Students, Society and Politics in Imperial Germany Konrad H. Jarausch,2014-07-14 Konrad H. Jarausch studies the social structure of the German university and the mentality of its students during the Imperial period as an example of a wider European academic desertion of liberalism. He finds that German higher education combined scientific world leadership and competent professional training with an eroding liberal education (Bildung) to create an educated class that was tragically susceptible to the appeal of the Third Reich. Originally published in 1982. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Cooperative Design, Visualization, and Engineering Yuhua Luo,2010-09-14 Many papers in this volume reflect, to some degree, the active, rapid economic development in certain geographic areas in the world such as China, Japan, South Korea, and Eastern Europe, which demand cooperative work, particularly co-erative engineering, more than ever. New concepts and new ideas of cooperative design, visualization, and engineering have emerged to meet the higher demand resulting from the economic development in these areas. Another trend among the papers in this volume is to apply existing concepts and methods to new application areas. The emergence of new concepts can be considered as a signal of fruitful research with its maturity in the field. This can be found in the papers of this year's conference. Cooperative design, visualization, and engineering via cloud computing is a new concept presented in a group of papers in this volume. The concept of cloud has been proposed for cooperative manufacturing, large scale cooperative simulation, and visualization, etc. Applying existing concepts to new application areas or creating new methods based on them is a logical direction to take full advantage of the cooperative design, visualization, and engineering technology. This is no doubt the best way to widen and deepen the knowledge in the field. Typical examples in this volume include the cooperative visualization of DNA microarray data in bioinformatics, astrophysical simulations, natural disaster simulations, and cooperative risk assessment, etc. As the volume editor, I would like to congratulate all the authors for their research and development results, raising cooperative technology to a new level.

The Globally Mobile Family's Guide to Educating Children Overseas Karen A. Wrobbel,2021-09-30 Moving overseas—whether as a missionary, diplomat, military member, or an international businessperson—can be enriching professionally and personally. Those with dependent children, however, need to carefully consider the opportunities and options for their children's education. The Globally Mobile Family's Guide to Educating Children Overseas is the tool parents and the organizations who send them need to make informed and intentional decisions about children's education internationally. After an introductory chapter that overviews some benefits and challenges of global living, the second chapter focuses on intentional planning based on the individual family's educational goals and values. Identifying aspirations and values can guide parents in making educational choices in the global setting. Other chapters describe various options that may be available in locations where expatriates live and work, and discuss advantages, potential limitations, and factors to consider for each. The book also includes thoughts on special educational needs, transitions between options, and other issues that are crucial to the success of an international assignment. The Globally Mobile Family's Guide to Education Children Overseas is research-based but accessibly written for parents who are not education experts. Those who want to explore more deeply will find references and recommendations for further information.

Educational Mobilities and Internationalised Higher Education Peter E. Kahn,Lauren Ila Misiaszek,2022-12-26 Higher education increasingly entails a crossing of national, linguistic and cultural boundaries. Recent years have seen significant expansion in the sector around transnational education and online learning, with students, academic staff, educational programmes and even institutions all ever-more mobile. This expansion is usually seen in unproblematic terms, with economic growth the main priority in view. The challenge that is entailed in pursuing social justice in the face of such global expansion, however, should not be underestimated. This book subjects to critical scrutiny the uncertainties that are associated with internationalised higher education. It explores how the agency of teachers, other members of staff and students is mediated by experiences of inclusion and exclusion. Physical or virtual movement around the globe may have become more straightforward in recent years, but the same cannot be said of intercultural relations in classrooms. Challenges can be expected where concerns, projects and practices of students are pursued in an unfamiliar cultural setting, or where agency crosses over more than one cultural system. Finally, mobility often throws up situations in which privileges are accompanied by distressing challenges. The book teases out the implications of all these issues for teaching in higher education. It will be of interest to researchers and advanced students of education, politics, sociology, human geography and social work. This book was originally published as a special issue of the journal, Teaching in Higher Education.

