*Smartphones and the News* Andrew Duffy, 2020-05-11 This book reviews recent studies into smartphones and the news, and argues that the greatest impact on news of the smartphone as a dominant technological artefact is to shift it away from an authoritative, fixed ‘first draft of history’ to become a fluid, flexible stream of information from which each individual constructs their own meaning. The news has taken on a new life, fragmented by five billion smartphones, disrupting not just an industry but also the significance of the news in societies worldwide. This book considers how the smartphone has changed the production of journalism through contributions from the general public, the dominance of visual over textual media, the shift towards brevity, the challenges of verification, and the possibilities offered by the multi-skilled mobile journalist, or MoJo. The book looks at the manner in which news is promoted and distributed via smartphones, specifically its place on social media. Finally, it considers how news-on-smartphones fits into consumers’ lives, and how their use of the smartphone to access news is impacting back on its production. This is an insightful research text for journalism students and scholars with an interest in digital journalism, new media, and the intersection between technology and communication.

**Dopamine Nation** Dr. Anna Lembke, 2023-01-03 INSTANT NEW YORK TIMES and LOS ANGELES TIMES BESTSELLER “Brilliant . . . riveting, scary, cogent, and cleverly argued.”—Beth Macy, author of *Dopesick*, as heard on *Fresh Air* This book is about pleasure. It’s also about pain. Most important, it’s about how to find the delicate balance between the two, and why now more than ever finding balance is essential. We’re living in a time of unprecedented access to high-reward, high-dopamine stimuli: drugs,

food, news, gambling, shopping, gaming, texting, sexting, Facebooking, Instagramming, YouTubing, tweeting . . . The increased numbers, variety, and potency is staggering. The smartphone is the modern-day hypodermic needle, delivering digital dopamine 24/7 for a wired generation. As such we've all become vulnerable to compulsive overconsumption. In *Dopamine Nation*, Dr. Anna Lembke, psychiatrist and author, explores the exciting new scientific discoveries that explain why the relentless pursuit of pleasure leads to pain . . . and what to do about it. Condensing complex neuroscience into easy-to-understand metaphors, Lembke illustrates how finding contentment and connectedness means keeping dopamine in check. The lived experiences of her patients are the gripping fabric of her narrative. Their riveting stories of suffering and redemption give us all hope for managing our consumption and transforming our lives. In essence, *Dopamine Nation* shows that the secret to finding balance is combining the science of desire with the wisdom of recovery.

*The Homebrew Industrial Revolution* Kevin A. Carson, 2010 A history of the rise and fall of Sloanist mass production, and a survey of the new economy emerging from the ruins: networked local manufacturing, garage industry, household microenterprises and resilient local economies.

Bringing Fusion to the U.S. Grid National Academies of Sciences Engineering and Medicine, National Academy of Engineering, Division on Earth and Life Studies, Division on Engineering and Physical Sciences, Nuclear and Radiation Studies Board, Board on Energy and Environmental Systems, Board on Physics and Astronomy, Committee on the Key Goals and Innovation Needed for a U S Fusion Pilot Plant, 2021-11-17 Fusion energy offers the prospect of addressing the nation's energy needs and

contributing to the transition to a low-carbon emission electrical generation infrastructure. Technology and research results from U.S. investments in the major fusion burning plasma experiment known as ITER, coupled with a strong foundation of research funded by the Department of Energy (DOE), position the United States to begin planning for its first fusion pilot plant. Strong interest from the private sector is an additional motivating factor, as the process of decarbonizing and modernizing the nation's electric infrastructure accelerates and companies seek to lead the way. At the request of DOE, Bringing Fusion to the U.S. Grid builds upon the work of the 2019 report Final Report of the Committee on a Strategic Plan for U.S. Burning Plasma Research to identify the key goals and innovations - independent of confinement concept - that are needed to support the development of a U.S. fusion pilot plant that can serve as a model for producing electricity at the lowest possible capital cost.

