China's Industrial State-owned Enterprises Between Profitability and Bankruptcy Carsten Holz,2003 After decades of declining profitability, China's industrial state-owned enterprises appear to be obsolete. This book utilizes extensive data and quantitative as well as qualitative analyses to examine the reasons for the decline in the profitability of these industrial state-owned enterprises, to determine their current profitability patterns across various dimensions, and to account for profitability gaps between these enterprises and those managed under other ownership forms. China's recent enterprise reform measures are also evaluated. A differentiated picture emerges that clarifies past developments and illuminates future prospects of the reform of industrial state-owned enterprises in China.

China's Developmental Miracle Alvin Y. So,2016-07-08 In contrast to the failure to economic reforms in Eastern Europe, China's economic reforms have been quite successful. Decollectivization, marketization, state enterprise reforms, and reintegration into the world economy have led to very rapid economic development in China over the past two decades. These economic reforms, in turn, triggered profound social and political changes. This collection examines the origins, nature, and impact, as well as the future prospects of these reforms and changes. The contributors are all active researchers from a variety of disciplines, including economics, sociology, political science, and geography.

Knowledge Sharing in Practice M.H. Huysman,D.H. de Wit,2013-03-14 In this volume organizational learning theory is used to analyse various practices of managing and facilitating knowledge sharing within companies. Experiences with three types of knowledge sharing, namely knowledge acquisition, knowledge reuse, and knowledge creation, at ten large companies are discussed and analyzed. This critical analysis leads to the identification of traps and obstacles when managing knowledge sharing, when supporting knowledge sharing with IT tools, and when organizations try to learn from knowledge sharing practices. The identification of these risks is followed by a discussion of how organizations can avoid them. This work will be of interest to researchers and practitioners working in organization science and business administration. Also, consultants and organizations at large will find the book useful as it will provide them with insights into how other organizations manage and facilitate knowledge sharing and how potential failures can be prevented.

Shari'a and Politics in Modern Indonesia Arskal Salim,Azyumardi Azra,2003 After the fall of President Soeharto, there have been heightened attempts by certain groups of Muslims to have sharia (Islamic law) implemented by the state. Even though this burning issue is not new, it has further divided Indonesian Muslims. The introduction of Islamic law would also affect the future of multi-cultural and multi-religious Indonesia. So far, however, the introduction of sharia nationwide has been opposed by the majority of Indonesian Muslims. This book gives an overview of sharia from post-Independence in 1945 to the most recent developments in Indonesia at the start of the new millennium.

Handbook for Asian Studies Specialists Noriko Asato,2013-10-08 An indispensable tool for librarians who do reference or collection management, this work is a pioneering offering of expertly selected print and electronic reference tools for East Asian Studies (Chinese, Japanese, and Korean). Handbook for Asian

Studies Specialists: A Guide to Research Materials and Collection Building Tools is the first work to cover reference works for the main Asian area languages of China, Japan, and Korea. Several leading Asian Studies librarians have contributed their many decades of experience to create a resource that gathers major reference titles—both print and online—that would be useful to today's Asian Studies librarian. Organized by language group, it offers useful information on the many subscription-based and open-source electronic tools relevant to Asian Studies. This book will serve as an essential resource for reference collections at academic libraries. Previously published bibliographies on materials deal with China or Japan or Korea, but none have coalesced information on all three countries into one work, or are written in English. And unlike the other resources available, this work provides the insight needed for librarians to make informed collection management decisions and reference selections.
