Information On Demand 2013

Joseph Toomey

Servitization and Physical Asset Management Michael John Provost,2018-12-31 Servitization and Physical Asset Management, third edition, was developed to provide a structured source of guidance and reference information on the business opportunities linked to servitization and the management of physical assets. A growing trend in the global economy, servitization focuses on the actual deliverables of an asset from the perspective of the customer: electricity instead of the power plant, thrust instead of the engine, mobility instead of a plane or a car. The book offers high-level overviews of how to servitized and manage assets from a variety of perspectives, reviewing nearly 1,500 books, magazine articles, papers and presentations and websites. Written by Michael J. Provost, Ph.D., and a subject matter expert in modeling, simulation, analysis and condition monitoring, Servitization and Physical Asset Management, third edition, is an invaluable reference to those considering providing asset management services for the products they design and manufacture. It is also meant to support middle management wishing to know what needs to be done to look after the assets they are responsible for and who to approach for help, and academics doing research in this

field. Michael Provost, is a British engineer with a doctoral degree in thermal power from Cranfield University.

(In)visible European Government Maarten Hillebrandt,Päivi Leino-Sandberg,Ida Koivisto,2023-12-22 This book questions the theoretical premises and practical applications of transparency, showing both the promises and perils of transparency in a methodologically innovative way and in a cross-section of policy instruments. It scrutinizes transparency from three perspectives - methodologically, theoretically, and empirically - both in the specific context of the EU but also in the wider context of modern society in which transparency is embraced as an almost unquestionable virtue. This book examines the ways in which transparency practices can make institutions visible and stands out for its methodological self-reflection: to fully understand the irresistible call for transparency in our governing institutions, we must reflect on our own relationship with it. This book will be of key interest to scholars and students of transparency studies, democratic legitimacy, global governance, governance law, EU studies and law and public policy more widely.

Business Information Systems Witold Abramowicz,2013-06-14 This book contains the refereed proceedings of the 16th

International Conference on Business Information Systems, BIS 2013, held in Pozna⬜, Poland, in June 2013. The theme of this year's conference was Business Applications on the Move, reflecting the growing usage of mobile devices in business applications and its repercussions on business processes and information management. The 18 revised full papers were carefully reviewed and selected from 52 submissions. They are grouped into six sections on modern enterprises and mobile ERP, business models and BPM, linked data and ontologies, recommendations and content analysis, knowledge discovery, and IT frameworks and systems architecture.

Using Scanner Data for Food Policy Research Mary K. Muth,Abigail Okrent,Chen Zhen,Shawn Karns,2019-10-12 Using Scanner Data for Food Policy Research is a practitioners' guide to using and interpreting scanner data obtained from stores and households in policy research. It provides practical advice for using the data and interpreting their results. It helps the reader address key methodological issues such as aggregation, constructing price indices, and matching the data to nutrient values. It demonstrates some of the key econometric and statistical applications of the data, including estimating demand systems for policy simulation,

analyzing effects of food access on food choices, and conducting cost-benefit analysis of food policies. This guide is intended for early-career researchers, particularly those working with scanner data in agricultural and food economics, nutrition, and public health contexts. Describe different types of scanner data, the types of information available in the data, and the vendors that offer these data Describe food-label data that can be appended to scanner data Identify key questions that researchers should consider when acquiring scanner and label data for food policy research Demonstrate how to use scanner data using tools from econometric and statistical analyses, including the limitations in interpreting results using the data Describe and resolve key methodological issues related to using the data to facilitate more rapid analyses Provide an overview of published literature as background for designing new studies Demonstrate key applications of the data for food policy research

The Oxford Handbook of the Economics of Prostitution Scott Cunningham,Manisha Shah,2016-08-10 Prostitution bears the unique title of being both the world's oldest profession and one of the least understood occupations. Unlike most of the crime and family literature, prostitution appears to have all the features of

traditional markets: prices, supply and demand considerations, variety in the organizational structure, and policy relevance. Despite this, economists have largely ignored prostitution in their research and writings. This has been changing, however, over the last twenty years as greater access to data has enabled economists to build better theories and gain a better understanding of the organization of sex market. The Oxford Handbook of the Economics of Prostitution fills the gap in our understanding. It brings together many of the top researchers in the field who explain how the prostitution markets are organized across space and time, the role of technology in shaping labor supply and demand, the intersection of prostitution with trafficking, and the optimal use of law enforcement. What makes the material unique is its explicit focus on economics as the primary methodology for organizing our understanding of prostitution. The Handbook brings to scholars' attention for the first time a collection of original writings on prostitution that provides an overview of what is known and what is not known in this area. Researchers with an interest in underground markets, labor economics, risky behaviors, marriage, and gender will find the book's contents illuminating and path breaking.

