The Georgian London Town House Kate Retford, Susanna Avery-Quash, 2019-03-07 For every great country house of the Georgian period, there was usually also a town house. Chatsworth, for example, the home of the Devonshires, has officially been recognised as one of the country's favourite national treasures - but most of its visitors know little of Devonshire House, which the family once owned in the capital. In part, this is because town houses were often leased, rather than being passed down through generations as country estates were. But, most crucially, many London town houses, including Devonshire House, no longer exist, having been demolished in the early twentieth century. This book seeks to place centre-stage the hugely important yet hitherto overlooked town houses of the eighteenth and early nineteenth centuries, exploring the prime position they once occupied in the lives of families and the nation as a whole. It explores the owners, how they furnished and used these properties, and how their houses were judged by the various types of visitor who gained access.

Designing with Light Victoria Meyers, 2006 In the first chapter of Designing with Light, Meyers summarizes recent developments in the science of light and their cultural impact, and then surveys the uses of light in contemporary visual art, theater, film, and even music. This overview reveals how the work of artists as diverse as videographer Bill Viola, stage director Robert Wilson, and composer John Cage can lend architects insight into the properties of light. Each of the following chapters is devoted to one aspect of light in

contemporary architecture, beginning with Color and continuing with Lines, Form, Glass, Windows, Sky Frames, Shadows, and, finally, Reflections. Within these chapters, some two hundred vivid color photographs illustrate the myriad ways in which architects like Zaha Hadid, Herzog & de Meuron, Rem Koolhaas, and John Pawson have employed light, internally and externally, in their recent commissions. Enriched with this abundance of images, as well as with numerous insights from Meyers's own architectural practice, *Designing with Light* will appeal to every student, practitioner, and enthusiast of contemporary architecture.--BOOK JACKET.