**Digital agriculture report: Rural e-commerce development experience from China** Food and Agriculture Organization of the United Nations, Zhejiang University, 2021-08-25 This publication, produced by FAO and Zhejiang University, examines how rural e-commerce could advance the digital transformation of agri-food systems, including increasing production efficiency, expanding farmers' market access, improving poverty alleviation, fostering agricultural entrepreneurship, and attracting young generations back to their villages for economic revival and rural revitalization. It is highlighted that an enabling ecosystem with favourable government policies and strategies, public-private partnerships and innovative business models is of great importance to accelerate the development of rural areas in China, and generate larger economic, social and environmental impacts. As the largest developing country in the

world, the experience of digital agriculture transformation in China could be shared with other developing countries. The report also discusses some of the challenges encountered and lessons learned during the development of rural e-commerce, as well as the proposals for the way forward.

**Star Power** Alain Bécoulet, 2023-09-19 A concise and accessible explanation of the science and technology behind the domestication of nuclear fusion energy. Nuclear fusion research tells us that the Sun uses one gram of hydrogen to make as much energy as can be obtained by burning eight tons of petroleum. If nuclear fusion—the process that makes the stars shine—could be domesticated for commercial energy production, the world would gain an inexhaustible source of energy that neither depletes natural resources nor produces greenhouse gases. In *Star Power*, Alan Bécoulet offers a concise and accessible primer on fusion energy, explaining the science and technology of nuclear fusion and describing the massive international scientific effort to achieve commercially viable fusion energy. Bécoulet draws on his work as Head of Engineering at ITER (International Thermonuclear Experimental Reactor) to explain how scientists are trying to “put the sun in a box.” He surveys the history of nuclear power, beginning with post–World War II efforts to use atoms for peaceful purposes and describes how energy is derived from fusion, explaining that the essential principle of fusion is based on the capacity of nucleons (protons and neutrons) to assemble and form structures (atomic nuclei) in spite of electrical repulsion between protons, which all have a positive charge. He traces the evolution of fusion research and development, mapping the generation of electric current through fusion. The ITER project marks a giant step in the development of fusion energy, with the potential to demonstrate the feasibility of a nuclear fusion reactor. *Star Power* offers

an introduction to what may be the future of energy production.

**Sport and the Pandemic** Paul M. Pedersen, Brody J. Ruibley, Bo Li, 2020-09-28 This book takes a close look at how the sport industry has been impacted by the global Coronavirus pandemic, as entire seasons have been cut short, events have been cancelled, athletes have been infected, and sport studies programs have moved online. Crucially, the book also asks how the industry might move forward. With contributions from sport studies researchers across the world, the book offers commentaries, cases, and informed analysis across a wide range of topics and practical areas within sport business and management, from crisis communication and marketing to event management and finance. While Covid-19 will inevitably cast a long shadow over sport for years to come, and although the situation is fast-evolving and the future is uncertain, this book offers some important early perspectives and reflections that will inform debate and influence policy and practice. A timely addition to the body of knowledge regarding the pandemic, this is an important resource for researchers, students, practitioners, the media, policy-makers, and anybody who cares about the future of sport.

**Laboratory Life** Bruno Latour, Steve Woolgar, 2013-04-04 This highly original work presents laboratory science in a deliberately skeptical way: as an anthropological approach to the culture of the scientist. Drawing on recent work in literary criticism, the authors study how the social world of the laboratory produces papers and other texts, and how the scientific vision of reality becomes that set of statements considered, for the time being, too expensive to change. The book is based on field work done by Bruno Latour in Roger Guillemin's laboratory at the Salk Institute and provides an important link between the

sociology of modern sciences and laboratory studies in the history of science.

