Systemic Crises of Global Climate Change Phoebe Godfrey,Denise Torres,2016-04-14 Sociological literature tends to view the social categories of race, class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity. This limited focus is clearly inadequate. Systemic Crises of Global Climate Change is an edited volume of 49 international, interdisciplinary contributions addressing global climate change (GCC) by intentionally engaging with the issues of race, gender, and class through an intersectional lens. The volume challenges and inspires readers to foster new theoretical and practical linkages and think beyond the traditional, and oftentimes reductionist, environmental science frame by examining issues within their turbulent political, cultural, and personal landscapes. Varied media and writing styles invite students and educators to reflexively engage different, yet complementary, approaches to GCC analysis and interpretation, mirroring the disparate voices and viewpoints within the field. The second volume, Emergent Possibilities for Sustainability will take a similar approach but will examine the possibilities for solutions, as in the quest for global sustainability. This book is a valuable resource for academics, researchers and both undergraduate and post-graduate students in the areas of Environmental Studies, Climate Change, Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC.

TORUS 2 - Toward an Open Resource Using Services Dominique Laffly,2020-04-09 This book, presented in three volumes, examines environmental disciplines in relation to major players in contemporary science: Big Data, artificial intelligence and cloud computing. Today, there is a real sense of urgency regarding the evolution of computer technology, the ever-increasing volume of data, threats to our climate and the sustainable development of our planet. As such, we need to reduce technology just as much as we need to bridge the global

socio-economic gap between the North and South; between universal free access to data (open data) and free software (open source). In this book, we pay particular attention to certain environmental subjects, in order to enrich our understanding of cloud computing. These subjects are: erosion; urban air pollution and atmospheric pollution in Southeast Asia; melting permafrost (causing the accelerated release of soil organic carbon in the atmosphere); alert systems of environmental hazards (such as forest fires, prospective modeling of socio-spatial practices and land use); and web fountains of geographical data. Finally, this book asks the question: in order to find a pattern in the data, how do we move from a traditional computing model-based world to pure mathematical research? After thorough examination of this topic, we conclude that this goal is both transdisciplinary and achievable.

The Language Situation in China Li Yuming,Li Wei,2019-07-22 China, with the world's largest population, numerous ethnic groups and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called language life in China. These reports cover language policy and planning invitatives at the national, provincial and local levels, new trends in language use in a variety of social domains, and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time, these reports are available in English for anyone interested in Chinese languge and linguistics, China's languge, education and social policies, as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers, and China watchers.

China's Media Go Global Daya Kishan Thussu,Hugo de Burgh,Anbin Shi,2017-11-27 As part of its 'going out' strategy, China is using the media to promote its views and vision to the wider world and to counter negative images in the US-dominated

international media. China's Media Go Global, the first edited collection on this subject, evaluates how the unprecedented expansion of Chinese media and communications is changing the global media landscape and the role of China within it. Each chapter examines a different dimension of Chinese media's globalization, from newspapers, radio, film and television, to social media and journalism. Topics include the rise of Chinese news networks, China Daily as an instrument of China's public diplomacy and the discussion around the growth of China's state media in Africa. Other chapters discuss entertainment television, financial media and the advertising market in China. Together, this collection of essays offers a comprehensive evaluation of complex debates concerning the impact of China on the international media landscape, and makes a distinctive addition to Chinese media studies, as well as to broader global media discourses. Beyond its primary readership among academics and students, China's Media Go Global is aimed at the growing constituency of general readers, for whom the role of the media in globalization is of wider interest.

   The Routledge Companion to Asian Family Business Ho-Don Yan,Fu-Lai Tony Yu,2021-04-27 This companion provides broad and in-depth insights into family business in Asia and how Asian family firms navigate in the digital economy. The first part of the book looks at key concepts of family business while the second part presents Asian family firms' cases from Japan, South Korea, China, Taiwan, Hong Kong, Thailand, Malaysia and other Asian economies. This comprehensive reference will help readers understand how family firms in Asia compete and survive in the world market especially in the digital age and why and how Asian economies can emerge as one of the most dynamic regions in the world.

   Talk Radio's America Brian Rosenwald,2019-08-13 The march to the Trump presidency began in 1988, when Rush Limbaugh went national. Brian Rosenwald charts the transformation of AM radio entertainers into political kingmakers.