International Education Hubs Jane Knight,2013-09-11 Education hubs are the newest development in the international higher education landscape. Countries, zones and cities are trying to position themselves as reputed centres for higher education and research. But given higher education's current preoccupation with competitiveness, branding, and economic benefits are education hubs merely a fad, a branding exercise, or are they an important innovation worthy of serious investment and attention? This book tries to answer the question through a systematic and comparative analysis of the rationales, actors, policies, plans and accomplishments for six serious country level education hubs - United Arab Emirates, Qatar, Malaysia, Hong Kong, Singapore and Botswana . The in-depth case studies shows that one size does not fit all. A variety of factors drive countries to prepare and position themselves as an education hub. They include income generation, soft power, modernization of domestic tertiary education sector, economic competitiveness, need for trained work force, and most importantly a desire to move towards a knowledge or service based economy. In response to these different motivations, three different types of education hubs are being developed: the student hub, talent hub, and knowledge/innovation hub. Scholars, policy makers, professionals, students and senior decision makers from education, economics, geography, public policy, trade, migration will find that this book challenges some assumptions about crossborder education and provides new insights and information.

Teaching in Nursing E-Book Diane M. Billings,Judith A. Halstead,2019-05-03 The perfect all-in-one guide for future nurse educators! The award-winning Teaching in Nursing: A Guide for Faculty, 6th Edition prepares you for the day-to-day challenges of teaching future nurses for practice in today's rapidly evolving healthcare system. This comprehensive resource is the only one of its kind to cover all four components of nursing education: teaching and learning, curriculum, evaluation, and technology-empowered learning. You'll benefit from the expert guidance on such key issues as curriculum and test development, diverse learning styles, the redesign of healthcare systems, and advances in technology and information. Plus, the 6th edition includes a unique new chapter on Global Health and Curricular Experiences along with updated information on technology-empowered learning, the flipped classroom, interprofessional education, interprofessional collaborative practice, and much more. Comprehensively addresses all four components of nursing education including teaching and learning, curriculum, evaluation, and technology-empowered learning. Coverage of concept-based curricula includes strategies on how to approach and implement concept-based instruction. Pedagogical aids include Evidence-Based Teaching boxes, covering such issues as how to do evidence-based teaching; applications of evidence-based teaching; implications for faculty development, administration, and the institution; and how to use the open-ended application questions at the end of each chapter for faculty-

guided discussion. Strategies to promote critical thinking and active learning are incorporated throughout the text, highlighting various evaluation techniques, lesson planning insights, and tips for developing examinations. Guidance on teaching in diverse settings addresses such topics as the models of clinical teaching, teaching in interdisciplinary settings, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Strong emphasis on teaching clinical judgment, new models of clinical education, and responding to needs for creating inclusive multicultural teaching-learning environments. NEW! Updated content throughout reflects the latest evidence-based guidelines for best practices in teaching and learning. NEW! UNIQUE chapter on Global Health and Curricular Experiences focuses on internationalization of the nursing curriculum with an emphasis on leading international learning experiences; policies, procedures, and guidelines for overseas study and global and health competencies for health professions programs. NEW! Enhanced pedagogy includes additional illustrations, tables, and boxes. NEW! Expanded interprofessional education chapter, provides you with strategies for effective teaching in an interprofessional healthcare environment.