Analyzing Risk through Probabilistic Modeling in Operations Research Jakóbczak, Dariusz Jacek,2015-11-03 Probabilistic modeling represents a subject spanning many branches of mathematics, economics, and computer science to connect pure mathematics with applied sciences. Operational research also relies on this connection to enable the improvement of business functions and decision making. Analyzing Risk through Probabilistic Modeling in Operations Research is an authoritative reference publication discussing the various challenges in management and decision science. Featuring exhaustive coverage on a range of topics within operational research including, but not limited to, decision analysis, data mining, process modeling, probabilistic interpolation and extrapolation, and optimization methods, this book is an essential reference source for decision makers, academicians, researchers, advanced-level students, technology developers, and government officials interested in the implementation of probabilistic modeling in various business applications.

An Unworthy Future Joseph Toomey,2014-07-22 It is difficult to find an area of public policy more plagued by misunderstanding than energy policy. Even worse, every time the subject is raised,

we are obligated to get mired in pointless arguments about the weather. This book helps set the record straight. Not convinced? Consider some of these inconvenient truths: The cost of 'green energy' climate remediation is anywhere from 10-to-1,000 times greater than the damage from the climate change it attempts to alleviate. Germany, the world's leader in solar energy, will spend more than $280 billion by 2030 on solar subsidies. But all of that investment will only forestall 22nd century global warming by 37 hours. Obama's carbon tax would cost Americans $1.2 trillion over just ten years. But it would only reduce the midrange 3 degree modeled 22nd century global temperature increase by 0.038 degrees Celsius. At their current emissions growth rate, it will take China nine months to replace the entire U.S. emissions cut that Obama wants to achieve over seven years, at a staggering cost in American jobs and lost economic growth. The U.S. biofuel program imposes a cost on consumers 9,862 times greater than any climate benefit they or their distant progeny will ever derive. This is not another skeptical global warming polemic but an economic evaluation of how and why green energy will fail. The world has too many pressing needs. For the money Obama squandered on just a single bankrupt crony solar company, the U.S. could have

prevented 300,000 childhood malaria deaths in poor countries. A thoroughly researched, heavily documented book by an expert in his field, it will demonstrate in meticulous detail how wasteful and economically inefficient Obama's 'green energy' dead end future will be compared to other worthy alternatives. It's time to end the hysterical climate cynicism and get on humanity's side.

Worldwide Commonalities and Challenges in Information Literacy Research and Practice Serap Kurbanoglu,Esther Grassian,Diane Mizrachi,Ralph Catts,Sonja Spiranec,2013-12-13 This book constitutes the refereed proceedings of the European Conference on Information Literacy, ECIL 2013, held in Istanbul Turkey, in October 2013. The 73 revised full papers presented together with two keynotes, 9 invited papers and four doctoral papers were carefully reviewed and selected from 236 submissions. The papers are organized in topical sections on overview and research; policies and strategies; theoretical framework; related concepts; citizenship and digital divide; disadvantaged groups; information literacy for the workplace and daily life; information literacy in Europe; different approaches to information literacy; teaching and learning information literacy; information literacy instruction; assessment of information literacy;

information literacy and K-12; information literacy and higher education; information literacy skills of LIS students; librarians, libraries and ethics.

Perspectives in Business Informatics Research Václav Řepa,Tomáš Bruckner,2016-09-07 This book constitutes the proceedings of the 15th International Conference on Perspectives in Business Informatics Research, BIR 2016, held in Prague, Czech Republic, in September 2016. Overall, 61 submissions from 16 countries were rigorously reviewed by 42 members of the program committee representing 21 countries. The selected 21 full papers and 3 short papers are included in this volume together with 2 abstracts of invited talks. This year again, the papers presented at the conference cover many important aspects of the development, use, and application of management information systems. The papers have been organized in topical sections on Business Processes and Enterprise Modeling; Information Systems Development; Information Systems Management; Learning and Capability; and Data Analysis.

Global Competitiveness: Business Transformation in the Digital Era Ade Gafar Abdullah,Isma Widiaty,Cep Ubad Abdullah,2019-07-09 The proceedings of the Economics and

Business Competitiveness International Conference (EBCICON) provides a selection of papers, either research results or literature reviews, on business transformation in the digital era. Nine major subject areas, comprising accounting and governance, customer relations, entrepreneurship, environmental issues, finance and investment, human capital, industrial revolution 4.0, international issues, and operations and supply chain management are presented in the proceedings. These papers will provide new insights into the knowledge and practice of business and economics in the digital era. Therefore, parties involved in business and economics such as academics, practitioners, business leaders, and others will be interested in the contents of the proceedings.

   Demand Horizon Gerry Campbell,2013-11-25 The rules of new product development have changed. The most fundamental nature of supply and demand has shifted and markets have undergone a reversal. Users are in control now, determining the success and failure of every company and product in the market. Companies that underestimate the implications of this shift are guaranteed to fail, wasting time and resources pursuing products the market will not accept. Demand Horizon is a new mental model for understanding and adapting to the demand-driven economy. It's a

framework for making sense of the new rules in product creation, offering both strategic understanding and practical actions for adapting to the new rules of business. Written by Gerry Campbell, an accomplished executive, entrepreneur and product creator, Demand Horizon illuminates the techniques and approaches that have enabled him to create patented products that are used by every person on earth who uses a search engine, social networking site or smartphone.

