*Singapore* Kent E. Calder, 2016-11-01 How Singapore's solutions to common problems can provide examples for other societies. Nearly everyone knows that Singapore has one of the most efficient governments and competitive, advanced economies in the world. But can this unique city-state of some 5.5 million residents also serve as a model for other advanced economies as well as for the emerging world? Respected East Asia expert Kent Calder provides clear answers to this intriguing question in his new, groundbreaking book that looks at how Singapore's government has harnessed information technology, data, and a focus on innovative, adaptive governance to become a model smart city, smart state. Calder describes Singapore as a laboratory for solutions to problems experienced by urban societies around the world. In particular, he shows how Singapore has dealt successfully with education, energy, environmental, housing, and transportation challenges; many of its solutions can be adapted in a wide range of other societies. Calder also explains how Singapore offers lessons for how countries can adapt their economies to the contemporary demands of global commerce. Singapore consistently ranks at the top in world surveys measuring competitiveness, ease of doing business, protection of intellectual property, and absence of corruption. The book offers concrete insights and a lucid appreciation of how Singapore's answers to near-universal problems can have a much broader relevance, even in very different societies.

**Ageing In Asia: Contemporary Trends And Policy Issues** Kai Hong Phua, Lee Gan Goh, Mui Teng Yap, 2019-04-26 Ageing in Asia contains a selection of leading social systems and programs, with interesting case-studies offering innovative and useful lessons. The book covers ageing and related developments occurring in the most dynamic industrializing and urbanizing societies of emerging Asia. It includes topical issues such as public policies and responses to current challenges from the growing needs of an ageing population due to rise of chronic non-communicable diseases, amidst rapidly changing social, cultural, economic and political changes in the region. The main purpose of the book is to provide useful comparisons of social care systems undergoing rapid transitions, and to offer some examples of best practices and lessons to respond to the changing needs due to population ageing.

**Routledge Handbook of New Media in Asia** Larissa Hjorth, Olivia Khoo, 2015-11-06 While a decade ago much of the discussion of new media in Asia was couched in Occidental notions of Asia as a default setting for technology in the future, today we are seeing a much more complex picture of contesting new media practices and production. As new media becomes increasingly an everyday reality for young and old across Asia through smartphones and associated devices, boundaries between art, new media, and the everyday are transformed. This Handbook addresses the historical, social, cultural, political, philosophical, artistic and economic dimensions of the region's new media. Through an interdisciplinary revision of both new media and Asia the contributors provide new insights into the complex and contesting terrains of both notions. The Routledge Handbook of New Media in Asia will be the definitive publication for readers interested in comprehending all the various aspects of new media in Asia. It provides an authoritative, up-to-date, intellectually broad, conceptually cutting-edge guide to the important aspects of new media in the region — as the first point of consultation for researchers, advanced level undergraduate and postgraduate students in fields of new media and Asian studies.

*Tax Incentives for the Creative Industries* Sigrid Hemels, Kazuko Goto, 2017-01-04 This book combines insights from cultural economics, public finance, and tax law, providing an accessible and comprehensive introduction in the application of tax incentives for the creative industries. It does not have a single-country focus, but instead uses the perspective and examples of various countries around the world. The book starts with a theoretical part, introducing the concepts of creative industries and of tax incentives: how can the creative industries be defined, why do governments support the creative industries and how can tax incentives be applied as policy instrument. In the globalized and digitalized world in which the creative industries operate, restrictions imposed by guidelines on harmful tax competition and state aid and regulations influencing the (im)possibility of applying tax incentives in cross-border situations have a great impact. For that reason these legal concepts are discussed as well in the theoretical part. Globalization also gives rise to questions on the cross border application of tax incentives. The example of cross border giving is discussed in this respect. The theoretical part is followed by a part that focuses on tax incentives for specific sectors of the creative industries: museums and cultural heritage, the audiovisual industries (film, tv and videogames), the art market, copyright and artists. This part uses insightful examples from various countries to illustrate the application of these tax incentives. As the book takes both an academic and a practical approach, it is of relevance to researchers, students, policy makers and readers involved in the creative industry who seek an in-depth and up-to-date overview of this alternative way for governments to support the creative industries.