Climate Change Education for Sustainable Development Keengwe, Jared, Nyatuka, Benard O., 2023-08-25 Climate Change Education for Sustainable Development, led by experienced editor Jared Keengwe, is a must-read for academic scholars concerned about the impact of climate change and want to foster sustainable development. The book highlights the importance of climate change education in equipping individuals with the knowledge, skills, values, and attitudes needed to confront the impact of climate change. It also identifies the challenges in realizing the anticipated objectives, including limited understanding of the weather change phenomenon, less effective pedagogical approaches, and weak partnerships among critical stakeholders. The book covers various topics such as teaching principles, pedagogical perspectives, theoretical foundations and alignment, professional orientation, pedagogical strategies, learner support, contextual issues, and reflective practice considerations. It is intended for climate change analysts, policy makers, curriculum designers, faculty, educators, and other stakeholders interested in averting the impact of climate change and fostering sustainable development. With its comprehensive coverage and the editor's expertise, Climate Change Education for Sustainable Development is the perfect resource for anyone seeking to deepen their understanding of climate change education and its role in sustainable development.

The Internationalisation of Higher Education Eva Hartmann, 2014-10-10 We are in the middle of a fundamental transformation of the global order which is challenging the supremacy of the USA, and to a certain extent of Europe, in economic and also in normative terms. The financial crisis has further accentuated this shift in the post-Cold War architecture, with emerging economies becoming an engine of globalisation. The chapters in this volume shed light on the role of higher education and its internationalisation in this context, focusing on the different regions of the world. The new role of international organisations like UNESCO is also examined. The empirical findings of these studies are part of a new research agenda in higher education studies, one that goes beyond a 'higher educationism' limiting itself to a simple description of institutional changes in this sphere in the light of internationalisation. The different case studies advance an interdisciplinary perspective, drawing on accounts from critical and postcolonial theory, international relations and international political economy. This perspective sheds light on the strategic selectivity of the transformation and the struggles related to this major transformation of higher education and its contribution to a new global architecture. This book was originally published as a special issue of Globalisation, Societies and Education.

Sustainable Health and Long-Term Care Solutions for an Aging Population Fong, Ben, Ng, Artie, Yuen, Peter, 2017-06-30 Lasting healthcare for the entire population, specifically the elderly, has become a main priority in society. It is imperative to find ways to boost the longevity of healthcare services for all users. Sustainable Health and Long-Term Care Solutions for an Aging Population is a pivotal reference source featuring the latest scholarly research on issues pertinent to health cost and finding effective ways of financing healthcare for the elderly. Including coverage on a number of topics such as provider accreditation, corporate social responsibility, and data management, this book is ideally designed for policy makers, academicians, researchers, and advanced-level students seeking current research on the innovative planning and development of healthcare.

Recruiting International Students in Higher Education Sylvie Lomer, 2017-07-24 This book offers a comprehensive overview and critical analysis of the UK's policy on recruiting international students. In a global context of international education policy, it examines changes from New Labour policies under Tony Blair's Prime Minister's Initiative, to the more recent Coalition and Conservative Government policies in the International Education Strategy. The research uses a text-based approach to primary research, adopting a critical framework developed by Carol Bacchi ('what is the problem represented to be?'). The book argues that international student policy can be reduced to reasons for and against recruiting international students; in doing so, students are represented as ambassadors for the UK or tools in its public diplomacy, consumers and generators of reputation, means to get money, and as migrants of questionable legitimacy. These homogenizing representations have the potential to shape international education, implicating academics as agents of policy, and infringing on students' self-formation. The book will be compelling reading for students and researchers in the fields of education and sociology, as well as those interested in education policy-making.

Inclusion, Epistemic Democracy and International Students Aneta Hayes, 2019-04-23 This book examines the Teaching Excellence Framework, and how this and various other educational policies create conditions for the exclusion of cross-border learners. As universities become increasingly globalised and seek to recruit international students, this volume explores how the TEF can shape attitudes towards international students in UK universities, with particular regard to how current metrics may cause damage not only to the students but the universities that receive them. However, the author examines how the TEF and its equivalent could in fact foster and sustain the realisation of international students as democratic equals in university classrooms. Divided into three parts, this book begins to theorise the philosophical basis for a TEF ranking that could create an alternative system – in doing so, helping home students access benefits arising from internationalisation. This pioneering book is a call to action for broader institutional epistemic justice, and will appeal to students and scholars of international students, the TEF and teaching excellence policies more generally.