The Routledge Handbook of Lexicography Pedro A. Fuertes-Olivera,2017-10-02 The Routledge Handbook of Lexicography provides a comprehensive overview of the major approaches to lexicography and their applications within the field. This Handbook features key case studies and cutting-edge contributions from an international range of practitioners, teachers, and researchers. Analysing the theory and practice of compiling dictionaries within the digital era, the 47 chapters address the core issues of: The foundations of lexicography, and its interactions with other disciplines including Corpus Linguistics and Information Science; Types of dictionaries, for purposes such as translation and

teaching; Innovative specialised dictionaries such as the Oenolex wine dictionary and the Online Dictionary of New Zealand Sign Language; Lexicography and world languages, including Arabic, Hindi, Russian, Chinese, and Indonesian; The future of lexicography, including the use of the Internet, user participation, and dictionary portals. The Routledge Handbook of Lexicography is essential reading for researchers and students working in this area.

The Economics of Libraries Marco Ferdinando Martorana,Ilde Rizzo,2024-04-15 Libraries are included in the widely accepted definition of Cultural and Creative Industries, together with heritage, performing arts, museums, visual arts, and archives, and they play an important role in the creative value chain. The Economics of Libraries highlights the economic importance of the library sector. Providing an accessible and concise expert overview of the most important economic features and diversified functions of libraries, the authors also summarise the challenges and opportunities deriving from digital technologies, the management of cultural

infrastructures, and audience development. This unique short-form book fills a longstanding gap in our understanding of the demand and supply of library services. This book will be of interest to researchers and scholars in the fields of economics and the creative and cultural industries. It also provides useful insights for students and lecturers, as well as topics of discussion for professionals.

Influencing Customer Demand Mahya Hemmati,Mohsen S. Sajadieh,2021-07-16 In today's competitive markets, considering the demand and the supply chain sides is crucial to keeping revenue and customer satisfaction maximized. Managing and planning demand play a vital role in the sustainability of a company. This is the first book to the discuss managerial, mathematical, and conceptual framework of influencing factors on demand along with accurate mathematical analyses to evaluate and raise revenue. The book provides an understanding of the key elements that impact buyer demand. It presents the mathematical relationship between the influencing factors and the demand functions. It discusses the methods used for inspiring demand, how to measure demand dependency on components such as price, quality, and inventory, and it helps management improve alignment

between supply and demand by affecting the level and understanding of the role within supply chain management (SCM). This book is applicable for the professional as well as for academia. It can help those working in SCM, project management, production, inventory control, scheduling, engineering management, retail management, and operations management.

ECRM2013-Proceedings of the 12th European Conference on Research Methods Isabel Ramos,Anabela Mesquita,2013-04-07 Complete proceedings of the 13th European Conference on Research Methodology for Business and Management Studies ECRM 2013 PRINT version Published by Academic Conferences and Publishing International Limited.

OECD Skills Studies OECD Skills Strategy Diagnostic Report: Spain 2015 OECD,2015-09-22 Spain's economy is showing clear signs of recovery, after a protracted recession. Despite these positive developments significant challenges remain. Spain has amongst the highest unemployment rates in the OECD and the Spanish economy was still smaller in 2014 than it was in 2007. While the ...

ECEG2013- 13th European Conference on eGovernment Walter Castelnovo,Elena Ferrari,2013-06-13 These proceedings

represent the work of authors at the 13th European Conference on e-Government (ECEG 2013). The Conference this year is hosted by the Iuniversity of Insubria in Como, Italy. The Conference Chair is Professor Walter Castelnovo and the Programme Chair is Professor Elena Ferrari, both are fro the Department of Theoretical and Applied Sciences at the University of Insubria. The opening keynote address is given by Dr Gianluca Misuraca from the European Commission, Joint Research Centre, Institute for Prospective Technological Studies, Seville, Spain and Gianluca is addressing the topic eGovernment: Past, Present & Future: A policy-research perspective for renewing governance in the digital age. The second day of the conference is opened by Dr Antoinio Cordella from the London School of Economics, London, UK, who will talk about Public value creation: the new challenge for e-government policies. ECEG brings together, researchers, Government officials and practitioners in the area of e-Government from around the world. Participants are able to share their research findings and explore the latest developments and trends in the field which can then be disseminated to the wider community. With an initial submission of 153 abstracts, after the double blind, peer review process there are papers published in these Conference

Proceedings from 40 countries including Australia, Austria, Belgium, Brazil, Canada, China, Costa Rica, Croatia, Denmark, Eygpt, Germany, Greece, India, Iran, Iraq, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malaysia, Netherlands, New Zealand, Norway, Pakistan, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, UK and USA. This will ensure a very interesting two days.

Thank you very much for reading **Information On Demand 2013**. As you may know, people have look hundreds times for their favorite novels like this Information On Demand 2013, but end up in infectious downloads.
Rather than reading a good book with a cup of coffee in the afternoon, instead they are facing with some infectious bugs inside their laptop.

Information On Demand 2013 is available in our digital library an online access to it is set as public so you can get it instantly. Our book servers hosts in multiple countries, allowing you to get

the most less latency time to download any of our books like this one.
