*Developing a Model of Scoring Rubric of Authentic Assessment* Dr. Elsin Sihombing, M.Pd,2022-02-15  
Language authentic assessment emphasizes the language production ability more than theory only (linguistics competence) in daily communication to meet various needs of the students. Since most of the teachers especially in Lubuklinggau South Sumatera were still unfamiliar with authentic assessment ( based on the preliminary study by the researcher), therefore, it was important to familiarize them to enable them in assessing the learners authentically and properly, especially in English based on K-'13 curriculum requirements. During conducting this research, English teachers seemed so thankful to have such a chance to know and experience much about the authenticity of learning that was biased from learning assessment. They can state now that good learning producing by good assessment, authentic assessment conditioning authentic learning, which lies not only on the product but much more important lies on the process.

### The Rise and Fall of National Test Scores

Gilbert R. Austin, Herbert Garber, 2013-10-22 The Rise and Fall of National Test Scores examines, in some depth, the nature of test score changes over an extended period of time and in a broad range of subject matters and levels of schooling. The book contains chapters contributed by experts on various aspects of educational tests and score interpretation and uses. The text discusses the interpretations of trends in college admissions test scores and questions about the post-admission performance of ethnic minority students. The book examines general school achievement trends of high school students and the trends observed in broad-based testing programs of the National Assessment of Educational Progress (NAEP). The complexities involved in obtaining dependable data with which to make informed judgments about reading achievement trends are examined. The text further tackles the positive and negative trends in academic achievement in Science with particular emphasis on the effects of curriculum revision; as well as the problems of mathematics testing. The book then describes test score trends and problems in Great Britain and Ireland, with attention given to the similarities and differences of those countries and the United States. Educators, researchers, political leaders, and informed, interested laymen will find the book invaluable.

**Making the Grades** Todd Farley,2011-01-01 In this alternately amusing and appalling exposé of the standardized test industry, fifteen-year veteran Todd Farley describes statisticians who make decisions about students without even looking at their test answers; state education officials willing to change the way tests are scored whenever they don't like the results; and massive, multi-national, for-profit testing companies who regularly opt for expediency and profit over the altruistic educational goals of teaching and learning. Although there are absurd moments--as when Farley and coworkers had to grade students based on how they described the taste of their favorite food-- the enormous importance of standardized tests in the post "No Child Left Behind" era make this no laughing matter. "This book is dynamite! The nice personal voice makes it utterly accessible and enticing, wholly apart from the terribly important ammunition it provides to those of us in the 'testing wars' at national and local levels."--Jonathan Kozol, author of *Savage Inequities*
