When the Scientist Presents Jean-Luc Lebrun,2009-08-21 Check out the author's website at www.scientific-presentations.com This book looks at the presenting scientist from a novel angle: the presenter-host. When scientists give a talk, the audience (“guests”) expects the title of the talk to determine presentation content, they require understandable slides, and they demand visible and audible scientific authority. To each expectation corresponds a set of skills: personal (voice, host qualities, time control), technical (presentation tools and slide design), and scientific (Q&A, slide content). The author takes an original human factor view of the presentation delivery, in which the audience is easily distracted, rapidly forgetful, and increasingly impatient. Thus, insightful pointers are given on how to deliver the talk, how to craft the slides, and how to prevent the computer from rendering the presenting host-scientist into a “ghost”. In addition, the book goes in-depth over the treatment of questions by examining the motives and style of the questioners, and advising on how best to answer to each type of questioner. The book comes with a DVD for audio and video examples, and includes essential PowerPoint and Keynote techniques that a presenter cannot live without. Contents: Content Selection: Paper and Oral Presentation: The Difference Content Filtering Criteria Audience Expectations: General Audience Expectations Scientific Audience Expectations The Slides: Five Slide Types, Five Roles Slide Design The Presenter: The Master of Tools Scientist and Perfect Host The Grabbing Voice The Answerable Scientist Readership: Students, graduates, postgraduates, and professionals seeking help in improving their scientific presentation skills.

The Exceptional Presenter Goes Virtual Timothy J. Koegel,2010 This is a critical tool for any professional who needs to deliver effective, engaging presentations at a distance. It covers all types of virtual, online, or distance presentations. It includes conference calls, webinars, virtual meetings, video blogs. Sales calls, speeches, interviews, negotiations, this book covers it all, offering practical tips, tricks, worksheets, and checklists for overcoming the hurdles to engagement that occur when you aren't in the same room with your audience. This is the first of its kind on the national market. Every day, more and more professionals are required to present to distant audiences - to save money, to save travel time and costs, and to connect with new customers and colleagues. No other book on the market offers business people the tools they need to approach these presentations with confidence. It is written by a presentation guru at the forefront of online engagement. Through his work with such companies as Cisco Systems, a leader in virtual technology, and Forbes Online, the leader of online content delivery, Timothy Koegel has garnered unique insights into what it takes to deliver persuasive, compelling presentations at a distance.

File > New > Presentation Simon Guest,2013-11-01 If you're anything like me, you've experienced far too many presentations in the IT industry that fail to connect with the audience and never achieve what they set out to do. Presentations that reel off facts, yet don't tell a story. Presentations that are overwhelmed with pages of text and bullet points. Presentations that show diagrams that no one understands. Presentations that go well under- or overtime, and are clearly not rehearsed. Presentations where demos routinely fail in front of packed crowds. All delivered by presenters who make numerous mistakes while they are on stage. File > New > Presentation was written to give you the tools and techniques to avoid these pitfalls, and dramatically increase your presentation skills. These skills go well beyond just creating a slide deck, and include understanding your audience, planning the structure of your talk, rehearsing, delivering demos, preparation, and improving what you do behind the podium. With recommendations targeted towards software developers and other technical professionals, you'll gain the knowledge to take your next presentation - and maybe even your career - to the next level.

MindXpres: Conceptual and Technical Foundations for Next Generation Presentation Solutions Reinout Roels,2019-05-27 Presentation tools such as PowerPoint were initially created to simulate physical slides and have inherited a lot of their limitations. In this dissertation we identify the shortcomings and unmet user needs in presentation software by means of literature study, observations, a survey and the programmatic analysis of over 12000 PowerPoint documents. The results indicate that user needs are slowly evolving while existing software has hardly changed over the last 30 years. We motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well-integrated solutions for the identified shortcomings. The resulting MindXpres platform consists of a new conceptual framework, content model, information system and presentation engine. We present MindXpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented in the existing tools. We further demonstrate the flexibility of the MindXpres platform by discussing a wide range of proof-of-concept plug-in solutions for the identified shortcomings and unmet user needs.
