**Regulatory Theory** Peter Drahos, 2017-02-23 This volume introduces readers to regulatory theory. Aimed at practitioners, postgraduate students and those interested in regulation as a cross-cutting theme in the social sciences, Regulatory Theory includes chapters on the social-psychological foundations of regulation as well as theories of regulation such as responsive regulation, smart regulation and nodal governance. It explores the key themes of compliance, legal pluralism, meta-regulation, the rule of law, risk, accountability, globalisation and regulatory capitalism. The environment, crime, health, human rights, investment, migration and tax are among the fields of regulation considered in this ground-breaking book. Each chapter introduces the reader to key concepts and ideas and contains suggestions for further reading. The contributors, who either are or have been connected to the Regulatory Institutions Network (RegNet) at The Australian National University, include John Braithwaite, Valerie Braithwaite, Peter Grabosky, Neil Gunningham, Fiona Haines, Terry Halliday, David Levi-Faur, Christine Parker, Colin Scott and Clifford Shearing.

*The Politics and Science of Prevision* Andreas Wenger, Ursula Jasper, Myriam Dunn Cavelty, 2020-05-28 This book inquires into the use of prediction at the intersection of politics and academia, and reflects upon the implications of future-oriented policy-making across different fields. The volume focuses on the key intricacies and fallacies of prevision in a time of complexity, uncertainty, and unpredictability. The first part of the book discusses different academic perspectives and contributions to future-oriented policy-making. The second part discusses the role of future knowledge in decision-making across different empirical issues such as climate, health, finance, bio- and nuclear weapons, civil war, and crime. It analyses how prediction is integrated into public policy and governance, and how in return governance structures influence the making of knowledge about the future. Contributors integrate two analytical dimensions in their chapters: the epistemology of prevision and the political and ethical implications of prevision. In this way, the volume contributes to a better understanding of the complex interaction and feedback loops between the processes of creating knowledge about the future and the application of this future knowledge in public policy and governance. This book will be of much interest to students of security studies, political science, sociology, technology studies, and International Relations. The Open Access version of this book, available at <https://www.routledge.com/The-Politics-and-Science-of-Prevision-Governing-and-Probing/Wenger-Jasper-Cavelty/p/book/9780367900748>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

**Genetics of Speciation** David L. Jameson, 1977

**The Rise of Organised Brutality** Siniša Malešević, 2017-04-13 This book challenges the prevailing orthodoxy that sees organised violence as in continuous decline, arguing instead that evidence shows that it continues to rise.

**Winch and cable systems** I. Samset, 2013-03-14 The book is a civil engineering handbook on winch and cable systems. The handbook may be used as textbook for university studies in civil engineering and forestry and as the basis for studies in schools on a technical level. It should be a useful reference book for construction engineers, civil engineers, logging engineers, foresters and leaders of operational activities under difficult terrain conditions. The content in the book is based on more than 35 years experience with practical winch and cable operations. As a leader of the Norwegian Institute of Forest Operations, the author has carried out research work in this field since 1947. The Institute is the owner of yarders, winches, cable cranes etc., and with its own cable crews the Institute operates as a contractor in its own research forests as well as in other state or privately owned forests throughout Norway. The research work also includes other cable crane operations in Norway and other countries. As the leader of the Joint FAO/ECE/ILO Study Group on Mechanized Forest Operations the author studied cable operations in most of the Eastern and Western European countries. As president of the International Union of Forestry Research Organizations the author visited most forest countries in the world. Information from research and practical cable crane operations were collected. The handbook is based on material on winch and

cable systems used in Japan, New Zealand, Soviet Union, Central Europe, Northern Europe, Eastern United States, Western United States and British Columbia.