**Wireless Information and Power Transfer: A New Paradigm for Green Communications** Dushantha Nalin K. Jayakody, John Thompson, Symeon Chatzinotas, Salman Durrani, 2017-07-20 This book presents breakthroughs in the design of Wireless Energy Harvesting (WEH) networks. It bridges the gap between WEH through radio waves communications and power transfer, which have largely been designed separately. The authors present an overview of the RF-EHs including system architecture and RF energy harvesting techniques and existing applications. They also cover the idea of WEH in novel discoveries of information, the theoretical bounds in WEH, wireless sensor networks, usage of modern channel coding together with WEH, energy efficient resource allocation mechanisms, distributed self-organized energy efficient designs, delay-energy trade-off, specific protocols for energy efficient communication designs, D2D communication and energy efficiency, cooperative wireless networks, and cognitive networks.

**Special Needs In Singapore: Trends And Issues** Meng Ee Wong, Levan Heng Fook Lim, 2021-07-26 The fields of special needs education and disability in Singapore have witnessed significant changes and developments especially during the past two decades in the wake of Singapore's evolution towards its vision as an inclusive society. This collection of chapters presents information, knowledge, research, and perspectives across a wide range of topics and issues that are relevant to the lives of persons with disabilities, their families and their communities. This book offers a compendium of local knowledge and research on special needs and disability and integrates international literature, exemplary practices, and innovative ideas for considering future directions and efforts for the fields of special needs education and disability in Singapore.

*Digital Divides* Kim Andreasson, 2015-01-14 The rapid development of the information society has accentuated the importance of digital divides, which refer to economic and social inequalities among populations due to differences in access to, use of, or knowledge of information and communication technologies (ICT). This book discusses the current state of digital divides, ranging from global

50 Years Of Social Issues In Singapore Chan David,2015-04-15 The social context of Singapore is changing rapidly, and understanding how people think, feel and behave in various situations has become a key driver of effectiveness in addressing social issues. 50 Years of Social Issues in Singapore provides a comprehensive review and examination of various social issues at multiple levels of analysis including the individual, group and society. This invaluable book adopts a translational approach to social issues in Singapore by explicitly bridging intellectual and practical perspectives. Contributed by a distinguished team of authors, the chapters examine the critical ideas underlying public debates of social issues and their policy and practical implications. The book is organized into three parts. Part I examines issues of population and social fundamentals in Singapore such as ageing, marriage, urban planning, healthcare and racial and religious harmony. Part II analyses Singapore's social progress through issues of inclusivity such as social mobility, developing communities and marginal groups that deserve more attention. Part III focuses on core principles and social processes related to social justice, doing good, social media and approaches to understanding and addressing social issues in Singapore. Most importantly, the chapters in this book clearly identify many of the critical, unresolved and emerging questions on various social issues that will guide the next generation of public discussion and policy deliberations on what matter in Singapore.

*Transcontinental Strategies for Industrial Development and Economic Growth* Christiansen, Bryan, Koc, Gulsah, 2017-03-03 In contemporary society, it is vital for countries to consistently seek new ways to provide stable growth for their increasing populations. As such, it is important to stay on top of the most current strategies and trends that promote strong industrial and economic development. *Transcontinental Strategies for Industrial Development and Economic Growth* provides a comprehensive examination of the latest strategies and techniques for growing and maintaining an economically-sound community. Highlighting innovative research on relevant topics such as budget preparation processes, management philosophies, and global competitiveness, this publication is an ideal resource for all professionals, practitioners, business owners, and researchers who are seeking advanced academic perspectives on strategies for industrial development and economic growth.

*Security Frameworks in Contemporary Electronic Government* Abassi, Ryma, Ben Chehida Douss, Aida, 2018-08-31 Global change and advancing technology have transformed the government sector with the use of information and communication technology to improve service delivery. The use of such technologies in electronic and mobile government services raises issues relating to security, privacy, and data protection. *Security Frameworks in Contemporary Electronic Government* is a pivotal reference source that provides vital research on the application of special security requirements in electronic government transactions. While highlighting topics such as digital environments, public service delivery, and cybercrime, this publication explores the difficulties and challenges faced in implementing e-government technologies, as well as the different aspects of security in e-government. This book is ideally designed for policymakers, software developers, IT specialists, government officials, academicians, researchers, and students seeking current research on secure environments in electronic and mobile government.