Smartphone-based Learning in the Japanese ESL Classroom Nicolas Gromik, 2017-05-11 Mobile Assisted Learning emerged from Computer Assisted Learning, with researchers extending computer-based activities to mobile platforms, but differs from the latter in many ways. First, it is obviously mobile, but, second, smartphones have converged many features and software that were previously accessible through a range of digital tools. Thirdly, Mobile Assisted Learning allows interaction with social media. Educators are well-advised to consider smartphone video-based learning and to understand the many possibilities it affords. This book provides an account of the integration of smartphone video recording in the language classroom. It outlines and reports on the implementation process and the practical issues related to this learning method. Using simple digital storytelling, and mini-documentary filmmaking, students are able to learn to speak in a foreign language, while at the same time exploring and experimenting with video production. As such, this book will take readers on a journey through various educational concepts that enhance the formulation of a smartphone based learning approach, as well as suggesting that digital video production is not just a task, it is a 21st century skill necessary for all academics and learners.

Migration, Borders and Education Jessica Gerrard, Arathi Sriprakash, 2020-05-21 This book brings together high-quality international research which examines how migration and borders are experienced in education. It presents

new conceptualisations of education as a ‘border regime’, demonstrating the need for closer attention to ‘border thinking’, and diasporic and transnational analyses in education. We live in a time in which borders – material and political – are being reasserted with profound social consequences. Both the containment and global movement of people dominate political concerns and inevitably impact educational systems and practices. Providing a global outlook, the chapters in this book present in-depth sociological analyses of the ways in which borders are constituted and reconstituted through educational practice from a diverse range of national contexts. Key issues taken up by authors include: immigration status and educational inequalities; educational inclusion and internal migration; ‘curricula nationalism’ and global citizenship; education and labour; the educational experiences of refugees and the politics of refugee education; student migration and adult education; and nationalism, colonialism and racialization. This book was originally published as a special issue of International Studies in Sociology of Education.

Student Mobilities and International Education in Asia Ravinder K. Sidhu, Ho Kong Chong, Brenda S. A. Yeoh, 2019-09-21 This book investigates why students choose to study in key Asian cities, and how this trend relates to the strategic intent of states and universities to build ‘knowledge economies’ and ‘world-class’ profiles. Drawing on substantial theoretical and empirical research, the authors examine the emotional geographies of East Asian international education, and offer new analytical insights into the relations between emotions, nation and subjectivity. The book challenges Eurocentric views of Asia as a space of volatile nationalist rivalries. By offering richly textured portraits of mobile students, it questions contemporary memes about the utility-maximising Asian learner. This is a thought-provoking text that will appeal to university researchers, academics and students interested in the changing architectures of international education.

Supporting Student Diversity in Higher Education Michelle Morgan, 2013-07-03 Supporting Student Diversity in Higher Education is a working manual that is designed to help managers, academics and members of the professional service teams within universities, recruit and support a diverse student body across the student lifecycle at the same time as delivering a quality student experience in a challenging and pressured environment. Using the Student Experience Practitioner Model as a framework, this book helps colleagues responsible for improving the student experience navigate their way through the maze of student diversity across all levels of study, determining what to deliver, how to deliver it and to whom. It interlinks academic, welfare and support activities at faculty department, school, course and university level to support the student in their university journey. Containing 40 practical and innovative undergraduate UK and international case studies from across 12 countries spanning four continents, this book provides practical examples of recruiting and supporting a diverse student body. It includes initiatives to support: mature students (e.g. academic re-engagement); students with special needs (e.g. dyslexia and other disabilities); international students (e.g. language support requirements); students at risk (e.g. lower socio-economic groups, care leavers, male learners); Transfer and direct entry students (e.g. supporting students through this transition); individual learners and their learning needs (impact of personality on learning); students who support students (e.g. peer support). This book will be of great use to senior and middle administrative managers and academics involved in the recruitment, retention and progression of students; and also to anyone involved in education policy and students aiming to work in higher education.