**Design and Implementation of Compiler** Ravendra Singh,Vivek Sharma,Manish Varshney,2009 About the Book: This well-organized text provides the design techniques of compiler in a simple and straightforward manner. It describes the complete development of various phases of compiler with their imitation of C language in order to have an understanding of their application. **DNA Barcodes** W John Kress,David L Erickson,Ida Lopez,2016-05-01 Up-to-date information on methods is crucial in this rapidly advancing field. This compendium includes the latest information on generating, applying and analyzing DNA as well as step-by-step detail and troubleshooting tips and advice from experts.

**Art Crime** Noah Charney,2016-03-02 Since the Second World War, art crime has shifted from a relatively innocuous, often ideological crime, into a major international problem, considered by some to be the third-highest grossing criminal trade worldwide. This rich volume features essays on art crime by the most respected and knowledgeable experts in this interdisciplinary subject.

*Animal biodiversity: An outline of higher-level classification and survey of taxonomic richness* ,2011

**Plant Conservation** Gary A. Krupnick,W. John Kress,2005 Natural history has always been the foundation of conservation biology. For centuries, botanists collected specimens in the field to understand plant diversity; now that many habitats are threatened, botanists have turned their focus to conservation, and, increasingly, they look to the collections of museums, herbaria, and botanical gardens for insight on developing informed management programs. Plant Conservation explores the value of these collections in light of contemporary biodiversity studies. Plant Conservation opens with a broad view of plant biodiversity and then considers evolutionary and taxonomic threats and consequences of habitat alteration; specific threats to plant diversity, such as invasive species and global climate change; consequences of plant population decline at the ecological, evolutionary, and taxonomic levels; and, finally, management strategies that protect plant biodiversity from further decline. With a unique perspective on biodiversity and scientific collections, Plant Conservation ultimately emphasizes the role museums and botanical gardens will play in future conservation.

The Palgrave Handbook of Incarceration in Popular Culture Marcus Harmes,Meredith Harmes,Barbara Harmes,2020-02-03 The Handbook of Incarceration in Popular Culture will be an essential reference point, providing international coverage and thematic richness. The chapters examine the real and imagined spaces of the prison and, perhaps more importantly, dwell in the uncertain space between them. The modern fixation with 'seeing inside' prison from the outside has prompted a proliferation of media visions of incarceration, from high-minded and worthy to voyeuristic and unrealistic. In this handbook, the editors bring together a huge breadth of disparate issues including women in prison, the view from 'inside', prisons as a source of entertainment, the real worlds of prison, and issues of race and gender. The handbook will inform students and lecturers of media, film, popular culture, gender, and cultural studies, as well as scholars of criminology and justice.

**How and Why Species Multiply** Peter R. Grant,B. Rosemary Grant,2020-03-31 Charles Darwin's experiences in the Galápagos Islands in 1835 helped to guide his thoughts toward a revolutionary theory: that species were not fixed but diversified from their ancestors over many

generations, and that the driving mechanism of evolutionary change was natural selection. In this concise, accessible book, Peter and Rosemary Grant explain what we have learned about the origin and evolution of new species through the study of the finches made famous by that great scientist: Darwin's finches. Drawing upon their unique observations of finch evolution over a thirty-four-year period, the Grants trace the evolutionary history of fourteen different species from a shared ancestor three million years ago. They show how repeated cycles of speciation involved adaptive change through natural selection on beak size and shape, and divergence in songs. They explain other factors that drive finch evolution, including geographical isolation, which has kept the Galápagos relatively free of competitors and predators; climate change and an increase in the number of islands over the last three million years, which enhanced opportunities for speciation; and flexibility in the early learning of feeding skills, which helped species to exploit new food resources. Throughout, the Grants show how the laboratory tools of developmental biology and molecular genetics can be combined with observations and experiments on birds in the field to gain deeper insights into why the world is so biologically rich and diverse. Written by two preeminent evolutionary biologists, *How and Why Species Multiply* helps to answer fundamental questions about evolution--in the Galápagos and throughout the world.

