*Food at Work* Christopher Wanjek,2005 This volume establishes a clear link between good nutrition and high productivity. It demonstrates that ensuring that workers have access to nutritious, safe and affordable food, an adequate meal break, and decent conditions for eating is not only socially important and economically viable but a profitable business practice, too. Food at Work sets out key points for designing a meal program, presenting a multitude of food solutions including canteens, meal or food vouchers, mess rooms and kitchenettes, and partnerships with local vendors. Through case studies from a variety of enterprises in twenty-eight industrialized and developing countries, the book offers valuable practical food solutions that can be adapted to workplaces of different sizes and with different budgets.

**The Economic Consequences of the Peace** John Maynard Keynes,1920 A sever economic critique of the 1920 Treaty of Versailles written by the famous economist, who was a member of the British peace delegation until he quit with disgust.

**State of the World's Indigenous Peoples** United Nations Department of Economic and Social Affairs,2011-05-09 While indigenous peoples make up around 370 million of the world's population – some 5 per cent – they constitute around one-third of the world's 900 million extremely poor rural people. Every day, indigenous communities all over the world face issues of violence and brutality. Indigenous peoples are stewards of some of the most biologically diverse areas of the globe, and their biological and cultural wealth has allowed indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment, contemporary education, health, human rights, and includes a chapter on emerging issues.

**Isotopes in the Water Cycle** Pradeep K. Aggarwal,Joel R. Gat,Klaus F. Froehlich,2007-08-31 Environmental isotope and nuclear techniques provide unmatched insights into the processes governing the water cycle and its variability. This monograph presents state of the art applications and new developments of isotopes in hydrology, environmental disciplines and climate change studies. Coverage ranges from the assessment of groundwater resources in terms of recharge and flow regime to studies of the past and present global environmental and climate changes.

**Terrestrial Vegetation of California, 3rd Edition** Michael Barbour,Todd Keeler-Wolf,Allan A. Schoenherr,2007-07-17 This completely new edition of Terrestrial Vegetation of California clearly documents the extraordinary complexity and richness of the plant communities and of the state and the forces that shape them. This volume is a storehouse of information of value to anyone concerned with meeting the challenge of understanding, managing or conserving these unique plant communities under the growing threats of climate change, biological invasions and development.—Harold Mooney, Professor of Environmental Biology, Stanford University The plants of California are under threat like never before. Traditional pressures of development and invasive species have been joined by a newly-recognized threat: human-caused climate change. It is essential that we thoroughly understand current plant community dynamics in order to have a hope of conserving them. This book represents an important, well-timed advance in knowledge of the vegetation of this diverse state and is an essential resource for professionals, students, and the general public alike.—Brent Mishler, Director of the University & Jepson Herbaria and Professor of Integrative Biology, University of California, Berkeley

**Dryland Ecohydrology** Paolo D'Odorico,Amilcare Porporato,2006-01-09 Ecohydrology emerges as a new field of research aiming at furthering our understanding of the earth system through the study of the interactions between the water cycle and vegetation. By combining the analysis of biotic and abiotic components of terrestrial ecosystems, this volume provides a synthesis of material on arid and semiarid landscapes, which is currently spread in a number of books and journal articles. The focus on water-limited ecosystems is motivated by their high sensitivity to daily, seasonal, and decadal perturbations in water availability, and by the ecologic, climatic, and economic significance of most of the drylands around the world. Conceived as a tool for scientists working in the area of the earth and environmental sciences, this book presents the basic principles of eco-hydrology as well as a broad spectrum of topics and advances in this research field. The chapters collected in this book have been contributed by authors with different expertise, who work in several arid areas around the World. They describe the various interactions among the biological and physical dynamics in dryland ecosystems, starting from basic processes in the soil-vegetation-climate system, to landscape-scale hydrologic and geomorphic processes, ecohydrologic controls on soil nutrient dynamics, and multiscale analyses of disturbances and patterns.

*Essentials of Nuclear Medicine Science* William B. Hladik,Gopal B. Saha,Kenneth T. Study,1987

**Pygmalion** David Canfield Smith,1975

**State and Economy in Ancient Egypt** David Warburton,1997 Combining philological investigation and theoretical reasoning, this book offers a completely new interpretation of the economic role of the state in ancient Egypt. The first part provides background outlining the relevance of Keynes General Theory to the ancient Egyptian economy. The central part uses ancient Egyptian texts as the foundation of an analysis of words commonly assumed to relate to taxation during the New Kingdom (c. 1540/1070 B.C.E.). The conclusions summarize the philological results and explore the role of the temples in the ancient Egyptian state during the New Kingdom. The result places ancient Egyptian taxation and state economic activity in a market context, opening a new path to the understanding of the ancient Egyptian economy based on an analysis of primary sources.

