Jim Dawson

Did Somebody Step on a Duck? Jim Dawson, 2010-05-04 This impolite, aromatic, and incredibly erudite flatulence compendium will astound you with: • The recent discovery of the world's oldest joke, a proverb from the Old Babylonian period, that turned out to be—that's right, folks—a fart joke. • A new reading of Emily Dickinson's poetry that "reveals" the true meaning behind "They Have a Little Odor." • A harrowing account of Apollo astronauts getting inner-space gas from hydrogen bubbles in their drinking water on their way to the moon. • The other Tiger Woods scandal—this one involving a mysterious cheek-squeak recorded while Tiger sized up an approach shot at the 2009 Buick Open. • A scientist who built the world's biggest whoopee cushion and lived to tell about it and many more wacky but true tales from the fart historian who brought you the best-selling *Who Cut the Cheese?* and its combustible sequel, *Blame It on the Dog*. In this incomparable collection you'll experience firsthand the Jungian implications of farting, the environmental import of "flatulence cards" in the carbon-offset market, and the brutally honest social commentary of a man whose office chair broadcasts his farts on Twitter. After reading this book you'll proudly proclaim, "I fart, therefore I am."

Inside the White Cube Brian O'Doherty, 1999 These essays explicitly confront a particular crisis in postwar art, seeking to examine the assumptions on which the modern commercial and museum gallery was based.

The Value of Culture Arjo Klammer, 1996 Culture manifests itself in everything human, including the ordinary business of everyday life. Culture and art have their own value, but economic values are also constrained. Art sponsorships and subsidies suggest a value that exceeds market price. So what is the real value of culture? Unlike the usual focus on formal problems, which has 'de-cultured' and 'de-moralized' the practice of economics, this book brings together economists, philosophers, historians, political scientists and artists to try to sort out the value of culture. This is a book not only for economists and social scientists, but also for anybody actively involved in the world of the arts and culture.

Reliability and Maintainability (RAM) Training Vincent R. Lalli, 2000 The theme of this manual is failure physics - the study of how products, hardware, software, and systems fail and what can be done about it. The intent is to impart useful information, to extend the limits of production capability, and to assist in achieving low-cost reliable products. In a broader sense the manual should do more. It should underscore the urgent need for mature attitudes toward reliability. Five of the chapters were originally presented as a classroom course to over 1000 Martin Marietta engineers and technicians. Another four chapters and three appendixes have been added. We begin with a view of reliability from the years 1940 to 2000. Chapter 2 starts the training material with a review of

mathematics and a description of what elements contribute to product failures. The remaining chapters elucidate basic reliability theory and the disciplines that allow us to control and eliminate failures.

What is Art? Joseph Beuys, Volker Harlan, 2012-12-10 Joseph Beuys's work continues to influence and inspire practitioners and thinkers all over the world, in areas from organizational learning, direct democracy and new money forms to new art pedagogies and ecological art practices. Here, in dialogue with Volker Harlan - a close colleague, whose own work also revolves around understandings of substance and sacrament that are central to Beuys - the deeper motivations and insights underlying 'social sculpture', Beuys's expanded conception of art, are illuminated. His profound reflections, complemented with insightful essays by Volker Harlan, give a sense of the interconnectedness between all life forms, and the foundations of a path towards an

ecologically sustainable future. This volume features over 40 b/w illustrations.

Relive Sean Cubitt, Paul Thomas, 2013-11-08 Leading historians of the media arts define a new materialist media art history, discussing temporality, geography, ephemerality, and the future. In *Relive*, leading historians of the media arts grapple with this dilemma: how can we speak of “new media” and at the same time write the histories of these arts? These scholars and practitioners redefine the nature of the field, focusing on the materials of history—the materials through which the past is mediated. Drawing on the tools of media archaeology and the history and philosophy of media, they propose a new materialist media art history. The contributors consider the idea of history and the artwork's moment in time; the intersection of geography and history in regional practice, illustrated by examples from eastern Europe, Australia, and New Zealand; the contradictory scales of evolution, life cycles, and bodily rhythms in bio art; and the history of the future—how the future has been imagined, planned for, and established as a vector throughout the history of new media arts. These essays, written from widely diverse critical perspectives, capture a dynamic field at a moment of productive ferment. Contributors Susan Ballard, Brogan Bunt, Andrés Burbano, Jon Cates, John Conomos, Martin Constable, Sean Cubitt, Francesca Franco, Darko Fritz, Zhang Ga, Monika Gorska-Olesinska, Ross Harley, Jens Hauser, Stephen Jones, Douglas Kahn, Ryszard W. Kluszczynski, Caroline Seck Langill, Leon Marvell, Rudy Rucker, Edward A. Shanken, Stelarc, Adele Tan, Paul Thomas, Darren Tofts, Joanna Walewska

Blood in the Machine Brian Merchant, 2023-09-05 The true story of what happened the first time machines came for human jobs, when an underground network of 19th century rebels, the Luddites, took up arms against the industrialists that were automating their work--and how it explains the power, threat, and toll of big tech today. The most pressing story in modern tech begins not in Silicon Valley, Seattle, or even Shenzhen. It begins two hundred years ago in rural England, when working men and women rose up en masse rather than starve at the hands of the factory owners who were using machines to erase and degrade their livelihoods. They organized guerilla raids, smashed those machines, and embarked on full-scale assaults against the wealthy machine owners. They won the support of Lord Byron, inspired Mary Shelley, and enraged the Prince Regent and his bloodthirsty government. Before it was over, much blood would be spilled--of rich and poor, of the invisible and of the powerful. This all-but-forgotten and deeply misunderstood class struggle nearly brought 19th century England to its knees. We live now in the second machine age, when similar fears that big tech is dominating our lives and machines replacing human labor run high. We worry that technology imperils millions of jobs, robots are ousting workers from factories, and artificial intelligence will soon remove drivers from cars. How will this all reshape our economy and the way we live? And what can we do about it? The answers lie in the story of our first machine age, when mechanization first came to British factories at the beginning of the industrial revolution. Intertwined with a lucid examination of our current age, the story of the Luddites, the working-class insurgency that took up arms against automation (at a time when it was punishable by death to break a machine), *Blood in the Machine* reaches through time and space to tell a story about how technology changed our world--and how it's already changing our future.
