**Looking for the Enemy** Bette Dam,2021-12-15 For twenty years, the Taliban was the number one enemy of Western forces in Afghanistan. But it was an enemy that they knew little about, and about whose founder and leader, Mullah Omar, they knew even less. Armed with only a fuzzy black-and-white photo of the man, investigative journalist Bette Dam decided to track down the reclusive Taliban chief a decade back. But in the course of what had seemed an almost impossible job, she got to know the Taliban inside out, realized how dangerously misinformed the global forces fighting it were, and made a startling discovery about the elusive Omar's whereabouts. The outcome of a five-year-long pursuit, *Looking for the Enemy* is a woman journalist's epic story that takes the reader deep into the dangerous mountains and war-ravaged valleys of Afghanistan as it throws up several unknowns about an organization that is now once again at the helm in one of the world's most fragile states.

Workplace Health Surveillance Neil A. Maizlish,2000-10-26 This is the first textbook that makes workplace health surveillance accessible to a broad audience. Step-by-step, it shows how to establish or improve a surveillance system. The reader learns about defining objectives, seeking organizational

support, forming a surveillance workgroup, collecting data, calculating basic injury and illness statistics, designing databases, analyzing and interpreting surveillance data, setting priorities, making protocols for follow-up and case management, marketing results and giving feedback, and evaluating surveillance systems. Links are emphasized between surveillance and workplace follow-up, community-based intervention programs, cost-benefit analysis, and other prevention activities. Readers get a solid foundation of epidemiologic concepts reinforced by examples that use simple arithmetic. Leading practitioners from government, business, and unions illustrate the surveillance of injuries, lead poisoning, pesticide illness, cumulative trauma disorders, asthma, noise-induced hearing loss, silicosis, cancer, and chemical and physical hazards. Non-traditional data sources are examined, including health and disability insurance, hospital discharge, and poison control centers. Disability surveillance, return-to-work, and the quality/effectiveness of health services also are explored. Surveillance is shown to be an action-oriented tool for decision-making that is the key to a successful health and safety program.
