Cases, Materials and Text on Property Law Sjef van Erp,Bram Akkermans,2012-07-23 This casebook presents a deep comparative analysis of property law systems in Europe (ie the law of immovables, movables and claims), offering signposts and stepping stones for the reader wishing to explore this fascinating area. The subject matter is explained with careful attention given to its history, foundations, thought-patterns, underlying principles and basic concepts. The casebook focuses on uncovering differences and similarities between Europe's major legal systems: French, German, Dutch and English law are examined, while Austrian and Belgian law are also touched upon. The book combines excerpts from primary source materials (case law and legislation) and from doctrine and soft law. In doing so it presents a faithful picture of the systems concerned. Separate chapters deal with the various types of property rights, their creation, transfer and destruction, with security rights (such as mortgages, pledges, retention of title) as well as with harmonising and unifying efforts at the EU and global level. Through the functional approach taken by the *Ius Commune* Casebooks this volume clearly demonstrates that traditional comparative insights no longer hold. The law of property used to be regarded as a product of historical developments and political ideology, which were considered to be almost set in stone and assumed to render any substantial form of harmonisation or approximation very unlikely. Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground - so it was thought - could be found. However economic integration, in particular integration of financial markets and freedom of establishment, has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments (eg retention of title). This pressure towards integration has led comparative lawyers to refocus their interest from contract, tort and unjustified enrichment to property law and delve beneath its surface. This book reveals that today property law systems are closer to one another than previously assumed, that common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe.

Governing the Displaced Ali Bhagat,2024-02-15 Governing the Displaced answers a straightforward question: how are refugees governed under capitalism in this moment of heightened global displacement? To answer this question, Ali Bhagat takes a dual case study approach to explore three dimensions of refugee survival in Paris and Nairobi: shelter, work, and political belonging. Bhagat's book makes sense of a global refugee regime along the contradictory fault lines of passive humanitarianism, violent exclusion, and organized abandonment in the European Union and East Africa. Governing the Displaced highlights the interrelated and overlapping features of refugee governance and survival in these seemingly disparate places. In its intersectional engagement with theories of racial capitalism with respect to right-wing populism, labor politics, and the everyday forms of exclusion, the book is a timely and necessary contribution to the field of migration studies and to political economy.

Between Ideology and Utopia A. Liebich,2012-12-06 Nineteenth-century European intellectual history has given rise to such varied and abundant research that one is surprised to find certain important problems long identified and yet still relatively unexplored. Such is the case for certain aspects of the crucial transition from Hegel to Marx, for minority tendencies among French socialists and for the Messianic phenomenon, national and religious, so central to the period, particularly in Eastern Europe, and so rarely studied in detail. Certainly, these lacunae are exemplified by the absence of any comprehensive work on August Cieszkowski whose overall contribution to the history of the period may be marginal but whose specific role in each of the areas mentioned is both significant in itself and illustrative of certain wider problems. Cieszkowski first achieved recognition as the author of the *Prolegomena zur Historiosophie* in 1838. This short tract never became popular among the Berlin Hegelians for whom it was intended but it affected a number of radical intellectuals outside their circle. His next work, *Gott und Palingenesie*, was a defense of personal immortality against Hegelian revisionism. The following year, however, he founded as a bulwark of the Hegelian school the *Philosophische Gesellschaft* against external critics and internal dissolution.
