Image Processing and Acquisition using Python Ravishankar Chityala,Sridevi Pudipeddi,2014-02-19 Image Processing and Acquisition using Python provides readers with a sound foundation in both image acquisition and image processing—one of the first books to integrate these topics together. By improving readers' knowledge of image acquisition techniques and corresponding image processing, the book will help them perform experiments more effectively and cost efficiently as well as analyze and measure more accurately. Long recognized as one of the easiest languages for non-programmers to learn, Python is used in a variety of practical examples. A refresher for more experienced readers, the first part of the book presents an introduction to

Python, Python modules, reading and writing images using Python, and an introduction to images. The second part discusses the basics of image processing, including pre/post processing using filters, segmentation, morphological operations, and measurements. The last part describes image acquisition using various modalities, such as x-ray, CT, MRI, light microscopy, and electron microscopy. These modalities encompass most of the common image acquisition methods currently used by researchers in academia and industry.

Practical Pathology Informatics John Sinard, 2006-03-14 *Practical Pathology Informatics* introduces and demystifies a variety of topics in the broad discipline of pathology informatics with a focus on issues of particular relevance to the practicing anatomic pathologist. Early chapters contain basic information about computers and databases which is applicable to any discipline, with the later chapters containing more anatomic pathology specific topics. Chapters can be read in any order and are divided into short sections. Organized in an easy-to-read format, the book is aimed at providing pathologists and pathology residents with the practical information they need to make intelligent, informed decisions about the deployment and use of information technology tools in their day-to-day practice, and ultimately, better position themselves for informed decision making and intelligent communication with the information systems groups at their institutions. John Sinard, MD, PhD is Associate Professor of Pathology in the Department of Pathology and Director, Pathology Informatics Program at Yale University School of Medicine in New Haven, Connecticut.
