It also addresses rifle platoon and squad non-combat operations across the spectrum of conflict. Long Range Shooting Handbook ,2016-01-31 This book is the complete beginner's guide to long range shooting written in simple every-day language so that it's easy to follow. Included are personal tips and best advice from my years of special operations sniper schooling and experience, and as a sniper instructor. If you are an experienced shooter, this guide will be a resource covering the principles and theory of long range shooting. This is the preliminary book to help you understand fundamental concepts such as MOA vs Mils and external ballistics, that can be like a trusted resource at the range.Learning to shoot long range isn't that difficult. Once you understand the basics, you can start to master your technique and you'll be hitting targets in no time. The author has a series of online instructional videos known for their ability to take seemingly complex areas of long range shooting and breaking them down so that they're easy to understand. This book was motivated by the feedback from those videos. The handbook is broken down into three main categories: What it is/How it works, Fundamentals, and How to use it. What it is/How it works covers equipment, terminology, and basic principles. Fundamentals covers the theory of long range shooting. How to use it gives you practical advice on how to implement what you've learned so far to make you a long range shooter.

Evidence-based Policing Cynthia M. Lum,Christopher S. Koper,2017 Argues that evidence-based policing is not just the process of evaluating police practices, but also about translating that knowledge into digestible and useable forms, as well as institutionalizing research processes and findings into everyday policing systems so that research can be used.

The Future of Policing Jennifer M. Brown,2013-10-08 The police service in England and Wales is facing major challenges in its financing, political oversight and reorganisation of its structures. Current economic conditions have created a wholly new environment whereby cost saving is permitting hitherto unthinkable changes in the style and means of delivery of policing services. In the context of these proposed changes Lord Stevens, formerly Commissioner of the Metropolitan Police Service was asked to chair an Independent Commission looking into the future of policing. The Commission has a wide ranging remit and the papers in this book offer up-to-date analysis of contemporary problems from the novel perspective of developing a reform agenda to assist the Commission. Bringing together contributions from both key academic thinkers and police professionals, this book discusses new policing paradigms, lays out a case for an evidence-based practice approach and draws attention to developing areas such as terrorism, public order and hate crime. Policing is too important to be left to politicians, as the health of a democracy may be judged by the relationship between the police and the public. The aim of this book is to question and present analyses of problems offer new ideas and propose realistically achievable solutions without being so timid as to preserve the status quo. It will be of interest to both academics and students in the fields of criminology and policing studies, as well as professionals in the policing service, NGOs and local authority organisations.

Gunsmithing Roy F. Dunlap,2012 2012 Reprint of 1950 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. Illustrated with over 100 photos and drawings. Roy F. Dunlap's book is self-described as a manual of firearms design, construction, alteration and remodeling for amateur and professional gunsmiths and users of modern firearms. What makes Dunlap's book important is its specificity. For example, instead of merely bringing up the need for a bench grinder, he cites why a 1/4- or 1/3-horsepower, double-shaft model, turning at 1,750 rpm with a wire-brush wheel on one side and a medium-coarse wheel on the other is the best choice. He supports his recommendation by explaining why you'll find wider use for a medium coarse than a finer stone. His chapter entitled Helpful Gunsmith Knowledge, is absolutely crammed with bits of information, and includes tips that he evidently could find no other place for in his book. In the midst of a general discussion on disassembly, for instance, Dunlap digresses to describe in detail a L-shaped tool he made to simplify reassembly of an L.C. Smith double and how to use it. All in all, Dunlap covers soldering and brazing; welding; heat treatment of metals; making and fitting sights and accessories; making, fitting and heat treatment of parts; cartridge information useful to gunsmiths; rifle barrels; chamber and barrel work; rifle-action work; pistol and revolver work; shotgun work; twenty two rim fire arms; browning, blueing and blacking of metal; fitting commercial metallic sights; mounting telescopic sights; wood for gun stocks; design of gun stocks; stock making; checkering; stock repair and alteration; stock finishing; styling the custom rifle; custom metal work; ornamentation of wood and metal; target rifles; the Garand rifle; testing facilities and apparatus; synthetic bedding; cartridge and chamber drawings; and data sheets. A classic work, profusely illustrated.