By giving voice to the conservative base, they reshaped the Republican Party and fostered demand for a president who sounded as combative and hyperbolic as a talk show host.

Understanding Management in China Malcolm Warner,2013-11-12 China has become one of the fastest-growing economies ever seen in the world in recent times. In the last three decades, China has transformed itself from a command economy to a market one, albeit a nominally socialist one, and its management systems have been reformed accordingly. In the light of these changes, Malcolm Warner, one of the leading authorities on management in China, explores the past, present and future of Chinese management. The first part of the work examines the history of management practices in the 'Middle Kingdom', outlining the influence of traditional Chinese values, especially the Confucian inheritance, and the legacy of the imperial bureaucracy with its meritocratic examination system, as well as the role of industrialization and the influx of foreign-owned businesses in the late nineteenth century and the twentieth century. It next goes on to consider the current state of China's management, showing how a new breed of manager has evolved since the beginning of Deng Xiaoping's reforms in the late 1970s and 1980s. The resulting impact of this strategy which has continued into the 1990s and the 2000s, up to the present day, is then examined. The final part of the book concludes with reflections on how management in China is likely to develop in the near future, especially on how far it will converge with global practices or to what degree an indigenous form of management 'with Chinese characteristics' will prevail.

East Asia and Food (In)Security Shaun Breslin,Christopher W. Hughes,2017-10-02 This book presents a study of perceptions of food insecurity in East Asia, and explores how individual countries are developing strategies to deal with the situation. It also looks at how the perception of food insecurity has increasingly influenced the nature of international interactions, not just within

East Asia, but also in the region's relations with major external actors. Many of the challenges facing East Asia are generic food security issues that face people and governments across the world – for example, the implications of climate change and demographic changes on food supplies. This book places the East Asian context in the wider discussion of food (in)security in global politics. However, it also identifies potential regional 'differences' – for example, the significance of rice for the region, and the unavoidable impact of China as a major regional player. What the Chinese state, and Chinese companies, decide to do in response to concerns about food insecurity have an impact not just on the rest of the region, but on the rest of the world. Taking too much of a Sinocentric focus, however, ignores other actors in East Asia, or merely relegates discussion to how they respond to Chinese policies or external strategies. This book considers the region as a whole, both when it comes to thinking about food security challenges and responses within the region itself, and also in the outward projection of regional food insecurity on the rest of the world. This book was published as a special issue of The Pacific Review.

Global Perspectives on Youth Gang Behavior, Violence, and Weapons Use Harding, Simon,2016-02-02 Youth violence has become a concern as gangs become a popular option for urban children and teenagers and weapons use among young populations becomes more prevalent. Exploring the psychological motivations and foundations upon which such violence is developed and cultivated can assist in better understanding the modern dilemma of violence, weapons use, and gang behavior among children, teenagers, and young adults. Global Perspectives on Youth Gang Behavior, Violence, and Weapons Use reconsiders the traditional understandings of youth violence in various forms, such as gang activities, criminal behavior, and weapons use. Focusing on the psychosocial elements of violence among children, teenagers, and young adults, this timely publication is

ideally designed for use by policy makers and government executives, professionals, educators, and graduate-level students involved in psychology, criminology, social work, and criminal justice studies.

Beyond News Mitchell Stephens,2014-04-29 For a century and a half, journalists made a good business out of selling the latest news or selling ads next to that news. Now that news pours out of the Internet and our mobile devices—fast, abundant, and mostly free—that era is ending. Our best journalists, Mitchell Stephens argues, instead must offer original, challenging perspectives—not just slightly more thorough accounts of widely reported events. His book proposes a new standard: wisdom journalism, an amalgam of the more rarified forms of reporting—exclusive, enterprising, investigative—and informed, insightful, interpretive, explanatory, even opinionated takes on current events. This book features an original, sometimes critical examination of contemporary journalism, both on- and offline, and it finds inspiration for a more ambitious and effective understanding of journalism in examples from twenty-first-century articles and blogs, as well as in a selection of outstanding twentieth-century journalism and Benjamin Franklin's eighteenth-century writings. Most attempts to deal with journalism's current crisis emphasize technology. Stephens emphasizes mindsets and the need to rethink what journalism has been and might become.

