Ian Berle

Laws of Image Samantha Barbas,2015-09-30 Americans have long been obsessed with their images—their looks, public personas, and the impressions they make. This preoccupation has left its mark on the law. The twentieth century saw the creation of laws that protect your right to control your public image, to defend your image, and to feel good about your image and public presentation of self. These include the legal actions against invasion of privacy, libel, and intentional infliction of emotional distress. With these laws came the phenomenon of personal image litigation—individuals suing to vindicate their image rights. *Laws of Image* tells the story of how Americans came to use the law to protect and manage their images, feelings, and reputations. In this social, cultural, and legal history, Samantha Barbas ties the development of personal image law to the self-consciousness and image-consciousness that has become endemic in our media-saturated culture of celebrity and consumerism, where people see their identities as intertwined with their public images. The laws of image are the expression of a people who have become so publicity-conscious and self-focused that they believe they have a right to control their images—to manage and spin them like actors, politicians, and rock stars.

Egalitarian Digital Privacy Tsachi Keren-Paz,2023-03-30 Should digital platforms be responsible for intimate images posted without the subject's consent? Could the viewers of such images be liable simply for viewing them? This book answers these questions in the affirmative, while considering the social, legal and technological features of unauthorized dissemination of intimate images, or 'revenge porn'. In doing so, it asks fundamental socio-legal questions about responsibility, causation and apportionment, as well as conceptualizing private information as property. With a focus on private law theory, the book defines the appropriate scope of liability of platforms and viewers while critiquing both EU and US solutions to the problem. Through its analysis, the book develops a new theory of egalitarian digital privacy.

Public Images Ryan Linkof,2020-08-12 The stolen snapshot is a staple of the modern tabloid press, as ubiquitous as it is notorious. The first in-depth history of British tabloid photojournalism, this book explores the origin of the unauthorised celebrity photograph in the early 20th century, tracing its rise in the 1900s through to the first legal trial concerning the right to privacy from photographers shortly after the Second World War. Packed with case studies from the glamorous to the infamous, the book argues that the candid snap was a tabloid innovation that drew its power from Britain's unique class tensions. Used by papers such as the Daily Mirror and Daily Sketch as a vehicle of mass communication, this new form of image played an important and often overlooked role in constructing the idea of the press photographer as a documentary eyewitness. From Edward VIII and Wallis Simpson to aristocratic debutantes Lady Diana Cooper and Margaret Whigham, the rage of the social elite at being pictured so intimately without permission was matched only by the fascination of working class readers, while the relationship of the British press to social, economic and political power was changed forever. Initially pioneered in the metropole, tabloid-style photojournalism soon penetrated the journalistic culture of most of the globe. This in-depth account of its social and cultural history is an invaluable source of new research for historians of photography, journalism, visual culture, media and celebrity studies.

Image and Graphics Huchuan Lu,Wanli Ouyang,Hui Huang,Jiwen Lu,Risheng Liu,Jing Dong,Min Xu,2023-10-28 The five-volume set LNCS 14355, 14356, 14357, 14358 and 14359 constitutes the refereed proceedings of the 12th International Conference on Image and Graphics, ICIG 2023, held in Nanjing, China, during September 22–24, 2023. The 166 papers presented in the proceedings set were carefully reviewed and selected from 409 submissions. They were organized in topical sections as follows: computer vision and pattern recognition; computer graphics and visualization; compression, transmission, retrieval; artificial intelligence; biological and medical image processing; color and multispectral processing; computational imaging; multi-view and stereoscopic processing; multimedia security; surveillance and remote sensing, and virtual reality. The ICIG 2023 is a biennial conference that focuses on innovative technologies of image, video and graphics processing and fostering innovation, entrepreneurship, and networking. It will feature world-class plenary speakers, exhibits, and high-quality peer reviewed oral and poster presentations.