**Born to Move** Ooi Lay Yong, Regain your ability to move and live a life free of aches and pains. The digital lifestyle has changed the way we use, or underuse, our body and joints, giving rise to the prevalence of aches and pains in most of us. For so long, we have been training to build fitness, with our emphasis placed primarily on acquiring cardiovascular endurance and strength. But this is not enough – we need to redefine fitness and focus on building mobility fitness, which is essentially developing strength, flexibility, and quality of movement, so that our joints are capable of moving to its full range of motion and stay healthy. Within the pages of this book, you will:

- Understand how the different parts of your body move
- Learn how the lack of mobility in your joints is the leading cause for aches and pains
- Master the 5 steps to achieve mobility fitness and live a pain-free life
- Discover how it is possible to regain your energy to stay at peak performance and live a life full of vitality

*Future Learning in Primary Schools* Ching Sing Chai, Cher Ping Lim, Chun Ming Tan, 2015-10-12 This edited book tells the story of the multifaceted efforts devoted by a “future school” in Singapore—The Nan Chiau Primary School—in shaping future learning. It documents the various measures implemented by one primary school to improve student learning outcomes in a technology-rich teaching and learning environment. With the current interest in Singapore’s “Masterplan for ICT (information and communication technology) in Education,” and the increasing focus on teaching and learning design by leading education researchers and professionals, this well-timed book will appeal to policy makers, educators and researchers.

*An ICT agripreneurship guide* CTA, 2017-08-01 This Handbook provides a step-by-step roadmap designed to equip aspiring ICT entrepreneurs, with the information and knowledge they need to start an ICT-based business in the agricultural sector, outlining key opportunities and challenges that will be encountered along the way. Using real-life examples, it provides strategies and pathways for averting common mistakes faced by early-stage entrepreneurs. Topics covered include agricultural value chains and their stakeholders, ICT business challenges, effective business plans and models for designing, funding and scaling ventures.

**Singapore after Lee Kuan Yew** S. C. Y. Luk, P. W. Preston, 2020-12-30 This book addresses key questions about how Singapore is likely to develop going forward, what are the key challenges facing the state, and how is the government going to deal with these matters. The book shows how important Lee Kuan Yew and subsequent individual leaders have been in shaping Singapore, and goes on to consider specific new challenges, including rapid population growth, migration and a changing population mix, the rise of China and possible shifts in the regional balance of power, and anxieties about the economy and an increasing global backlash against the neo-liberal free trade regime. It considers key areas of economic policy, social policy, and foreign policy, and explores the changing nature of governance. It also examines the Singapore government's effort to contain the COVID-19 outbreak. Overall, the book provides a concise, comprehensive assessment of the current state of Singapore and its likely future direction.

Smart Cities as Democratic Ecologies Daniel Araya, 2015-11-17 The concept of the 'smart city' as the confluence of urban planning and technological innovation has become a predominant feature of public policy discourse. Despite its expanding influence, however, there is little consensus on the precise meaning of a 'smart city'. One reason for this ambiguity is that the term means different things to different disciplines. For some, the concept of the 'smart city' refers to advances in sustainability and green technologies. For others, it refers to the deployment of information and communication technologies as next generation infrastructure. This volume focuses on a third strand in this discourse, specifically technology driven changes in democracy and civic engagement. In conjunction with issues related to power grids, transportation networks and urban sustainability, there is a growing need to examine the potential of 'smart cities' as 'democratic ecologies' for citizen empowerment and user-driven innovation. What is the potential of 'smart cities' to become platforms for bottom-up civic engagement in the context of next generation communication, data sharing, and application development? What are the consequences of layering public spaces with computationally mediated technologies? Foucault's notion of the panopticon, a metaphor for a surveillance society, suggests that smart technologies deployed in the design of 'smart cities' should be evaluated in terms of the ways in which they enable, or curtail, new urban literacies and emergent social practices.

Social Media in the Arab World Barrie Gunter, Mokhtar Elareshi, Khalid Al-Jaber, 2016-04-21 Following the Arab Spring, the use of social media has become instrumental in organising activist movements and spreading political dissent in the Middle East. New online behaviours have transformed traditional communication channels, enabling young people of all backgrounds to feel politically empowered. But now that spring has turned to winter, what are the long-term implications of internet activism in the region? *Social Media in the Arab World* provides a unique insight into the role of online communications as a force for change in the Gulf States. Featuring examples as diverse as neo-patrimonial politics in Saudi Arabia and the ways an online presence affects the status of women

in Kuwait, the chapters examine shifts in the political, social and religious identities of citizens as a result of increased digital activism. With contributions from a variety of inter-disciplinary experts, this wide-ranging study examines the consequences of changing power dynamics brought about by popular social media. In doing so, this book offers an original perspective on the long-term implications of internet usage in the Arab world and is essential reading for students and researchers working across the region.