*Machine Learning, Advances in Computing, Renewable Energy and Communication* Anuradha Tomar, Hasmat Malik, Pramod Kumar, Atif Iqbal, 2021-08-19 This book gathers selected papers presented at International Conference on Machine Learning, Advances in Computing, Renewable Energy and Communication (MARC 2020), held in Krishna Engineering College, Ghaziabad, India, during December 17–18, 2020. This book discusses key concepts, challenges, and potential solutions in connection with established and emerging topics in advanced computing, renewable energy, and network communications.

**The Zero-Carbon House** Martin Godfrey Cook, 2011-09-16 'Zero Carbon' is an abstract concept for most people, but we have lived energy-profligate lifestyles for too long on finite fossil-fuel resources. We now face potential environmental catastrophe from climate change and global warming, with a continuing exponentially expanding global population that doubles every four decades. The capacity of the planet to reabsorb carbon dioxide is about two to three tonnes of carbon equivalent per person at current population levels of seven billion and therefore there is a desperate need for us to reduce our carbon footprint. A way of helping to achieve this is to live in a zero-carbon house, and this will become UK legislation for new homes by 2016. This fascinating book covers all aspects of the zero-carbon house, from its evolution to achieving carbon neutrality in old and new homes as well as entire communities. Includes an overview of zero carbon and how to achieve it on a global scale; covers communities of zero-carbon houses and provides inspirational examples of low-carbon lifestyles. Case studies show how principles are put into successful practice to save energy, carbon, money and the environment.

**Screen Society** Ellis Cashmore, Jamie Cleland, Kevin Dixon, 2018-06-12 Screens have been with us since the eighteenth century, though we became accustomed to staring at them only after the appearance of film and television in the twentieth century. But there was nothing in film or TV that prepared us for the revolution wrought by the combination of screens and the internet. Society has been transformed and this book asks how and with what consequences? Screen Society's conclusions are based on an original research project conducted by scholars in the UK and Australia. The researchers designed their own research platform and elicited the thoughts and opinions of nearly 2000 participants, to draw together insights of today's society as seen by users of smartphones, tablets and computers – what the authors call Screenagers. The book issues challenges to accepted wisdom on many of the so-called problems associated with our persistent use of screen devices, including screen addiction, trolling, gaming and gambling.

*Can Music Make You Sick?* Sally Anne Gross, George Musgrave, 2020-09-29 “Musicians often pay a high price for sharing their art with us. Underneath the glow of success can often lie loneliness and exhaustion, not to mention the basic struggles of paying the rent or buying food. Sally Anne Gross and George Musgrave raise important questions – and we need to listen to what the musicians have to tell us about their working conditions and their mental health.” Emma Warren (Music Journalist and Author). “Singing is crying for grown-ups. To create great songs or play them with meaning music's creators reach far into emotion and fragility seeking the communion we demand of it. However, music's toll on musicians can leave deep scars. In this important book, Sally Anne Gross and George Musgrave investigate the relationship between the wellbeing music brings to society and the wellbeing of those who create. It's a

much needed reality check, deglamorising the romantic image of the tortured artist.” Crispin Hunt (Multi-Platinum Songwriter/Record Producer, Chair of the Ivors Academy). It is often assumed that creative people are prone to psychological instability, and that this explains apparent associations between cultural production and mental health problems. In their detailed study of recording and performing artists in the British music industry, Sally Anne Gross and George Musgrave turn this view on its head. By listening to how musicians understand and experience their working lives, this book proposes that whilst making music is therapeutic, making a career from music can be traumatic. The authors show how careers based on an all-consuming passion have become more insecure and devalued. Artistic merit and intimate, often painful, self-disclosures are the subject of unremitting scrutiny and data metrics. Personal relationships and social support networks are increasingly bound up with calculative transactions. Drawing on original empirical research and a wide-ranging survey of scholarship from across the social sciences, their findings will be provocative for future research on mental health, wellbeing and working conditions in the music industries and across the creative economy. Going beyond self-help strategies, they challenge the industry to make transformative structural change. Until then, the book provides an invaluable guide for anyone currently making their career in music, as well as those tasked with training and educating the next generation.

