Emotions in Late Modernity Roger Patulny, Alberto Bellocchi, Rebecca E. Olson, Sukhmani Khorana, Jordan McKenzie, Michelle Peterie, 2019-01-31 This international collection discusses how the individualised, reflexive, late modern era has changed the way we experience and act on our emotions. Divided into four sections that include studies ranging across multiple continents and centuries, *Emotions in Late Modernity* does the following: Demonstrates an increased awareness and experience of emotional complexity in late modernity by challenging the legal emotional/rational divide; positive/negative concepts of emotional valence; sociological/ philosophical/psychological divisions around emotion, morality and gender; and traditional understandings of love and loneliness. Reveals tension between collectivised and individualised-privatised emotions in investigating 'emotional sharing' and individualised responsibility for anger crimes in courtrooms; and the generation of emotional energy and achievement emotions in classrooms. Debates the increasing mediation of emotions by contrasting their historical mediation (through texts and bodies) with contemporary digital mediation of emotions in classroom teaching, collective mobilisations (e.g. riots) and film and documentary representations. Demonstrates reflexive micro and macro management of emotions, with examinations of the 'politics of fear' around asylum seeking and religious subjects, and collective commitment to climate change mitigation. The first collection to investigate the changing nature of emotional experience in contemporary times, *Emotions in Late Modernity* will appeal to students and researchers interested in fields such as sociology of emotions, cultural studies, political

science and psychology. Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Yet they still remained loyal to each other, despite all the other friends who betrayed them over the decades. Easternsports, 2016 Longtime friends and first-time collaborators Alex Da Corte (born 1980) and Jayson Musson (born 1977) created a major new commission for ICA Philadelphia in 2014. Nearly two and a half hours in length, this in-the-round video installation was scripted by Jayson Musson, directed by Alex Da Corte, and scored by composer Devonté Hynes. *Easternsports* is an amorality tale for the digital age. Both deadly serious and heartbreakingly flippant, it embraces Gap commercials and grand jury rulings, middle-class aspirations and global imperialism. And it transforms a decade-long conversation between Musson and Da Corte into a work awash in the neon glow of their American milieu.

Emotions as Commodities Eva Illouz, 2017-09-28 Capitalism has made rationality into a pervasive feature of human action and yet, far from heralding a loss of emotionality, capitalist culture has been accompanied with an unprecedented intensification of emotional life. This raises the question: how could we have become increasingly rationalized and more intensely emotional? *Emotions as Commodities* offers a simple hypothesis: that consumer acts and emotional life have become closely and inseparably intertwined with each other, each one defining and enabling the other. Commodities facilitate the experience of emotions, and so emotions are converted into commodities. The contributors of this volume present the co-production of emotions and commodities as a new type of commodity that has gone unseen and unanalyzed by theories of consumption – emodity. Indeed, this innovative book explores how emodity includes atmospherical or mood-producing commodities, relation-marking commodities and mental commodities, all of which the purpose it is to change and improve the self. Analysing a variety of modern

day situations such as emotional management through music, creation of urban sexual atmospheres and emotional transformation through psychotherapy, Emotions as Commodities will appeal to scholars, postgraduate students and postdoctoral researchers interested in fields such as Sociology, Cultural Studies, Marketing, Anthropology and Consumer Studies.

Contemporary Debates on Terrorism Richard Jackson,Daniela Pisoiu,2018-09-03 Contemporary Debates on Terrorism is an

innovative textbook, addressing a number of key issues in terrorism studies from both traditional and 'critical' perspectives. This second edition has been revised and updated to cover contemporary issues such as the rise of ISIL and cyberterrorism. In recent years, the terrorism studies field has grown in quantity and quality, with a growing number of scholars rooted in various professional disciplines beginning to debate the complex dynamics underlying this category of violence. Within the broader field, there are a number of identifiable controversies and questions which divide scholarly opinion and generate opposing arguments. These relate to theoretical issues, such as the definition of terrorism and state terrorism, substantive issues like the threat posed by al Qaeda/ISIL and the utility of different responses to terrorism, different pathways leading people to engage in terrorist tactics and ethical issues such as the use of drones. This new edition brings together in one place many of the field's leading scholars to debate the key issues relating to a set of 16 important controversies and questions. The format of the volume involves a leading scholar taking a particular position on the controversy, followed by an opposing or alternative viewpoint written by another scholar. In addition to the pedagogic value of allowing students to read opposing arguments in one place, the volume will also be important for providing an overview of the state of the field and its key lines of debate. This book will be essential reading for students of terrorism studies and political violence, critical terrorism studies, security studies and IR in general.

