A Flag Worth Dying For Tim Marshall, 2017-07-04 First published in Great Britain in 2016 by Elliott and Thompson Limited as: Worth dying for: the power and politics of flags.

German Prisoners of the Great War Anne Buckley, 2021-04-28 German POWs held in England during WWI record their experience in this volume of detailed accounts, diary entries, drawings, and more. In Munich in 1920, just after the end of the First World War, German prisoners of war in England published a book they had written and smuggled back home. Through vivid text and illustrations, they describe their experience of life in a camp at Skipton in Yorkshire. Their work, now translated into English for the first time, gives us a unique insight into their feelings about the war, their captors, and their longing to go home. In their own words they record prison camp conditions, daily routines, their relationship with the prison authorities, their activities and entertainment, and their thoughts of their homeland. The challenges and privations they faced are part of their story, as is the community they created within the confines of the camp. The whole gamut of their existence is portrayed here, in particular through their drawings and cartoons which are reproduced alongside the translation. *German Prisoners of the Great War* offers an inside view of a hitherto neglected aspect of the wartime experience.

Standing splendidly in the intersection of two genres - business memoir and gritty personal tell-all - *Finding the Exit* is a courageous tale of a woman who, against harrowing odds that began in childhood, successfully started and sold a medtech company to a Fortune 100 in less than five years. Lea Ellermeier recounts her experiences with candor and razor-sharp intrepidity - from the unexpected death of her entrepreneur father, dropping out of high school, alcohol addiction as a teenager to a failed marriage, single parenthood, to sexism in the business world. *Finding the Exit* delivers empowering lessons for working women of all backgrounds, ages, and walks of life

The Ark Patrick S. Tomlinson, 2015-11-03 Humankind has escaped a dying Earth and set out to find a new home among the stars aboard an immense generation ship affectionately name the Ark. Bryan Benson is the Ark's greatest living sports hero, enjoying retirement working as a detective in Avalon, his home module. The hours are good, the work is easy, and the perks can't be beat. But when a crew member goes missing, Bryan is thrust into the center of an ever-expanding web of deception, secrets, and violence that overturns everything he knows about living on the Ark and threatens everyone aboard. As the last remnants of humanity hurtle towards their salvation, Bryan finds himself in a desperate race to unravel the conspiracy before a madman turns mankind's home into its tomb.

When I Get Older K'NAAN, Sol Guy, 2012-09-13 "Wavin'Flag" has become an international anthem. Its powerful words of hope have crossed generations and borders, and have made K'NAAN an international star. In his first book for children, *When I Get Older*, Somali-Canadian poet, rapper, singer, and songwriter K'NAAN tells his own story. Born in Somalia, he grew up in Mogadishu. His grandfather was a renowned poet who passed on his love of words to his grandson. When the Somali Civil War began in 1991, K'NAAN was just thirteen. His mother made the difficult

decision to move her family so that they could grow up in safety. First in New York and then in Toronto, K'NAAN faced many challenges. Like so many other immigrants, he had to make a place for himself in a world of alien customs, clothes, and language. His road was a hard one: he lost many friends to violence. But K'NAAN's love of music, and his enormous talent, became a way for him to connect with his past, with his classmates, and eventually, to millions of people around the world. Not only does K'NAAN tell a story that will inspire and encourage young readers, but he provides a brief history of the Somalian conflict. The lyrics of "Wavin' Flag" are also included. Born Keinan Abdi Warsame, K'NAAN first came to prominence when he performed a spoken word piece before the United Nations High Commissioner for Refugees in 1999. A member of the audience, the singer Youssou N'Dour, was so impressed that he asked K'NAAN to take part in an album and to tour with him. Since then, K'NAAN has performed in more than 86 countries and has received many honors, including three Juno Awards and the BBC Radio 3 Award for World Music. During the Vancouver Olympics, he worked with other Canadian musicians and artists under the name Young Artists for Haiti to produce a charity version of "Wavin' Flag." The song was adapted again to become the FIFA World Cup theme song. There are now twenty-two versions of the song, which hit #1 in nineteen countries.

The Virtualization Cookbook for IBM z Systems Volume 3: SUSE Linux Enterprise Server 12 Lydia Parziale,Berthold Gunreben,Filipe Miranda,Paul W Novak,Ken Werner,IBM Redbooks,2016-05-06 This IBM® Redbooks® publication is Volume 3 of a series of three books called The Virtualization Cookbook for IBM z Systems. The other two volumes are called: The Virtualization Cookbook for IBM z Systems Volume 1: IBM z/VM 6.3, SG24-8147 The Virtualization Cookbook for IBM z Systems Volume 2: Red Hat Enterprise Linux 7.1 Servers, SG24-8303 It is suggested that you start with Volume 1 of this series, because IBM z/VM® is the base layer when installing Linux on IBM z Systems™. Volumes 2 and 3 describe how to roll your own Linux virtual servers on z Systems hardware under z/VM. The cookbook format continues with installing and customizing Linux. Volume 3 focuses on SUSE Linux Enterprise Server 12. It describes how to install and configure SUSE Linux Enterprise Server 12 onto the Linux administration system, which does the cloning and other tasks. It also explains how to use AutoYaST2, which enables you to automatically install Linux using a configuration file, and explains how to create and use appliances and bootable images from configuration files. Interactions between Group Theory, Symmetry and Cryptology María Isabel González Vasco,2020-04-22 Cryptography lies at the heart of most technologies deployed today for secure communications. At the same time, mathematics lies at the heart of cryptography, as cryptographic constructions are based on algebraic scenarios ruled by group or number theoretical laws. Understanding the involved algebraic structures is, thus, essential to design robust cryptographic schemes. This Special Issue is concerned with the interplay between group theory, symmetry and cryptography. The book highlights four exciting areas of research in which these fields intertwine: post-quantum cryptography, coding theory, computational group theory and symmetric cryptography. The articles presented demonstrate the relevance of rigorously analyzing the computational hardness of the mathematical problems used as

a base for cryptographic constructions. For instance, decoding problems related to algebraic codes and rewriting problems in non-abelian groups are explored with cryptographic applications in mind. New results on the algebraic properties or symmetric cryptographic tools are also presented, moving ahead in the understanding of their security properties. In addition, post-quantum constructions for digital signatures and key exchange are explored in this Special Issue, exemplifying how (and how not) group theory may be used for developing robust cryptographic tools to withstand quantum attacks.

Chemical Evolution of Galaxies Francesca Matteucci,2012-01-05 The term “chemical evolution of galaxies” refers to the evolution of abundances of chemical species in galaxies, which is due to nuclear processes occurring in stars and to gas flows into and out of galaxies. This book deals with the chemical evolution of galaxies of all morphological types (ellipticals, spirals and irregulars) and stresses the importance of the star formation histories in determining the properties of stellar populations in different galaxies. The topic is approached in a didactical and logical manner via galaxy evolution models which are compared with observational results obtained in the last two decades: The reader is given an introduction to the concept of chemical abundances and learns about the main stellar populations in our Galaxy as well as about the classification of galaxy types and their main observables. In the core of the book, the construction and solution of chemical evolution models are discussed in detail, followed by descriptions and interpretations of observations of the chemical evolution of the Milky Way, spheroidal galaxies, irregular galaxies and of cosmic chemical evolution. The aim of this book is to

provide an introduction to students as well as to amend our present ideas in research; the book also summarizes the efforts made by authors in the past several years in order to further future research in the field.
