Modern Sports around the World David Asa Schwartz,2021-06-14 Modern Sports around the World focuses on the history, geography, sociology, economics, and technological advancements of 50 sports played from India to Ireland. Sports have become an international spectacle that influences nations' foreign policy, world economies, and regional morale. Hundreds of billions of dollars are at stake as governments and multinational corporations rush to make sure they have a place at the table. And yet, sports come from humble beginnings. We are fascinated by who can run the fastest, lift the most weight, jump the highest, swim the farthest, and act with the most precision. The history of sports is the history of the world. Modern Sports around the World examines 50 of the world's most popular sports. Each chapter features one sport and details that sport's origins, global migration, economic forces, media influences, political environment, pop-culture inspirations, scandalous moments, and key individuals. Sports history is a tapestry of sociological variables; Modern Sports around the World weaves them together to create a unique history book that explains not only where humanity has been, but where it might be going.

With more than 3,500 exoplanets now known, the complexity of the discovery techniques, observations and physical characterisation have grown exponentially. This Handbook ties all these avenues of research together across a broad range of exoplanet science. Planet formation, exoplanet interiors and atmospheres, and habitability are discussed, providing in-depth coverage of our knowledge to date. Comprehensively updated from the first edition, it includes instrumental and observational developments, in-depth treatment of the new Kepler mission results and hot Jupiter atmospheric studies, and major updates on models of exoplanet formation. With extensive references to the research literature and appendices covering all individual exoplanet discoveries, it is a valuable reference to this exciting field for both incoming and established researchers.

Vova and his team have to decide whether to disgrace their country and lose the game, or whether to win - and die.* *Match of Death* is based on actual events that took place during the Second World War.* James Riordan undertook extensive research, travelling to Kiev to interview the sons of those who took part in the match.

Fashioning James Bond Llewella Chapman, 2021-09-23 *Fashioning James Bond* is the first book to study the costumes and fashions of the James Bond movie franchise, from Sean Connery in 1962's *Dr No* to Daniel Craig in *Spectre* (2015). Llewella Chapman draws on original archival research, close analysis of the costumes and fashion brands featured in the Bond films, interviews with families of tailors and shirt-makers who assisted in creating the 'look' of James Bond, and considers marketing strategies for the films and tie-in merchandise that promoted the idea of an aspirational 'James Bond lifestyle'. Addressing each Bond film in turn, Chapman questions why costumes are an important tool for analysing and evaluating film, both in terms of the development of gender and identity in the James Bond film franchise in relation to character, and how it evokes the desire in audiences to become part of a specific lifestyle construct through the wearing of fashions as seen on screen. She researches the agency of the costume department, director, producer and actor in creating the look and characterisation of James Bond, the villains, the Bond girls and the henchmen who inhabit the world of 007. Alongside this, she analyses trends and their impact on the Bond films, how the different costume designers have individually and creatively approached costuming them, and how the costumes were designed and developed from novel to script and screen. In doing so, this book contributes to the emerging critical literature surrounding the combined areas of film, fashion, gender and James Bond.
