**AMEE GUIDE (V. 105) KEN. MASTERS,**

**A Learner's Paradise** Richard Wells, 2016-06-01 Do you think education works? Does it meet the needs of future society, business and most importantly, the average school leaver? In this book, Richard Wells explains his amazement at how all the components of New Zealand education collaborate in creating an ever forward-moving system better prepared for the 21st century than any other. After teaching in the UK, Wells moved to New Zealand in 2006 to find there was no prescribed curriculum and teachers were trusted to run the whole

system, including writing high school graduation assessments themselves. The Government is appreciated by teachers as a supportive aide to them as they hold each other to account in a positive and collaborative nationally networked system. In New Zealand, teachers are proud of the education system they operate and develop with their students, some being unaware of how lucky they are. Wells explains each of the elements and organisations that jointly form the world's leading 21st Century education system. He describes the developments and decisions that were made in achieving this and how it is moving into a phase of using student-negotiated national assessments that few other countries' educators could even contemplate. The book is filled with useful diagrams and posters to illustrate key themes and pedagogies. Wells paints a picture of what happens when young people are measured by their depth of thinking and understanding and can personalise their approach to doing so. The book introduces you to a country where the leading people and schools shape the future of world public education.

**The Psychology of Human Values** Gregory R Maio,2016-10-19 This original and engaging book advocates an unabashedly empirical approach to understanding human values: abstract ideals that we consider important, such as freedom, equality, achievement, helpfulness, security, tradition, and peace. Our values are relevant to everything we do, helping us choose between careers, schools, romantic partners, places to live, things to buy, who to vote for, and much more. There is enormous public interest in the psychology of values and a growing recognition of the need for a deeper understanding of the ways in which values are embedded in our attitudes and behavior. How do they affect our well-being, our relationships with other people, our prosperity, and our environment? In his examination of these questions, Maio focuses on tests of theories about values, through observations of what people actually think and do. In the past five decades, psychological research has learned a lot about values, and this book describes what we have learned and why it is important. It provides the first overview of psychological research looking at how we mentally represent and use our values, and constitutes important reading for psychology students at all levels, as well as academics in psychology and related social and health sciences.

**Dear Photograph** Taylor Jones,2012-04-24 We all have moments we wish we could relive. We'd give anything to skid down the toboggan hills of our youth, to breathe in the smell of our children as babies or to spend just one more minute with a loved one we've lost. Dear Photograph provides a way to

link these memories from the past to the present. The idea is simple: hold a photograph from the past up in front of the place where it was originally taken; take a second photograph; add a sentence of dedication about what the photograph means to you. The results, however, are astounding, which is why millions have flocked to the site, and thousands have submitted their own Dear Photographs. This stunning visual compilation includes more than 140 never-before-seen Dear Photographs. By turns nostalgic, charming and poignant, Dear Photograph evokes childhood memories, laments difficult losses and, above all, celebrates the universal nature of love.

**Warhol-isms** Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.