*Routledge International Handbook of Restorative Justice* Theo Gavrielides, 2018-07-27 This up-to-date resource on restorative justice theory and practice is the literature's most comprehensive and authoritative review of original research in new and contested areas. Bringing together contributors from across a range of jurisdictions, disciplines and legal traditions, this edited collection provides a concise, but critical review of existing theory and practice in restorative justice. Authors identify key developments, theoretical arguments and new empirical evidence, evaluating their merits and demerits, before turning the reader's attention to further concerns informing and improving the future of restorative justice. Divided into four parts, the Handbook includes papers written by leading scholars on new theory, empirical evidence of implementation, critiques and the future of restorative justice. This companion is essential reading for scholars of restorative justice, criminology, social theory, psychology, law, human rights and criminal justice, as well as researchers, policymakers, practitioners and campaigners from around the world.

Surface Temperature Reconstructions for the Last 2,000 Years National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee on Surface Temperature Reconstructions for the Last 2,000 Years, 2007-01-05 In response to a request from Congress, *Surface Temperature Reconstructions for the Last 2,000 Years* assesses the state of scientific efforts to reconstruct surface temperature records for Earth during approximately the last 2,000 years and the implications of these efforts for our understanding of global climate change. Because widespread, reliable temperature records are available only for the last 150 years, scientists estimate temperatures in the more distant past by analyzing proxy evidence, which includes tree rings, corals, ocean and lake sediments, cave deposits, ice cores, boreholes, and glaciers. Starting in the late 1990s, scientists began using sophisticated methods to combine proxy evidence from many different locations in an effort to estimate surface temperature changes during the last few hundred to few thousand years. This book is an important resource in helping to understand the intricacies of global climate change.

**Crime and Regulation** Fiona Haines, 2017-11-30 This volume brings together key articles in the burgeoning field of regulation. The collection is interdisciplinary, in keeping with study of regulation itself, yet the book arranges and explores these articles to make the bewildering array of issues and concepts that comprise the study of regulation comprehensible to a criminological audience. It will be of interest to all scholars and students of criminology and criminal justice, as well as those concerned with reducing the crimes and harms of the powerful.

The Legacy of the Good Friday Agreement Charles I. Armstrong, David Herbert, Jan Erik Mustad, 2018-09-03 This book provides a multidisciplinary collection of essays that seek to explore the deeply problematic legacy of post-Agreement Northern Ireland. Thus, the authors of this book look at a number of issues that continue to stymie the development of a robust and sustainable

peacebuilding project, including segregation, contested parades and flags, ethnic party mobilization, and memorialization. Towards addressing these contemporary issues, authors are drawn from a range of disciplines, including politics, history, literature, drama, cultural studies, sociology, and social psychology.

**Emotions in Late Modernity** Roger Patulny, Alberto Bellocchi, Rebecca E. Olson, Sukhmani Khorana, Jordan McKenzie, Michelle Peterie, 2019-01-31 This international collection discusses how the individualised, reflexive, late modern era has changed the way we experience and act on our emotions. Divided into four sections that include studies ranging across multiple continents and centuries, *Emotions in Late Modernity* does the following: Demonstrates an increased awareness and experience of emotional complexity in late modernity by challenging the legal emotional/rational divide; positive/negative concepts of emotional valence; sociological/ philosophical/psychological divisions around emotion, morality and gender; and traditional understandings of love and loneliness. Reveals tension between collectivised and individualised-privatised emotions in investigating 'emotional sharing' and individualised responsibility for anger crimes in courtrooms; and the generation of emotional energy and achievement emotions in classrooms. Debates the increasing mediation of emotions by contrasting their historical mediation (through texts and bodies) with contemporary digital mediation of emotions in classroom teaching, collective mobilisations (e.g. riots) and film and documentary representations. Demonstrates reflexive micro and macro management of emotions, with examinations of the 'politics of fear' around asylum seeking and religious subjects, and collective commitment to climate change mitigation. The first collection to investigate the changing nature of emotional experience in contemporary times, *Emotions in Late Modernity* will appeal to students and researchers interested in fields such as sociology of emotions, cultural studies, political science and psychology. Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.
