I created an online dating profile to meet new people and to jump-start my dating life. I moved to a new city after college and prior to posting online, I struggled to find men that I was interested in dating. As is the case for many young professionals, there's scant opportunity to meet the right person unless you have a vast social network, so my profile was meant to expand my search wider and include people I wouldn't meet in my everyday travels between work at a very small company, the gym, and my grad school classes. Meeting Your Match Online Tamsen Butler, 2009 Recent studies show that more than 20 million people will visit at least one online dating service a month. Internet dating has several advantages, among them the ability to discover everything about a potential partner before ever meeting them. You can learn their age, religious affiliations, education, expectations, interests, hobbies, and so on. Internet dating allows you to chat online and get to know someone before meeting them. There is also the ability to meet people on a varied schedule you do not have to meet them face-to-face right away. Other advantages include protection of your personal identity, the exchange of photos, the ability to be yourself, less cost, and the ability to search by sexual or ethnic preference, all of which will increase the chances of finding that special someone. Aside from the many advantages, online dating has disadvantages as well. For example, you could be starting an online relationship with someone who, in actuality, does not look like they do

in their photos or their personality is not as they described, it might have to be a long distance relationship, or they have a hidden criminal agenda. This is why you need the assistance of this groundbreaking new book that covers it all, allowing you to find the right partner and make your online dates safe and secure. The book features many available online dating services, such as PerfectMatch, which employs a scientific method to locate matches. eHarmony has a compatibility system that only pairs you with compatible singles. Yahoo Personals helps you choose from thousands of members to find singles in your area. True.com is likely the only dating site that checks new members for criminal activity and marriage history. Match.com guarantees you will meet someone special within six months or they will extend your membership by six months at no cost to you. Also detailed are AmericanSingles.com, FriendFinder.com, Metrodate.com, Lavalife.com, Date.com, JDate.com, Great Expectations at GE-Dating.com and Chemistry.com. Also included are true stories from couples and singles who have been through the online dating process and have found it either worked or didn't work for them. Social networking and online dating is currently the hot trend, and many people are turning to online dating sites to find friends, romance, love, and connections. Many people are comfortable with dating online, since some of the people might be shy, and have a fear of face to face rejection. This is one of the reasons why online dating has become so popular these days. With the rise of internet and changes in contemporary lifestyles, online dating has become very popular among daters of all ages. Due to busy life schedules, people have moved to chat rooms and professional dating services to find their life partner. The web dating industry has been steadily growing, even during the global recession and economic slowdown.