Computational Solutions for Knowledge, Art, and Entertainment: Information Exchange Beyond Text Ursyn, Anna,2013-10-31 As interactive application software such as apps, installations, and multimedia presentations have become pervasive in everyday life, more and more computer scientists, engineers, and technology experts acknowledge the influence that exists beyond visual explanations. Computational Solutions for Knowledge, Art, and Entertainment: Information Exchange Beyond Text focuses on the methods of depicting knowledge-based concepts in order to assert power beyond a visual explanation of

scientific and computational notions. This book combines formal descriptions with graphical presentations and encourages readers to interact by creating visual solutions for science-related concepts and presenting data. This reference is essential for researchers, computer scientists, and academics focusing on the integration of science, technology, computing, art, and mathematics for visual problem solving.

Traditional Chinese Medicine—Professionalization and Integration in Hong Kong Kara Chan & Dong Dong,2019-04-01 Chinese medicine has a rich history that has only been made more complex by its integration with "Western" biomedicine. Legitimization of Chinese medicine in biomedicine-dominated health systems, such as that in Hong Kong, has posed significant issues. This anthology of articles explores relevant social issues related to various Chinese medicine treatments, including acupuncture and medicinal oils, as well as insight into practitioner licensing and public perception. Each chapter tackles a topic related to the complicated process of legitimizing knowledge and power within a specific social and historical context. Written by professors and researchers with extensive knowledge of Chinese medicine, government regulation, and sociology, this collection provides an overview of the challenges and current social context of Chinese medicine that affect students and practitioners of Chinese medicine, health and para-health biomedical professionals, and patients alike. Traditional Chinese Medicine: Professionalization and Integration in Hong Kong is the first book in the Mediated Health Series, which focuses on the effects of media, lifestyle, doctor-patient communication, and the economy on health and aims to help inform medical decisions and enhance the wellbeing of individuals. This well-researched book provides deep insight into the landscape of traditional Chinese Medicine (CM), focusing on ethnic and esoteric interpretations of "Chinese" and "Western" medicine. The discussion of legitimation and perception, acupuncture, and hybridization and integration of CM

provides a unique contribution into the domain. CM academics, enthusiasts, and practitioners will certainly find this book insightful, compelling, and intriguing. – Prof Ian Phau, School of Marketing, Curtin Business School

China's Naval Power Yves-Heng Lim,2016-05-23 The rapid modernization of the Chinese Navy is a well-documented reality of the post-Cold War world. In two decades, the People's Liberation Army Navy has evolved from a backward force composed of obsolete platforms into a reasonably modern fleet whose growth is significantly shaking the naval balance in East Asia. The rationale behind China's contemporary rise at sea remains, however, difficult to grasp and few people have tried to see how the current structure of the international system has shaped Chinese choices. This book makes sense of Chinese priorities in its naval modernization in a 'robust' offensive realist framework. Drawing on Barry Posen's works on sources of military doctrine, it argues that the orientation of Beijing's choices concerning its naval forces can essentially be explained by China's position as a potential regional hegemon. Yves-Heng Lim highlights how a rising state develops naval power to fulfil its security objectives, a theoretical perspective that goes farther than the sole Chinese case.

Political Changes in Taiwan Under Ma Ying-jeou Jean-Pierre Cabestan,Jacques deLisle,2014-07-17 In 2008 Ma Ying-jeou was elected President of Taiwan, and the Kuomintang (KMT) returned to power after eight years of rule by the Democratic Progressive Party (DPP). Since taking power, the KMT has faced serious difficulties, as economic growth has been sluggish, society has been polarised over issues of identity and policy, and rapprochement between Taipei and Beijing has met with suspicion or reservation among large segments of Taiwanese society. Indeed, while improved relations with the United States have bolstered Taiwan's security, warming cross-Strait relations have in turn made Taiwan more dependent upon and vulnerable to an increasingly powerful China. This book provides a comprehensive

analysis of the return of the Kuomintang (KMT) to power, and examines the significant domestic political, economic, social and international challenges and changes that have characterized Taiwan since 2008. It identifies the major domestic, cross-Strait and foreign policy trends, and addresses key issues such as elections and Taiwan's party system; the role of the presidency and legislature; economic development; social movements; identity politics; developments in cross-Strait relations; Taiwan's security environment and national defence policies; relations with the US and Japan. In turn, the contributors look towards the final years of Ma's presidency and beyond, and the structural realities – both domestic and external – that will shape Taiwan's future. Political Changes in Taiwan Under Ma Ying-jeou will be of great interest to students and scholars of Taiwan studies, comparative politics, international relations, and economics. It will also appeal to policy makers working in the field.

