The Puzzler A.J. Jacobs, 2023-04-25 The New York Times bestselling author of *The Year of Living Biblically* goes on a rollicking journey to understand the enduring power of puzzles: why we love them, what they do to our brains, and how they can improve our world. “Even though I’ve never attempted the New York Times crossword puzzle or solved the Rubik’s Cube, I couldn’t put down *The Puzzler*.”—Gretchen Rubin, author of *The Happiness Project* and *Better Than Before* What makes puzzles—jigsaws, mazes, riddles, sudokus—so satisfying? Be it the formation of new cerebral pathways, their close link to insight and humor, or their community-building properties, they’re among the fundamental elements that make us human. Convinced that puzzles have made him a better person, A.J. Jacobs—four-time New York Times bestselling author, master of immersion journalism, and nightly crossword—set out to determine their myriad benefits. And maybe, in the process, solve the puzzle of our very existence. Well, almost. In *The Puzzler*, Jacobs meets the most zealous devotees, enters (sometimes with his family in tow) any puzzle competition that will have him, unpacks the history of the most popular puzzles, and aims to solve the most impossible head-scratchers, from a mutant Rubik’s Cube, to the hardest corn maze in America, to the most sadistic jigsaw. Chock-full of unforgettable

adventures and original examples from around the world—including new work by Greg Pliska, one of America's top puzzle-makers, and a hidden, super-challenging but solvable puzzle—The Puzzler will open readers' eyes to the power of flexible thinking and concentration. Whether you're puzzle obsessed or puzzle hesitant, you'll walk away with real problem-solving strategies and pathways toward becoming a better thinker and decision maker—for these are certainly puzzling times.

Deviously Difficult Mind-Bending Puzzles Ivan Moscovich, 2004 Play supergames for the super-smart. These mind-blowing, brain-bending puzzles use a deviously tricky mix of geometry and combinatronics (the different ways objects can be arranged), and emphasize structure,

pattern, and colour. Everything's visual and as enticing to the eye as to the wits. Try to solve the Impossible Domino Bridge Problem: at first glance, the top-heavy structure looks as if it would just tumble. But give it some thought and you'll realize that not only can it be built but that you can build it yourself. Take the Ingenious Tangram Challenge; put together a Stars Puzzle; and Draw, Halve, and Quarter all the rooms in a house into equal-size spaces. There's illuminating background information on the puzzles' origins, too.
