**Introduction to Art Image Access** Murtha Baca,2002-07-25 With the proliferation of information on the World Wide Web and in other networked environments, one of the main things that users search for are images of works of art and architecture. End-users generally try to search for images by subject, a process that often proves unsatisfactory and frustrating. Cataloging images of works of art has always been challenging, but now that end-users need only have access to the Internet, the challenge is more daunting than ever. This illustrated book on using metadata standards and controlled vocabularies to catalog and provide accurate end-user access to images of works of art also focuses on decisions that must be made about the arrangement of visual records, descriptive principles and methodologies, and requirements for access. Introduction to Art Image Access addresses the issues that underlie a visual collection to make it accessible in an electronic environment. A glossary, selected bibliography, and list of acronyms and URLs are included.

**Take Control of Managing Your Files, 2nd Edition** Jeff Carlson, 2023-05-23 Take the pain out of dealing with files and folders Version 2.0, updated May 23, 2023 Your Apple devices contain an overwhelming number of files and folders, and as these items accumulate, they create more work for you. Does your file management system involve throwing everything on the desktop and then pawing through it laboriously when you need to find something? Do you even have a system? There's a better way. This book helps you organize, search, and clean up the files on your Mac, iPhone, and iPad, providing practical steps and realistic strategies to save time, reduce clutter, and

decrease stress. Apple users have fantastic tools at their disposal for using, creating, and editing files of all kinds, but few of us have any real strategy for naming, organizing, or tagging those files—making them increasingly difficult to find later on. In this book, veteran technology author Jeff Carlson helps you make sense of what could be millions of files on your Mac, iPhone, or iPad so that you can spend less time hunting for things and more time doing useful work (or having fun). Jeff starts by helping you set appropriate file management goals and develop overall strategies that fit your needs and preferences. Then he gets into the details of how to use the Finder (on a Mac), the Files app (in iOS and iPadOS), and third-party tools to make sense of your files and folders and easily find what you're looking for. This book covers topics such as:

- How to keep important items in sync among your devices
- Choosing when to use internal storage vs. external storage (such as an external hard drive, a NAS, or the cloud)
- Whether and how to use iCloud Drive to sync your files, including Desktop and Documents folders
- How to create shortcuts to your favorite files and folders
- Understanding how the macOS folder hierarchy works
- The best ways to use the desktop
- What you should consider when creating a folder hierarchy
- Why and how to use tags to categorize files
- How you can automatically sort, rename, and file items on your Mac
- Ways you can collaborate with others on the same files and folders
- When to consider third-party information management apps (such as DEVONthink)
- How to find files and folders with Spotlight in macOS, iOS, and iPadOS
- Alternative search tools you might want to consider
- How to work your way through a long backlog of unsorted (or poorly sorted) files
- Techniques for encrypting sensitive files (and other data)
- Ways to free up storage space

If you're struggling with file management, this book will help you get a grip on the process—and get your devices to do more of the hard work for you.
