Chinese Economic Development Chris Bramall, 2008-10-08 This book outlines and analyzes the economic development of China between 1949 and 2007. Rather than being narrowly economic, the book addresses many of the broader aspects of development, including literacy, morality, demographics and the environment. The distinctive features of this book are its sweep and that it does not shy away from controversial issues. For example, there is no question that aspects of Maoism were disastrous but Bramall argues that there was another side to the whole programme. More recently, the current system of government has presided over three decades of very rapid economic growth. However, the author shows that this growth has come at a price. Bramall makes it clear that unless radical change takes place, Chinese growth will not be sustainable. This large, comprehensive text is relevant to all those studying the economic history of China as well as its contemporary economy. It is also useful more generally for students and researchers in the fields of international and development economics.

A Real Guide to Generating Multiple Streams of Income Raj Singh, 2014-10-20 How important is having multiple streams of Income? Multiple active income streams will help to ensure that your earnings are somewhat stable. They will help to close gaps between earnings and spending. However, minimizing spending is a better way in shrinking those gaps. Make a serious commitment to spend less than you earn. Focus on paying down your debt with the difference in your earning and your spending once you have built a small emergency fund. Next figure out what you are good at doing. When you know that, figure out a way to make some additional cash from what you are good at

doing. There is usually a market of some sort for most our traits and skills. Once you know what you are good at and know of a way to make some money, commit some time. Turn off the television for a couple of hours each day. Use that time to make some money with that new found time. Chances are good that you can make some cash, though maybe not much in the beginning, with your time. This time will become your first alternative income stream. Then use the cash from that first income stream to something financially positive. Do not spend the money right away. Instead pay down some more debt or invest it into another income stream. Our real goal should be financial independence. If we are not completely dependent upon one sole income stream - like a primary job - then we have some independence to have and to make more choices in our lives that will make our lives more enjoyable, rewarding, and meaningful.

Successful Family Life on the Moderate Income Mary Hinman Abel, 2015-06-13 Excerpt from Successful Family Life on the Moderate Income: Its Foundation in a Fair Start; The Man's Earnings; The Woman's Contribution; The Cooperation of the Community The following discussion is addressed to all those who are inclined to give thoughtful attention to the present-day problems of the family, an institution which is imperfect as man in his development is imperfect, but which reflects every advance in social standards, and is doubtless destined to be modified very profoundly by further social evolution. Such progress will turn in part upon the results of scientific inquiry. Among those to whom the book may be of interest are professional students of the social and economic aspects of the family; home economics students in schools and colleges, men and women who are trying to solve the problems of their own homes, and groups of club women and others who are taking up part-time studies of the home. While it has seemed desirable to draw illustrations from one group, that which is living on the moderate income and made up of adults and dependent children, yet it is hoped that principles are evolved which are applicable to many other types and conditions. The whole object of the study is to discover what are the factors of success in its best sense. For those who are debarred from creative self-expression in the recognized forms of art, there is yet the Art of Living, which includes self-development, a use of all personal resources and an adjustment of our relations to those near us and to the community. For most people this art of living, especially as practised in the family group, must remain the greatest of all arts. The author's thanks are due to Dr. Edward T. Devine for the use of five of the family monographs gathered by his classes in Social Economics in Columbia University, the facts and figures of which have been arranged on a uniform plan, to make comparison easy. Grateful acknowledgment is made to many friends whose contribution of data has broadened the fact basis of the book.
