Extensive Reading in the Second Language Classroom Richard R. Day, Julian Bamford, 1998-01-13 This comprehensive examination of extensive reading shows how reading large quantities of books and other materials can provide students with essential practice in learning to read and help them develop a positive attitude towards reading, which is sometimes missed in second language classes. The authors first examine the cognitive and affective nature of reading and then offer a wealth of practical advice for implementing extensive reading with second language learners. Suggestions are provided for integrating extensive reading into the curriculum, establishing a library, selecting reading materials, and keeping records for purposes of evaluation. The text also describes a wide variety of classroom activities to supplement individualized silent reading. The information will be useful both for pre-service teachers and for teachers and administrators who want to improve the teaching of reading in their second language programs.

The Knowledge Translation Toolkit Gavin Bennett, Nasreen Jessani, 2011-06-06 The Knowledge Translation Toolkit provides a thorough overview of what knowledge translation (KT) is and how to use it most effectively to bridge the know-do gap between research, policy, practice, and people. It presents the theories, tools, and strategies required to encourage and enable evidence-informed decision-making. This toolkit builds upon extensive research into the principles and skills of KT: its theory and literature, its evolution, strategies, and challenges. The book covers an array of crucial KT enablers--from context mapping to evaluative thinking--supported by practical examples, implementation guides, and references. Drawing from the experience of specialists in relevant disciplines around the world, The Knowledge Translation Toolkit aims to enhance the capacity and motivation of researchers to use KT and to use it well. The Tools in this book will help researchers ensure that their good science reaches more people, is more clearly understood, and is more likely to lead to positive action. In sum, their work becomes more useful, and therefore, more valuable.
