**Cultural Heritage** Hani Hayajneh ,2023-04 Human heritage is an endless mine of knowledge, skills, ethos and accomplishments, which visualize and examine the power of human creativity and innovation throughout the history. The contributions cast an insight into the human psyche to perceive its Weltanschauung, and its way of thinking and making artefacts associated with knowledge, existence and identity in the context of other existing systems in the world. They demonstrate the diversity of topics as well as the state-of-the art of interdisciplinary approaches that participants of the Humboldt-Kolleg use in their research on cultural heritage, and confirm, once again, that the strengths of the Alexander von Humboldt Network should be celebrated and honoured. The present volume invites us to seek more novel research approaches that aim towards an understanding of the complex nature of human inheritance.

The United Nations as a Knowledge System Nanette Svenson, 2015-10-16 This book seeks to explore how the UN has generated, warehoused, disseminated, structured, packaged, expanded, transferred and leveraged its vast resources of accumulated information and experience throughout the decades and, particularly, since the start of the 21st century with the introduction of more connective information and communications technology. It examines the overarching objectives that have guided such activity and divides UN knowledge management into three distinct, but often overlapping and intertwining, categories: knowledge for social and organizational learning; knowledge for norm setting; and knowledge for creation of products and services. Svenson brings together these multiple aspects of UN knowledge management to present a holistic view of how the organization utilizes its global intelligence to educate, advocate and serve member countries' development. Instead of looking at the UN as an international bureaucracy or as a peacekeeping, policymaking, humanitarian or development entity, this work studies

the UN as a generator and purveyor of information, learning and experience in all of these areas. This book will be key reading for all students and scholars of international organizations.