**Principles of Network and System Administration** Mark Burgess, 2000-07-31 A practical guide for meeting the challenges of planning and designing a network Network design has to be logical and efficient, decisions have to be made about what services are needed, and security concerns must be

addressed. Focusing on general principles, this book will help make the process of setting up, configuring, and maintaining a network much easier. It outlines proven procedures for working in a global community of networked machines, and provides practical illustrations of technical specifics. Readers will also find broad coverage of Linux and other Unix versions, Windows(r), Macs, and mainframes. The author includes discussions on the social and ethical aspects of system administration.

*Sacred Rest* Dr. Saundra Dalton-Smith, 2019-09-24 Staying busy is easy. Staying well rested-now there's a challenge. How can you keep your energy, happiness, creativity, and relationships fresh and thriving in the midst of never-ending family demands, career pressures, and the stress of everyday life? In SACRED REST, Dr. Saundra Dalton-Smith, a board-certified internal medicine doctor, reveals why rest can no longer remain optional. Dr. Dalton-Smith shares seven types of rest she has found lacking in the lives of those she encounters in her clinical practice and research-physical, mental, spiritual, emotional, sensory, social, creative-and why a deficiency in any one of these types of rest can have unfavorable effects on your health, happiness, relationships, creativity, and productivity. SACRED REST combines the science of rest, the spirituality of rest, the gifts of rest, and the resulting fruit of rest. It shows rest as something sacred, valuable, and worthy of our respect. By combining scientific research with personal stories, spiritual insight, and practical next steps, SACRED REST gives the weary permission to embrace rest, set boundaries, and seek sanctuary without any guilt, shame, or fear.

**Is This Legal?** Art Davie, 2014-07 With the very first UFC, the new sport of mixed martial arts (MMA) was launched-although it wasn't even called that yet-and fighting would never again be the same. Now,

for the first time, the true story of how the Ultimate Fighting Championship came into existence is told by the man who started it all. In this vivid and fast-moving, first-person account, Davie explains how his idea to crown the World's Best Fighter painstakingly evolved into the UFC, which now stands as a billion-dollar sports franchise.

**Introducing Vigilant Audiences** Daniel Trottier, Rashid Gabdulhakov, Qian Huang, 2020-10-15 Ever since the exposure of the Kitten Killer of Hangzhou captured the imagination of online communities worldwide, vigilantism and digital vigilantism has come to the fore as an emerging and poignant issue. In their book *Introducing Vigilant Audiences* Daniel Trottier and colleagues (and contributors) have produced an excellent and thoughtful 'must read' for all who are studying vigilantism, or just interested in it. Prof. David Wall, University of Leeds This is a collection of cutting edge and thoughtful case studies of global digital vigilantism that advances this emerging and increasingly important field in useful and intriguing ways. Prof. Michael Pfeifer, City University of New York This ground-breaking collection of essays examines the scope and consequences of digital vigilantism – a phenomenon emerging on a global scale, which sees digital audiences using social platforms to shape social and political life. Longstanding forms of moral scrutiny and justice seeking are disseminated through our contemporary media landscape, and researchers are increasingly recognising the significance of societal impacts effected by digital media. The authors engage with a range of cross-disciplinary perspectives in order to explore the actions of a vigilant digital audience – denunciation, shaming, doxing – and to consider the role of the press and other public figures in supporting or contesting these activities. In turn, the volume illuminates several tensions

underlying these justice seeking activities – from their capacity to reproduce categorical forms of discrimination, to the diverse motivations of the wider audiences who participate in vigilant denunciations. This timely volume presents thoughtful case studies drawn both from high-profile Anglo-American contexts, and from developments in regions that have received less coverage in English-language scholarship. It is distinctive in its focus on the contested boundary between policing and entertainment, and on the various contexts in which the desire to seek retribution converges with the desire to consume entertainment. Introducing *Vigilant Audiences* will be of great value to researchers and students of sociology, politics, criminology, critical security studies, and media and communication. It will be of further interest to those who wish to understand recent cases of citizen-led justice seeking in their global context.