The Subtle Logics of Knowledge Conflicts in China's Foreign Enterprises Constanze Wang,2016-05-04 This book investigates knowledge interactions in China's foreign enterprises. It reveals that cultural differences strongly account for knowledge-related obstacles, namely knowledge leakage and insufficient knowledge sharing. Contrary to conventional wisdom, however, widespread cultural arguments such as Confucianism or collectivism hardly apply to Chinese employees' handling of knowledge. In fact, more subtle cultural logics are relevant in daily work, which are connected to the perceived stability of the enterprise itself. But these usually go unnoticed. Thus, rather than being distracted by a national "Chinese culture", managers can take real action to solve knowledge conflicts in their particular enterprise.

Strategies and Tools for a Sustainable Rural Rio de Janeiro Udo Nehren,Sabine Schlüter,Claudia Raedig,Dietmar Sattler,Helga Hissa,2018-08-16 This book is a compilation of recent developments in land, ecosystem, and water management in the

Brazilian state of Rio de Janeiro. The state is located in the biodiversity hotspot of the Atlantic Forest (Mata Atlântica), a biome characterized by high biological diversity and endemism. At the same time the state of Rio de Janeiro emerged to one of the economic hubs in Latin America. This development process has been accompanied by population growth, industrialization, urbanization, as well as consumption and degradation of land and water resources. In the past years many efforts have been made to stop or at least slow down these degradation processes and restore degraded environments with the overall goal to bring together sustainable management of natural resources, nature conservation, and economic development. An overview is provided of the different strategies and tools that have been developed in the fields of agriculture, ecosystem management and biodiversity, integrated water management, land restoration, disaster risk reduction and climate change adaptation, as well as environmental governance and economic instruments. This book covers a wide spectrum from applied research to science-policy interfaces, planning concepts, and technical tools and has a model character for other rural areas in Latin America. Target groups are scientists, practitioners, policy makers and graduate students in the field of environmental management. The different chapters are written by researchers and practitioners of the German-Brazilian project INTECRAL (Integrated Eco Technologies and Services for a Sustainable Rural Rio de Janeiro), the rural development program Rio Rural under the state secretary for agriculture and animal husbandry, as well as invited scientists from Brazilian universities and research institutes. It bridges existing gaps between science, policies, and practice in rural development.

   The Routledge Handbook on Crime and International Migration Sharon Pickering,Julie Ham,2017-07-14 The Routledge Handbook on Crime and International Migration is concerned with the various relationships between migration, crime and victimization that have informed a wide criminological scholarship often driven by some of

the original lines of inquiry of the Chicago School. Historically, migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity, often in highly problematic ways. However, in the contemporary period this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants. The Routledge Handbook on Crime and International Migration is also concerned with the theoretical, empirical and policy knots found in the relationship between regular and irregular migration, offending and victimization, the processes and impact of criminalization, and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders. The Handbook is focused on the migratory 'fault lines' between the Global North and Global South, which have produced new or accelerated sites of state control, constructed irregular migration as a crime and security problem, and mobilized ideological and coercive powers usually reserved for criminal or military threats. Offering a strong international focus and comprehensive coverage of a wide range of border, criminal justice and migration-related issues, this book is an important contribution to criminology and migration studies and will be essential reading for academics, students and practitioners interested in this field.

Gambling Dynamism Victor Zheng,Po-san Wan,2013-11-29 Four years after the actual implementation of its casino deregulation policy, Macao has surpassed Las Vegas as the world's

top gambling destination in terms of annual turnover. Also, various recent surveys have put Macao at the very top of the list in terms of per capita GDP, as its economy grew shortly after the resumption of Chinese sovereignty. How could a tiny city without any natural resources on the southern coast of China have managed to achieve such a miraculous level of development? This book presents an unparalleled study of Macao's economic dynamism and its gambling industry not only by merging historical and current developments, but also by presenting solid subjective and objective indicators and evidence. It offers an indispensable resource for students, researchers, and general readers looking to understand Macao's gambling miracle.