Examining Political Violence David Lowe, Austin T. Turk, Dilip K. Das, 2013-12-13 Security is undermined worldwide from political dissident activity and acts of terrorism targeted at innocent victims with no relation to the offenders. This political violence and terrorism plagues all continents and does not originate solely from jihadist groups. With a view towards developing more effective measures of prevention and resolution, *Examining Political Violence: Studies of Terrorism*,

Counterterrorism, and Internal War examines political violence in various national and international settings. A collection of works, some previously published as articles in the journal *Police Practice and Research*, the book provides both conceptual analysis and case studies, exploring historical and sociopolitical contexts of conflicts in order to help readers better understand these themes. Divided into three parts, the book begins by defining the concepts of terrorism and radicalization. It discusses countering terrorism through intelligence gathering, examines how a multiagency approach is necessary to be prepared for terrorist acts, and examines different policing models. It discusses the experiences of policing agencies' investigations into terrorist groups, and examines the targeting of police officers by terrorist groups. Specifying the historical and sociopolitical contexts of conflicts is essential for understanding these themes. Control policies must be grounded in empirical realities, not ideological preferences or aversions. Bringing together theoretical concepts examined through operational and empirical findings, the book is written by academics researching the areas as well as practitioners working in the fields of counterterrorism and political violence. The conclusions drawn from these findings may assist in combating terrorism and political violence around the world.

The Government reply to the report by Lord Carlile of Berriew Q.C. Independent Reviewer of Terrorism

Legislation Great Britain: Home Office, Alex Carlile Carlile of Berriew, Lord Carlile of Berriew, 2007-06-07 In this reply the Government accepts the recommendations of the report, either specifically or in general terms, except for the recommendation that an action should only fall within the definition of terrorism if it intended to intimidate the target audience. The Government still considers that an action which intends to influence the target audience as an appropriate definition.

from a human rights perspective.

Essentials of Economics Paul R. Gregory, Roy Ruffin, 1986

Love and Society Swen Seebach, 2017-04-21 Why does love matter? *Love and Society* discusses the meaning and importance of love for contemporary society. Love is not only an emotion that occurs in our intimate relationships; it is a special emotion that allows us to relate to each other in a lasting fashion, to create out of our individual pasts a shared past, which enables us to project a shared future. Bringing together the idea of Simmel's second order forms with theories of love, this insightful volume shows that the answer to why love is so central to society can be found in the social transformation of the last two centuries. It also explains how we can build our strongest social bonds on the fragility of an emotions thanks to the creation of special moments (love rituals) and intimate stories (love myths) that are central to the weaving of lasting social bonds. Going to the cinema, reading a book together or sharing songs are forms of weaving bonds of love and part of the cycle of love. But love is not only shared between two people; the desire and the search for love is something we share with almost all members of society. With rich empirical data, an analysis of love's transformation in modernity, and a critical engagement with classical and contemporary theorists, this book provides a lively discussion on the meaning and importance of love for today's society. It will be of interest to undergraduate and postgraduate students and postdoctoral researchers who are interested in fields such as Sociology of Emotions, Sociological Theory and Sociology of Morality.

Energy at the End of the World Laura Watts, 2019-01-15

Making local energy futures, from marine energy to hydrogen fuel, at the edge of the world. The islands of Orkney, off the northern coast of Scotland, are closer to the Arctic Circle than to London. Surrounded by fierce seas and shrouded by clouds and mist, the islands seem to mark the edge of the known world. And yet they are a center for energy technology innovation, from marine energy

to hydrogen fuel networks, attracting the interest of venture capitalists and local communities. In this book, Laura Watts tells a story of making energy futures at the edge of the world. Orkney, Watts tells us, has been making technology for six thousand years, from arrowheads and stone circles to wave and tide energy prototypes. Artifacts and traces of all the ages—Stone, Bronze, Iron, Viking, Silicon—are visible everywhere. The islanders turned to energy innovation when forced to contend with an energy infrastructure they had outgrown. Today, Orkney is home to the European Marine Energy Centre, established in 2003. There are about forty open-sea marine energy test facilities in the world, many of which draw on Orkney expertise. The islands generate more renewable energy than they use, are growing hydrogen fuel and electric car networks, and have hundreds of locally owned micro wind turbines and a decade-old smart grid. Mixing storytelling and ethnography, empiricism and lyricism, Watts tells an Orkney energy saga—an account of how the islands are creating their own low-carbon future in the face of the seemingly impossible. The Orkney Islands, Watts shows, are playing a long game, making energy futures for another six thousand years.