**The Four** Scott Galloway, 2017-10-03 NEW YORK TIMES BESTSELLER USA TODAY  
BESTSELLER Amazon, Apple, Facebook, and Google are the four most influential companies on the planet. Just about everyone thinks they know how they got there. Just about everyone is wrong. For all that's been written about the Four over the last two decades, no one has captured their power and staggering success as insightfully as Scott Galloway. Instead of buying the myths these companies broadcast, Galloway asks fundamental questions. How did the Four infiltrate our lives so completely that they're almost impossible to avoid (or boycott)? Why does the stock market forgive them for sins that would destroy other firms? And as they race to become the world's first trillion-dollar company, can anyone challenge them? In the same irreverent style that has made him one of the world's most celebrated business professors, Galloway deconstructs the strategies of the Four that lurk beneath their shiny veneers. He shows how

they manipulate the fundamental emotional needs that have driven us since our ancestors lived in caves, at a speed and scope others can't match. And he reveals how you can apply the lessons of their ascent to your own business or career. Whether you want to compete with them, do business with them, or simply live in the world they dominate, you need to understand the Four.

**"Rome Wasn't Digitized in a Day"** Alison Babeu, 2010

**Privacy on the Ground** Kenneth A. Bamberger, Deirdre K. Mulligan, 2015-10-23 An examination of corporate privacy management in the United States, Germany, Spain, France, and the United Kingdom, identifying international best practices and making policy recommendations. Barely a week goes by without a new privacy revelation or scandal. Whether by hackers or spy agencies or social networks, violations of our personal information have shaken entire industries, corroded relations among nations, and bred distrust between democratic governments and their citizens. Polls reflect this concern, and show majorities for more, broader, and stricter regulation—to put more laws “on the books.” But there was scant evidence of how well tighter regulation actually worked “on the ground” in changing corporate (or government) behavior—until now. This intensive five-nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work, and what kinds of regulation effectively shape their behavior. And the research yields a surprising result. The countries with more ambiguous regulation—Germany and the United States—had the strongest corporate privacy management practices, despite very different cultural and legal environments. The more rule-bound countries—like France and Spain—trended instead toward compliance processes, not embedded privacy practices. At a

crucial time, when Big Data and the Internet of Things are snowballing, *Privacy on the Ground* helpfully searches out the best practices by corporations, provides guidance to policymakers, and offers important lessons for everyone concerned with privacy, now and in the future.

Untouchable Randall Sullivan, 2012-11-06 The investigative biography of Michael Jackson's final years: "A tale of family, fame, lost childhood, and startling accusations never heard before" (ABC Nightline). When Michael Jackson died on June 25, 2009, millions of fans around the world were shocked. But the outpouring of emotion that followed his loss was bittersweet. Dogged by scandal for years and undone by financial mismanagement, Jackson had become untouchable in many quarters. *Untouchable* pulls back the curtain Jackson's public person to introduce a man who, despite his immense fame, spent his entire life utterly alone; who, in the wake of a criminal trial that left him briefly hospitalized, abandoned Neverland to wander the globe before making one final—and fatal—attempt to recover his wealth and reputation. The Jackson that emerges in these pages is both naïve and cunning, a devoted father whose parenting became an international scandal, a shrewd businessman whose failures nearly brought down a megacorporation, and an inveterate narcissist who craved a quiet, normal life. Randall Sullivan delivers never-before-reported information about Jackson's business dealings, his relationship with his family, and the pedophilia allegations that derailed his life and mar his legacy today, as well as the suspicious nature of his death. Based on exclusive access to Jackson's inner circle, *Untouchable* is an intimate, unflinching portrait of the man who continues to reign as the King of Pop. "A dishy Michael Jackson biography that makes the exhaustively covered King of Pop fascinating all over again." —People
