Representation Theory Edwin Williams,2002-12-20 In this theoretical monograph, Edwin Williams demonstrates that when syntax is economical, it economizes on shape distortion rather than on distance. According to Williams, this new notion of economy calls for a new architecture for the grammatical system—in fact, for a new notion of derivation. The new architecture offers a style of clausal embedding—the Level Embedding Scheme—that predictively ties together the locality, reconstructive behavior, and target type of any syntactic process in a way that is unique to the model. Williams calls his theory Representation Theory to put the notion of economy at the forefront. Syntax, in this theory, is a series of representations of one sublanguage in another.

The Chinese Communist Party in Reform Kjeld Erik Brødsgaard, Zheng Yongnian, 2006-04-18 Contrary to the expectations of many people, China's recent economic growth has not led to the collapse of the Chinese Communist Party. In fact, the Party has recently carried out a peaceful and orderly transition to the so-called fourth generation of leadership, has revitalised itself, and created a new, younger and better trained cadre corps. Despite this successful transformation, there continue to be many problems that the Party will need to overcome if it is to remain in power, including pressures for democratization in both urban and rural areas, widespread corruption, the emergence of new social groups, and increasing dissatisfaction among workers who seem to be losing out in the present transition process. The Chinese Communist Party in Reform explores the current state of the Chinese Communist Party and the many challenges that it faces. It considers the dynamics of development in China, the Party organization, recruitment and management, and

the Party's role in society more widely. It concludes by examining the prospects for the future of the Party, including whether it will continue to be able to accommodate socio-economic changes within China and pressures from abroad, and the likely nature of its evolution. Overall, this book provides a comprehensive assessment of the internal dynamics of the Chinese Communist Party and its role in Chinese society.

Mark 1-8:26, Volume 34A Robert A. Guelich, 2018-01-09 The Word Biblical Commentary delivers the best in biblical scholarship, from the leading scholars of our day who share a commitment to Scripture as divine revelation. This series emphasizes a thorough analysis of textual, linguistic, structural, and theological evidence. The result is judicious and balanced insight into the meanings of the text in the framework of biblical theology. These widely acclaimed commentaries serve as exceptional resources for the

professional theologian and instructor, the seminary or university student, the working minister, and everyone concerned with building theological understanding from a solid base of biblical scholarship. Overview of Commentary Organization Introduction—covers issues pertaining to the whole book, including context, date, authorship, composition, interpretive issues, purpose, and theology. Each section of the commentary includes: Pericope Bibliography—a helpful resource containing the most important works that pertain to each particular pericope. Translation—the author’s own translation of the biblical text, reflecting the end result of exegesis and attending to Hebrew and Greek idiomatic usage of words, phrases, and tenses, yet in reasonably good English. Notes—the author’s notes to the translation that address any textual variants, grammatical forms, syntactical constructions, basic meanings of words, and problems of translation. Form/Structure/Setting—a discussion of redaction, genre, sources, and tradition as they concern the origin of the pericope, its canonical form, and its relation to the biblical and extra-biblical contexts in order to illuminate the structure and character of the pericope. Rhetorical or compositional features important to understanding the passage are also introduced here. Comment—verse-by-verse interpretation of the text and dialogue with other interpreters, engaging with current opinion and scholarly research. Explanation—brings together all the results of the discussion in previous sections to expose the meaning and intention of the text at several

levels: (1) within the context of the book itself; (2) its meaning in the OT or NT; (3) its place in the entire canon; (4) theological relevance to broader OT or NT issues. General Bibliography—occurring at the end of each volume, this extensive bibliography contains all sources used anywhere in the commentary.