A Cultural History of Education in the Age of Empire Heather Ellis, 2023-04-20 A Cultural History of Education in the Age of Empire presents essays that examine the following key themes of the period: church, religion and morality; knowledge, media and communications; children and childhood; family, community and sociability; learners and learning; teachers and teaching; literacies; and life histories. The period between 1800 and 1920 was pivotal in the global history of education and witnessed many of the key developments which still shape the aims, context and lived experience of education today. These developments included the spread of state sponsored mass elementary education; the efforts of missionary societies and other voluntary movements; the resistance, agency and counter-initiatives developed by indigenous and other colonized peoples as well as the increasingly complex cross border encounters and movements which characterized much educational activity by the end of this period. An essential resource for researchers, scholars, and students in history, literature, culture, and education.

Revolutionizing Modern Education through Meaningful E-Learning Implementation Khan, Badrul H., 2016-06-27 It is not enough for an instructor to merely present facts to their students; the presentation of information must be made accessible and understandable in the context of the student. As communication technologies become more widely available, traditional educational institutions are no longer the only source of information. What is now necessary is to reconsider what makes for meaningful education and apply those practices to digital natives. Revolutionizing Modern Education through Meaningful E-Learning Implementation evaluates the means by which online education can be improved and systematically integrated more fluidly into traditional learning settings, with special focus on the ethical, pedagogical, and design aspects of building online courses. This publication aims to elucidate the rewards and follies of online education for educators, administrators, programmers, designers, and students of education.

Global Higher Education and the COVID-19 Pandemic Chitra Krishnan, Kavita Thapliyal, Gurinder Singh, 2023-06-23 This timely volume throws light on the challenges faced by the higher education industry during the disruption from the pandemic and offers solutions for the future of higher education. It discusses methodological approaches that look at how the pandemic fostered the rise of e-learning, blended and virtual learning, and teachers’ changing roles. The book examines the role of teaching-learning practices in the era of COVID-19, the impact of digital learning on students, and the psychological and emotional impact on students from digital learning and blended learning during the pandemic.

Technology Supported Innovations in School Education Pedro Isaias, Demetrios G. Sampson, Dirk Ifenthaler, 2020-10-09 This volume provides a comprehensive and contemporary depiction of the swift evolution of learning technologies and the innovations that derive from their deployment in school education. It comprises cases studies, research focused on emergent technologies and experiments with existing tools in a wide range of scenarios. The studies included in this volume explore the conceptual and practical aspects of technologies that are used to support learning, with a multidisciplinary approach that encompasses all levels of education. The three sections of this volume emphasise the use of digital technologies from the viewpoint of different fields of expertise, explore multiple educational settings where technology was implemented to support the various stages of the learning process, and underline strategies, tools and technologies that play a crucial role in the professional development of teachers.

Global Perspectives on International Student Experiences in Higher Education Krishna Bista, 2018-10-03 Global Perspectives on International Student Experiences in Higher Education examines a wide range of international student experiences empirically from multiple perspectives that includes socio-cultural identities, contextual influences on their learning experiences, their wellbeing experiences, and their post-study experiences. This collection sheds light on the over five million students who cross geographical, cultural, and educational borders for higher education outside of their home countries. This book consists of nineteen chapters spread across four sections. Throughout the book, contributors question the existing assumptions and values of international student programs and services, reexamine and explore new perspectives to present the emerging challenges and critical evaluations of student experiences and their identities. Offering a rich understanding of these students and their global college experiences in Africa, Asia, Australia, Europe and Americas, this book offers research-based strategies to effectively

recruit, engage, support, and retain international students as they participate in higher educational settings around the world. This book provides resource material to benefit educators, policymakers, and staff who work closely with international students in higher education.