*Fast Facts: Comprehensive Genomic Profiling* Bernardo L. Rapoport ,Giancarlo Troncone ,Fernando Schmitt ,Simon Nayler ,2020-10-20 Cancer is a multifaceted disease in which genetic changes induce uncontrolled tumor growth. Genomic characterization of cancer is now leading to better diagnostic,

prognostic and predictive biomarkers, and effective individualized management. 'Fast Facts: Comprehensive Genomic Profiling' provides a crash course in the science, methods and application of genomic profiling. Assuming only the most basic knowledge – or memory – of cell biology, the authors provide an overview of DNA and RNA biology and next-generation sequencing. This sets in context the descriptions of prognostic and predictive biomarkers for different cancer types and genomic-based treatments. Finally, but importantly, some of the practicalities of gaining and interpreting genomic information are described. Whether you need a primer or a refresher, this short colorful book demystifies this complex subject. Contents: • Genetic mutations and biomarkers • Understanding next-generation sequencing • Elements of comprehensive genomic profiles • Role in precision oncology • Predictive and prognostic biomarkers • Overcoming barriers to genotype-directed therapy

How to Build a Digital Library Ian H. Witten,David Bainbridge,David M. Nichols,2009-11-09 How to Build a Digital Library reviews knowledge and tools to construct and maintain a digital library, regardless of the size or purpose. A resource for individuals, agencies, and institutions wishing to put this powerful tool to work in their burgeoning information treasuries. The Second Edition reflects developments in the field as well as in the Greenstone Digital Library open source software. In Part I, the authors have added an entire new chapter on user groups, user support, collaborative browsing, user contributions, and so on. There is also new material on content-based queries, map-based queries, cross-media queries. There is an increased emphasis placed on multimedia by adding a digitizing section to each major media type. A new chapter has also been added on internationalization, which will address Unicode standards, multi-language interfaces and collections, and issues with non-European languages (Chinese, Hindi, etc.). Part II, the software tools section, has been completely rewritten to reflect the new developments in Greenstone Digital Library Software, an internationally popular open source software tool with a comprehensive graphical facility for creating and maintaining digital libraries. Outlines the history of libraries on both traditional and digital Written for both technical and non-technical audiences and covers the entire spectrum of media, including text, images, audio, video, and related XML standards Web-enhanced with software documentation, color illustrations, full-text index, source code, and more

**Blueprint for Action** Paula Jorde Bloom,2005 A management and staff development book for early childhood administrators  
Blueprint for Action Paula J. Bloom,2015-03-01 Blueprint for Action provides a framework for understanding the dynamics of organizational change in early care and education settings. It helps administrators move beyond a quick fix notion of center improvement by serving as a guide for organizational analysis and action. The book details a comprehensive method for assessing program strengths and areas in need of improvement. The heart of this approach is an individualized model of supervision and staff development. Woven throughout the text are numerous vignettes connecting the concepts to real-life situations experienced by early childhood administrators. The book includes 26 assessment tools and 12 worksheets that directors can adapt for use in their own programs.

*Revitalizing Health for All* International Development Research Centr,2017-06-30 The concept of Comprehensive Primary Health Care focuses on health system efforts to improve equity in health care access, community empowerment, participation of marginalized groups, and actions on the social determinants of health. Despite its existence since the late 1970s very few studies have been able to highlight the outcomes of this concept, until now. Revitalizing Health for All examines thirteen cases of efforts to implement CPHC reforms from around the globe including Australia, Brazil, Democratic Republic of Congo, Iran, South Africa, and more. The findings presented in this volume originate from an international action-research set of studies that utilized triads of senior and junior researchers and knowledge users from each country’s public health system. Primary health care reform is an important policy discourse both at the national level in these countries and in the global conversations, and this volume reveals the similarities among CPHC projects in diverse national contexts. These similarities provide a rich evidence base from which future CPHC reform initiatives can draw, regardless of their country.

Adaptive Query Processing Amol Deshpande,Zachary Ives,Vijayshankar Raman,2007 Adaptive Query Processing surveys the fundamental issues, techniques, costs, and benefits of adaptive query processing. It begins with a broad overview of the field, identifying the dimensions of adaptive techniques. It then looks at the spectrum of approaches available to adapt query execution at runtime - primarily in a non-streaming context. The emphasis is on simplifying and abstracting the key concepts of each technique, rather than reproducing the full details available in the papers. The authors identify the strengths and limitations of the different techniques, demonstrate when they are most useful, and suggest possible avenues of future research. Adaptive Query Processing serves as a valuable reference for students of databases, providing a thorough survey of the area. Database researchers will benefit from a more complete point of view, including a number of approaches which they may not have focused on within the scope of their own research.
