This Generation Leads: The Latest Leadership Ideas from South Africa Mike Teke,Muzi

Kuzwayo,2022-03-01 “This book was born out of an idea that I had during the period in which I spent time with several young people who had approached me to assist them in different ways, including personal development, career advancement and growth, as well as growing their businesses and entrepreneurial acumen and skills. I took the challenge but felt that more could be achieved, hence this book. The chapters in this book are written by each one of these young people. They chose the topics, guided by me, and the plan was to simply convey a message from each one of them about leadership. They did not do this for fame or to sell this book to make money, but to share their ideas. The topics covered in this book will appeal to different readers, and some readers might find more lessons in one chapter or in more chapters than one. I urge each one of you who read this book to pick one or a few lessons and share it with those you wish to make a difference to. Mentorship of young people is critical, but this does not mean that the mentors will provide handouts in the form of money. People who wish to grow, are not interested in money, they are interested in a piece of your generous heart.”

100+ Ideas to Inspire Smart Spaces and Creative Places Elisabeth Doucett,2020-06-02 The ideas in this book are all about helping your library building become a more exciting, interesting, experiential space where people are engaged and want to spend time. More time spent in the library increases the library's value and relevance to its users—and the more intriguing the space is, the more it helps draw in new patrons. Taking inspiration and examples from companies and non-profits outside the library world, this book's engaging ideas include using “biophilic design” to bring nature into your library through gardens, plants, and greenery; transforming static spaces into “Instagram bait”; putting art installations in bathrooms; turning underutilized spaces like hallways and mezzanines into welcoming “chill” zones; creating pop-ups and other flexible spaces that change regularly; developing co-working spaces in libraries; preserving and promoting silent spaces; and creating “parklets” from parking spaces. Complete with lists of additional resources for discovering even more ideas, this book will help all kinds of libraries create innovative spaces that will delight their communities.

Decolonising Journalism Education in South Africa Ms Zubeida Jaffer ,Prof. Ylva Rodny-Gumede ,Dr Mvuso Ponono ,Prof. Colin Chasi ,2021-12-20 With 342 years of colonialism and apartheid in South Africa, a book of this calibre is essential to contribute to scholarly debates on the decolonisation of the media. After the democratic dispensation in 1994, there was a narrow pursuit of transformation and media freedom while neglecting decolonisation, patriarchal tendencies and the plight of black women journalists who are often vilified while discharging their duties. It was two decades after

democracy that the #RhodesMustFall movement which later evolved into #FeesMustFall movement reignited debates on decoloniality in the academia. Moreover, the book is published during the second wave of #FeesMustFall student protests and the demand for decolonised free education is inevitable as no permanent solution to student funding crisis was crafted. In the same vein, the book advocates for decolonised pedagogy in universities, including journalism curriculum. That ownership of the media is still skewed towards white and with only few black companies gradually joining the industry also brings into doubt media freedom, editorial independence, ethics and integrity among media practitioners. Therefore, the decoloniality movement seeks to confront these structural challenges head-on via dialogue to ensure the integrity of the journalism profession. Decolonising journalism in South Africa is published at a time in which journalism serves a watchdog and a critique of a democratic government and needs to follow a bottom-up social justice approach and become a voice to the voiceless. Therefore, this book seeks to revolutionise the media in a way that even the language of reporting of certain issues needs to be changed to a balanced kind of reporting characterised by principles of no fear or favour.

AIDS, South Africa, and the Politics of Knowledge Professor Jeremy R Youde, 2013-03-28 Through an in-depth examination of the interactions between the South African government and the international AIDS control regime, Jeremy Youde examines not only the emergence of an epistemic community but also the development of a counter-epistemic community offering fundamentally different understandings of AIDS and radically different policy prescriptions. In addition, individuals have become influential in the crafting of the South African government's AIDS policies, despite universal condemnation from the international scientific community. This study highlights the relevance and importance of Africa to international affairs. The actions of African states call into question many of our basic assumptions and challenge us to refine our analytical framework. It is ideally suited to scholars interested in African studies, international organizations, global governance and infectious diseases.