On the End of Privacy Richard E. Miller,2019-02-19 On the End of Privacy explores how literacy is transformed by online technology that lets us instantly publish anything that we can see or hear. Miller examines the 2010 suicide of Tyler Clementi, a young college student who jumped off the George Washington Bridge after he discovered that his roommate spied on him via webcam. With access to the text messages, tweets, and chatroom posts of those directly involved in this tragedy, Miller asks: why did no one intervene to stop the spying? Searching for an answer to that question leads Miller to online porn sites, the invention of Facebook, the court-martial of Chelsea Manning, the contents of Hillary Clinton's email server, Anthony Weiner's sexted images, Chatroulette, and more as he maps out the changing norms governing privacy in the digital age.

Privacy and Identity Management for Emerging Services and Technologies Marit Hansen,Jaap-Henk Hoepman,Ronald Leenes,Diane Whitehouse,2014-05-02 This book contains a range of keynote papers and submitted papers presented at the 7th IFIP WG 9.2, 9.5, 9.6/11.7, 11.4, 11.6 International Summer School, held in Nijmegen, The Netherlands, in June 2013. The 13 revised full papers and 6 keynote papers included in this volume were carefully selected from a total of 30 presentations and 11 keynote talks and were subject to a two-step review process. The keynote papers cover the dramatic global changes, including legislative developments that society is facing today. Privacy and identity management are explored in specific settings, such as the corporate context, civic society, and education and using particular technologies such as cloud computing. The regular papers examine the challenges to privacy, security and identity; ways of preserving privacy; identity and identity management and the particular challenges presented by social media.

Computer Security. ESORICS 2023 International Workshops Sokratis Katsikas,

Advanced Information Networking and Applications Leonard Barolli,Farookh Hussain,Tomoya Enokido,2022-03-30 This book covers the theory, design and applications of computer networks, distributed computing and information systems. Networks of today are going through a rapid evolution, and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low-power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuators is emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low-cost and high-volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications, different kinds of networks need to collaborate, and wired and next generation wireless systems should be integrated in order to develop high-performance computing solutions to problems arising from the complexities of these networks. The aim of the book "Advanced Information Networking and Applications" is to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.

Medical Image Understanding and Analysis Guang Yang,Angelica Aviles-Rivero,Michael Roberts,Carola-Bibiane Schönlieb,2022-07-25 This book constitutes the refereed proceedings of the 26th Conference on Medical Image Understanding and Analysis, MIUA 2022, held in Cambridge, UK, in July 2022. The 65 full papers presented were carefully reviewed and selected from 95 submissions. They were organized according to following topical sections: biomarker detection; image registration, and reconstruction; image segmentation; generative models, biomedical simulation and modelling; classification; image enhancement, quality assessment, and data privacy; radiomics, predictive models, and quantitative imaging. Chapter "FCN-Transformer Feature Fusion for Polyp Segmentation" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The Identity Trade Nora A. Draper,2021-11-02 The successes and failures of an industry that claims to protect and promote our online identities What does privacy mean in the digital era? As technology increasingly blurs the boundary between public and private, questions about who controls our data become harder and harder to answer. Our every web view, click, and online purchase can be sold to anyone to store and use as they wish. At the same time, our online reputation has become an important part of our identity—a form of cultural currency. The Identity Trade examines the relationship between online visibility and privacy, and the politics of identity and self-presentation in the digital age. In doing so, Nora Draper looks at the revealing two-decade history of efforts by the consumer privacy industry to give individuals control over their digital image through the sale of privacy protection and reputation management as a service. Through in-depth interviews with industry experts, as well as analysis of media coverage, promotional materials, and government policies, Draper

examines how companies have turned the protection and promotion of digital information into a business. Along the way, she also provides insight into how these companies have responded to and shaped the ways we think about image and reputation in the digital age. Tracking the successes and failures of companies claiming to control our digital ephemera, Draper takes us inside an industry that has commodified strategies of information control. This book is a discerning overview of the debate around who controls our data, who buys and sells it, and the consequences of treating privacy as a consumer good.

