*The Last Century of Sea Power, Volume 2* H. P. Willmott,2010-03-22 "An important contribution . . . a thoughtful account of the years preceding the Second World War and, at much greater length, of the war itself." –History In this second volume of his history of naval power in the 20th century, H. P. Willmott follows the fortunes of the established seafaring nations of Europe along with two upstarts—the United States and Japan. Emerging from World War I in command of the seas, Great Britain saw its supremacy weakened through neglect and in the face of more committed rivals. Britain's grand Coronation Review of 1937 marked the apotheosis of a sea power slipping into decline. Meanwhile, Britain's rivals and soon-to-be enemies were embarking on significant naval building programs that would soon change the nature of war at sea in ways that neither they nor their rivals anticipated. By the end of a new world war, the United States had taken command of two oceans, having placed its industrial might behind technologies that further defined the arena of naval power above and below the waves, where stealth and the ability to strike at great distance would soon rewrite the rules of war and of peace. This splendid volume further enhances Willmott's stature as the dean of naval historians. Praise for The Last Century of Sea Power series "The author, dean of naval historians, provides a sweeping look at, and analysis of, the transformation of naval power . . . Willmott is fearless in his judgments." –Seapower "H. P. Willmott is the finest naval historian and among the finest historians of any discipline writing today." –Bernard D. Cole, author of The Great Wall at Sea

**Arsenal of Democracy North: Canadian Naval Shipbuilding of the Second World War** David J Shirlaw, In 1938 Canada's navy comprised a handful of ships and barely 1000 personnel with no ship-building industry to speak of. By 1945, Canada's Navy included 775 vessels and 90,000 personnel. Historians consider the growth and participation of the Royal Canadian Navy in the Battle of the Atlantic and other campaigns as nothing short of remarkable. Little is known of the comparable growth in the shipbuilding industry and its provision of ships of many types to not only the Canadian Navy but the Royal Navy and the United States Navy as well. David Shirlaw's book is an effort to address that shortfall in the nation's history.

**Warships of the Soviet Fleets 1939–1945** Przemyslaw Budzbon, Jan Radziemski, Marek Twardowski, 2022-12-12 Seventy-five years after the end of the Second World War the details of Soviet ships, their activities and fates remain an enigma to the West. In wartime such information was classified and after a brief period of glasnost ('openness') the Russian state has again restricted access to historical archives. Therefore, the value – and originality – of this work is difficult to exaggerate. It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy, listing over 6200 vessels from battleships to river gunboats, and mercantile conversions as well as purpose-built warships. This second part of the three-volume series includes all the remaining fighting vessels not already covered in Volume I. Beginning with the Uragan class – rated as Escort Ships and the first seagoing warships designed by the Soviet Union – the book then moves on to Submarine Hunters, both large and small, Patrol craft, Minelayers and Minesweepers, and unusual types like Floating Artillery Batteries and Anti-Aircraft Defense Ships, concluding with Landing Ships and Craft. Many of these vessels have hitherto been poorly documented but given the nature of the land-centered Soviet war against Germany their contribution should not be underestimated. The details of their service and, not least, the circumstances of their loss, constitute a major addition to Western understanding of the Soviet Navy's war effort. This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships, the Soviet Navy or wider maritime aspects of the Second World War. Furthermore, as recent Russian actions appear to revive Soviet-era aspirations, this book offers both new insights and valuable background of contemporary relevance.

**Spoils of War** Aidan Dodson, Serena Cant, 2020-03-30 An extensive history of enemy fleets following both World Wars, featuring never-before-seen archival and archaeological materials. Spoils of War traces the histories of navies and ships of the defeated powers from the months leading up to the relevant armistices or surrenders to the final execution of the appropriate post-war settlements. In doing so, it discusses the way in which the victorious powers reached their final demands, how these were implemented, and to what effect. The later histories of ships that saw subsequent service, either in their original navies or in those navies which acquired them, are also described. Much use is made of archival materials, and in some cases archaeological, sources, some of which have never previously been used. Ultimately, a wide range of long-standing myths are busted, and some badly distorted modern views are set right. The fascinating narrative is accompanied by lists of all major navy-built (and certain significant ex-mercantile) enemy ships in commission at the relevant date of the armistice or surrender, or whose hulks were specifically listed for attention in post-Second World War allied agreements. These include key dates in their careers and their ultimate fates. This original book, featuring numerous photographs, is sure to become an essential reference tool for all those interested in the naval history of the two World Wars. Praise for Spoils of War "Most highly recommended." –Firetrench "For those who need to finally know the ultimate fate of the often gallant ships that strove against the Allies in both world wars, this is the book." –Julian Stockwin, author of the Thomas Kydd series
