New Trends in Macromolecular and Supramolecular Chemistry for Biological Applications Marc J. M. Abadie, Mariana Pinteala, Alexandru Rotaru, 2021 This contributed volume applies the insights of supramolecular chemistry to biomedical applications such as ions/water transport through nano-scale channels, gene therapy, tissue engineering and drug delivery, to cite some of the major investigations. The challenge is to understand the mechanisms of transport through tissues particularly in the therapeutic treatment of a disease where the active drug must be delivered directly to diseased cells without

affecting healthy cells. As a result, smaller quantities of active substances can be used to treat the disease. Another interest concerns new ways to administer gene therapy. If genes are often delivered to their target cells by adapted viruses, the supramolecular non-viral vectors using dynamic nano-frameworks and nano-structures are presented. In addition, it is important to reconstruct damaged tissues by mimicking natural processes in cells and polymers, such as tissue engineering and self-healing. Different options are here discussed: e.g. hydrogels based on chitosan, a carbohydrate polymer, are proving especially promising for tissue engineering and drug delivery. For controlled delivery of drugs or other biologically active compounds, hydrogels sensitive to the most important stimuli in the human body, such as temperature, pH, ionic strength, glucose and biomolecules released by the organism in pathological conditions have been developed. Finally, to assist and validate the experimental studies, computer modelling and simulations of large-sized molecular structures and systems using different molecular dynamics and quantum mechanical techniques are developed based on the experimental and chemistry synthesis. This book is of great interest for graduate students, researchers and health professionals interested in acquiring a better understanding of the mechanisms of medical treatments. In addition, it provides numerous tools to develop better therapies for human diseases.

American Hex Justin March, 2013-08-21 Justin March leads a boring life until he embarks on a quest to find out the identity of the elusive computer hacker known as the Judge. In the near future, Techclon, an American mega corporation, develops cheap wireless nodes making the Internet fast, access universal, and bandwidth abundant. Techclon convinces the government to ban personal hard drives, forcing everyone to store their data over the Internet on Techclon servers. After Justin is arrested for having his own hard drive, the CEO of Techclon gives Justin a choice: work for Techclon or go to prison. Justin's new career at Techclon centers on catching the Judge, an amateur philosopher and a black hat computer hacker who plans to release a doomsday worm that will take down the Internet. Through online conversations with the Judge, Justin becomes obsessed. Justin's quest will sweep him to the top echelon of society and then plunge him into poverty as he seeks to figure out the Judge's identity. Even after the Judge is no longer a threat, Justin sacrifices everything to find the Judge because he believes the Judge is the only person who can cure his sense of alienation. Financial Innovation and Resilience Lilia Costabile, Larry Neal, 2018-09-28 As Ignazio Visco, Governor of the Bank of Italy, says in his Foreword, all economic policy makers today need to re-examine our history to help them confront the challenges of today. This edited volume focuses specifically on the theme of financial innovation and how financial resiliency was achieved in Naples. To highlight both the achievements of the public banks of Naples and their lessons for financial resiliency, the book focuses on financial crises and how they were overcome in Naples in contrast to other European financial systems. The first section focuses on the development of the public banks unique to Naples. The second section compares those with other banking systems and how they responded to the same shock in 1622, caused by the full mobilization of European belligerents to finance their efforts

in the Thirty Years War. The next section compares lessons learned in the rest of Europe over the next century and a half. The final section comes back to original start of the narrative arc to suggest ways that today's policymakers and thinkers could use the historical experience of the public banks of Naples to deal better with the ongoing problems stemming from the financial crisis of 2007-08.

The Appalachian Trail Earl Victor Shaffer, 2007-01-01 In 1948, young WWII veteran Earl Shaffer did what many people said couldn't be done: He trekked the entire length of the Appalachian Trail from Georgia to Maine in one continuous journey ... walking into the history books as the Trail's first thru-hiker. In 1998, on the 50th anniversary of that hike, 79-year-old Earl did it again. In this beautifully-presented book, Earl recalls his 1998 anniversary trip and pays homage to the Appalachian Trail through his prose and poetry, enhanced by dozens of Bart Smith's stunning photographs.