Reforming European Data Protection Law Serge Gutwirth, Ronald Leenes, Paul de Hert, 2014-11-17 This book on privacy and data protection offers readers conceptual analysis as well as thoughtful discussion of issues, practices, and solutions. It features results of the seventh annual International Conference on Computers, Privacy, and Data Protection, CPDP 2014, held in Brussels January 2014. The book first examines profiling, a persistent core issue of data protection and privacy. It covers the emergence of profiling technologies, on-line behavioral tracking, and the impact of profiling on fundamental rights and values. Next, the book looks at preventing privacy risks and harms through impact assessments. It contains discussions on the tools and methodologies for impact assessments as well as case studies. The book then goes on to cover the purported trade-off between privacy and security, ways to support privacy and data protection, and the controversial right to be forgotten, which offers individuals a means to oppose the often persistent digital memory of the web. Written during the process of the fundamental revision of the current EU data protection law by the Data Protection Package proposed by the European Commission, this interdisciplinary book presents both daring and prospective approaches. It will serve as an insightful resource for readers with an interest in privacy and data protection.

Making Government Work, 1994-02 Assesses the use of computer and telecommunications technologies in the electronic delivery of governmental services. Photos, charts and tables.

Face Recognition Technology Ian Berle, 2020-03-11 This book examines how face recognition technology is affecting privacy and confidentiality in an era of enhanced surveillance. Further, it offers a new approach to the complex issues of privacy and confidentiality, by drawing on Joseph K in Kafka's disturbing novel *The Trial*, and on Isaiah Berlin's notion of liberty and freedom. Taking into consideration rights and wrongs, protection from harm associated with compulsory visibility, and the need for effective data protection law, the author promotes ethical practices by reinterpreting privacy as a property right. To protect this right, the author advocates the licensing of personal identifiable images where appropriate. The book reviews American, UK and European case law concerning privacy and confidentiality, the effect each case has had on the developing jurisprudence, and the ethical issues involved. As such, it offers a valuable resource for students of ethico-legal fields, professionals specialising in image rights law, policy-makers, and liberty advocates and activists.

Neural Computing for Advanced Applications Haijun Zhang, Zhao Zhang, Zhou Wu, Tianyong Hao, 2020-08-12 This book presents refereed proceedings of the First International Conference on Neural Computing for Advanced Applications, NCAA 2020, held in July, 2020. Due to the COVID-19 pandemic the conference was held online. The 36 full papers and 7 short papers were thoroughly reviewed and selected from a total of 113 qualified submissions. The papers present recent research on such topics as neural network theory, and cognitive sciences, machine learning, data mining, data security & privacy protection, and data-driven applications, computational intelligence, nature-inspired optimizers, and their engineering applications, cloud/edge/fog computing, the Internet of Things/Vehicles (IoT/IoV), and their system optimization, control systems, network synchronization, system integration, and industrial artificial intelligence, fuzzy logic, neuro-fuzzy systems, decision making, and their applications in management sciences, computer vision, image processing, and their industrial applications, and natural language processing, machine translation, knowledge graphs, and their applications.

Transcultural Marketing for Incremental and Radical Innovation Christiansen, Bryan, 2013-11-30 As technology continues to drive innovation and impact societies across multiple national boundaries and cultures, new approaches towards marketing products must be created and implemented to be successful in an era of hypercompetition. *Transcultural Marketing for Incremental & Radical Innovation* provides in depth discussion on tactics for improving existing products while inventing completely new products and product categories. This publication will prove to be helpful for scholars, practitioners, and university students who wish to better understand the importance of marketing products and services across different cultures and multiple languages.

