Andrea Jensen

The Incident Report Martha Baillie, 2014-09-22 Strikingly original in its structure, composed of highly distilled, lyric reports in which you discover if Rigoletto, the hunchbacked jester from Verdi's opera is alive and living in Toronto. In a Toronto library, notes appear, written by someone who believes he is Rigoletto, the hunchbacked jester from Verdi's opera. Convinced that the young librarian, Miriam, is his daughter, he promises to protect her. Little does he know how much loss she has already experienced; or does he? Strikingly original in its structure, composed of 140 highly distilled, lyric "reports," the novel depicts the tensions between private and public storytelling and the subtle dynamics of a socially exposed workplace. Reports on bizarre public behavior intertwine with reports on the private life of the novel's narrator. Both mystery and love story, *The Incident Report* daringly explores the fragility of our individual identities.

The Incident Report Martha Baillie, 2009-04-27 In a Toronto library, home to the mad and the marginalized, notes appear, written by someone who believes he is Rigoletto, the hunchbacked jester from Verdi's opera. Convinced that the young librarian, Miriam, is his daughter, he promises to protect her from grief. Little does he know how much loss she has already experienced; or does he? *The Incident Report*, both mystery and love story, daringly explores the fragility of our individual identities. Strikingly original in its

structure, comprised of 140 highly distilled, lyric reports, the novel depicts the tensions between private and public storytelling, the subtle dynamics of a socially exposed workplace. The Incident Report is a novel of gestures, one that invites the reader to be astonished by the circumstances its characters confront. Reports on bizarre public behaviour intertwine with reports on the private life of the novel's narrator. Shifting constantly between harmony and dissonance, elegant in its restraint and excitingly contemporary, The Incident Report takes the pulse of our fragmented urban existence with detachment and wit, while a quiet tragedy unfolds.

Translating Systems Thinking into Practice Natassia Goode,Paul M.

Salmon,Michael Lenne,Caroline Finch,2018-09-21 Systems thinking tells us that human error, violations and technology failures result from poorly designed and managed work systems. To help us understand and prevent injuries and incidents, incident reporting systems must be capable of collecting data on contributory factors from across the overall work system, in addition to factors relating to the immediate context of the event (e.g. front-line workers, environment, and equipment). This book describes how to design a practical, usable incident reporting system based on this approach. The book contains all the information needed to effectively design and implement a new incident reporting system underpinned by systems thinking. It also provides guidance on how to evaluate and improve existing incident reporting systems so they are practical for users, collect good quality data, and reflect the principles of systems thinking. Features Highlights the key principles of systems thinking for designing incident reporting systems Outlines a process for developing and testing incident reporting systems Describes how to evaluate incident reporting systems to ensure they are practical, usable, and collect good quality data

Provides detailed guidance on how to analyze incident data, and translate the findings into appropriate incident prevention strategies

OHS Electronic Management Systems for Construction Imriyas

Kamardeen,2013-01-25 Occupational accidents have a massive personal and social cost as well as a major financial cost. The construction industry is one of the most dangerous industries, accounting for around 20-30% of all occupational deaths worldwide. The accompanying financial cost is either absorbed directly or passed on in the form of higher insurance costs. In addition, regulatory bodies have started to impose legal accountability on all the parties along the construction supply chain. OHS is hard to implement. Construction projects are complex, with a fluid workforce, and the regulatory framework is highly elaborate. OHS Electronic Management Systems for Construction presents a theoretical framework which is designed to overcome these difficulties, integrating OHS

management in construction using knowledge management and web technologies. This framework is explained in a clear step-by-step way, as are features such as a systematically developed corporate safety memory, and a virtual learning portal to facilitate on-demand safety training. The ultimate aim of this book is to aid the development of an established safety culture at the organisational level, and the formation of an industry-wide community of safety practice. This is essential reading for OHS professionals and construction managers attempting to change their industry for the better, as well as advanced students and researchers.

The Executive MBA in Information Security Jr., John J. Trinckes, 2009-10-09 According to the Brookings Institute, an organization's information and other intangible assets account for over 80 percent of its market value. As the primary sponsors and implementers of information security programs, it is essential for those in key leadership positions to possess a solid understanding of the constantly evolving fundamental conc

Frontex and Human Rights Melanie Fink, 2019-02-19 This book analyses the allocation of responsibility for human rights violations that occur in the context of border control or return operations coordinated by Frontex. The analysis is conducted in three

parts. The first part examines the detailed roles and powers of Frontex and the states involved during joint operations, focussing on the decision-making processes and chains of command. The second and third parts develop general rules that govern the allocation of responsibility under public international law, ECHR law, and EU non-contractual liability law in order to apply them to Frontex operations. To illustrate the practical implications of the findings, the study uses four hypothetical scenarios that are based on situations that have in the past given rise to human rights concerns. The book concludes that whilst responsibility for most human rights violations lies with the host state of an operation, it often shares this responsibility with participating states who contribute large assets as well as Frontex. However, the book also exposes how difficult it is for individuals to find a place for bringing complaints against violations of their human rights suffered at the EU's external borders. This casts doubts on whether the current legal framework offers them an effective remedy.
