified Lecture offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based

instruction, cooperative learning, debates, drama, role playing, simulations, games, and peer teaching. A section on obstacles to implementing active learning techniques leads naturally to the final section, Conclusions and Recommendations, which outlines the roles that each group within the university can play in order to encourage the implementation of active learning strategies. The text includes over 200 references and an index.

**Discovering Psychology** Don H. Hockenbury, Sandra E. Hockenbury, 2006-04 More than any other introductory psychology textbook, the Hockenburys' brief book presents the discipline with a unique understanding of today's students--emphasizing its relevance and immediate impact on their lives. Without sacrificing science, the authors draw on personal experiences and anecdotes to illustrate essential concepts and important research direction. The Fourth Edition incorporates hundreds of new research studies throughout, with particular attention to areas of intensive current research and enduring student interest, including neuroscience, lifespan development, memory, and gender and culture issues. Also new is the dramatically enhanced media and supplements package, offering more ways than ever to help students make the study of psychology a part of their world.

*Just-in-time Teaching* Gregor M. Novak, 1999 The authors explain how a group of higher education schools used just-in-time teaching (JiTT) methods to increase interactivity for the physics student. By enhancing courses with multimedia Web

activities and electronic communications, the classroom environment allowed less dependence on lecture and more rapid responses to students' problems.

The Digital Revolution in Higher Education Alan R. Shark, 2015-05-08 As its title implies, this book provides an optimistic vision through a series of thoughtful, if not a provocative collection of writings from those closest to the system. No discussion regarding the digital revolution in higher education is complete without taking into account the viewpoints of the innovators, the faculty, the students, the chief information officer, and the administration. Higher education has come under increasing scrutiny as never before due to rising costs, changes in future job requirements, and new forms of learning opportunities offered by non-traditional companies and institutions. The Digital Revolution in Higher Education is all about the changes regarding the advances in technology and how institutions of higher learning along with nontraditional organizations are utilizing these powerful new tools. These new tools include new mobile devices, enhanced and feature-rich learning management systems, data-feeding sensors, 3D printers, smart classrooms, smart buildings, and collaboration tools allowing students and faculty to collaborate just about anywhere face-to-face, virtually. Learn how this revolution will help reshape higher education thus transforming it towards the University of Everything.