Soft Landing Andrew R. Thomas, 2011-12-21 *Soft Landing: Airline Industry Strategy, Service, and Safety* covers the immediate past, present, and future of the airline industry and its effects on consumers and the economy. Aviation receives a disproportionate amount of news coverage in the popular press—not to mention chatter at cocktail parties and workplaces around the world. And why not? Aviation represents a sector of the U.S economy, for example, exceeded in size only by the real estate, healthcare, and automotive industries. Furthermore, hundreds of millions of people fly each year, including 80 million Americans. So we all have airline stories—experiencing a delay and losing a business deal, spending a night or three in the airport, dealing with ornery airline personnel, losing money on airline stocks, or being involved in a near miss. (Or, as George Carlin more accurately put it, a “near hit.”) But things might be on the upswing. Knocked to its knees by 9/11 and a decade of falling revenue and rising losses, the industry's “flying cheap” strategy and organizational efficiencies based partly on outsourcing have appear to have helped passengers and profitability return. As this book explains, we can look forward to better technology and infrastructure, speedier—and easier—travel, more effective and less invasive security measures, and more jobs in the air and on the ground. Turbulence is always a possibility. Rising fuel costs, economic uncertainty, and future terror attacks could cause tumult once again. Plus, airline companies intend to charge us extra for everything from the weight of our own bodies to use of the bathroom. But as the industry has discovered, we'll put up with that—and more—if we can make it to our destinations with bags intact and a smaller dent in our wallets. *Soft Landing* will: Sort out the promise and perils facing the airlines Analyze and articulate the potential impact of changes in the aviation industry on passengers, airports, governments, the global economy, and the airlines themselves Give airline passengers worldwide an idea of what's ahead when it comes to airline service, security, and technology

Advances in Multimedia Modeling Shin'ichi Satoh, Frank Nack, Minoru Etoh, 2007-12-14 This book constitutes the refereed proceedings of the 14th International Multimedia Modeling Conference, MMM 2007, held in Kyoto, Japan, in January 2007. The 23 revised full papers and 24 revised poster papers were carefully reviewed and selected from more than 130 submissions. The papers are organized in topical sections that include material on media understanding, creative media, visual content representation, and video codecs, as well as media retrieval, audio and music.

Courts, Privacy and Data Protection in the Digital Environment Maja Brkan, Evangelia Psychogiopoulou, 2017-05-26 Through critical analysis of case law in European and national courts, this book reveals the significant role courts play in the protection of privacy and personal data within the new technological environment. It addresses the pressing question from a public who are increasingly aware of their privacy rights in a world of continual technological advances – namely, what can I do if my data privacy rights are breached?

The Scope of Tolerance Raphael Cohen-Almagor, 2005-12-20 One of the dangers in any political system is that the principles that underlie and characterize it may, through their application, bring about its destruction. Liberal democracy is no exception. Moreover, because democracy is relatively a young phenomenon, it lacks experience in dealing with pitfalls involved in the working of the system - the ‘catch’ of democracy. This is an interdisciplinary study concerned with the limits of tolerance, this ‘democratic catch’, and the costs of freedom of expression. Rights are costly, and someone must pay for them. We can and should ask about the justification for bearing the costs, weighing them against the harms inflicted upon society as a result of a wide scope of tolerance. While recognizing that we have the need to express ourselves, we should also inquire about the justifications for tolerating the damaging speech and whether these are weighty enough. This book combines theory and practice, examining issues of contention from philosophical, legal and media perspectives and covers such issues as: media invasion into one's privacy offensive speech incitement hate speech holocaust denial media coverage of terrorism. This book is essential reading for anyone who has research interests in political theory, extremism, and free speech.

Advances in Information and Communication Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2020-02-24 This book presents high-quality research on the concepts and developments in the field of information and communication technologies, and their applications. It features 134 rigorously selected papers (including 10 poster papers) from the Future of Information and Communication Conference 2020 (FICC 2020), held in San

Francisco, USA, from March 5 to 6, 2020, addressing state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of future research. Discussing various aspects of communication, data science, ambient intelligence, networking, computing, security and Internet of Things, the book offers researchers, scientists, industrial engineers and students valuable insights into the current research and next generation information science and communication technologies.
