The Essential Fergus the Horse Jean Abernethy,2023-06-15 In the late 1990s, a little bay horse with white socks and a blaze was born. Dubbed “Fergus,” he has now traveled the world many times over by print, web, and satellite, inspired a line of merchandise, and gained a devoted following in the hundreds-of-thousands on Facebook and other social media. Who is this horse and how can we explain his magnetism? What makes him so special? Fergus the Horse (Equus hilarious) is the creation of Jean Abernethy, and the truth is, he isn’t meant to represent any one breed or discipline. Perhaps it’s this generic “everyhorse” quality that’s led to his popularity. “When fans write, ‘Fergus reminds me of my horse,’ I cannot be paid a higher compliment,” says Abernethy. And it’s his expressiveness, honesty, charm, and keen sense of humor that truly wins our hearts. Now Abernethy has brought together the backstory of Fergus the Horse—how he came to be, his early years, the history of his “friends”—and combined it with his “greatest hits,” including most-loved comic strips, some personal sketches, and brand new additions. The result is a lively, colorful, highly illustrated treasury that will entertain anyone with an eye for a horse and a need for a laugh.

story revelations from author Wendelin Van Draanen. The first time she saw him, she flipped. The first time he saw her, he ran. That was the second grade, but not much has changed by the seventh. Juli says: “My Bryce. Still walking around with my first kiss.” He says: “It’s been six years of strategic avoidance and social discomfort.” But in the eighth grade everything gets turned upside down: just as Bryce is thinking that there’s maybe more to Juli than meets the eye, she’s thinking that he’s not quite all he seemed. This is a classic romantic comedy of errors told in alternating chapters by two fresh, funny voices. The updated anniversary edition contains 32 pages of extra backmatter: essays from Wendelin Van Draanen on her sources of inspiration, on the making of the movie of *Flipped*, on why she’ll never write a sequel, and a selection of the amazing fan mail she’s received. Awards and accolades for *Flipped*: SLJ Top 100 Children’s Novels of all time IRA-CBC Children’s Choice IRA Teacher’s Choice Honor winner, Judy Lopez Memorial Award/WNBA Winner of the California Young Reader Medal “We flipped over this fantastic book, its gutsy girl Juli and its wise, wonderful ending.” — The Chicago Tribune “Van Draanen has another winner in this eighth-grade ‘he-said, she-said’ romance. The Book of Knowledge of Ingenious Mechanical Devices P. Hill, 1975-01-14 To judge by the dictum of al-Jazari: (d. A.D. 869), 'Wisdom has descended upon these three: the brain of the Byzantine, the hands of the Chinese, and the tongue of the Arab', in the great age of the

Amusing Ourselves to Death Neil Postman, 2005-12-27 What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil Postman's essential guide to the modern media is more relevant than ever. It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman.” -CNN Originally published in 1985, Neil Postman’s groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one.”

—Jonathan Yardley, The Washington Post Book World

The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root

The Cognitive-Theoretic Model of the Universe: A New Kind of Reality Theory Christopher Michael Langan, 2002-06-01 Paperback version of the 2002 paper published in the journal *Progress in Information, Complexity, and Design* (PCID). **ABSTRACT** Inasmuch as science is observational or perceptual in nature, the goal of providing a scientific model and mechanism for the evolution of complex systems ultimately requires a supporting theory of reality of which perception itself is the model (or theory-to-universe mapping). Where information is the abstract currency of perception, such a theory must incorporate the theory of information while extending the information concept to incorporate reflexive self-processing in order to achieve an intrinsic (self-contained) description of reality. This extension is associated with a limiting formulation of model theory identifying mental and physical reality, resulting in a reflexively self-generating, self-modeling theory of reality identical to its universe on the syntactic level. By the nature of its derivation, this theory, the Cognitive Theoretic Model of the Universe or CTMU, can be regarded as a supertautological reality-theoretic extension of logic. Uniting the theory of reality with an advanced form of computational language theory, the CTMU describes reality as a Self Configuring Self-Processing Language or SCSPL, a reflexive intrinsic language characterized not only by self-reference and recursive self-definition, but full self-configuration and self-execution (reflexive read-write functionality). SCSPL reality embodies a dual-aspect monism consisting of infocognition, self-transducing information residing in self-recognizing SCSPL elements called syntactic operators. The CTMU identifies itself with the structure of these operators and thus with the distributive syntax of its self-modeling SCSPL universe, including the reflexive grammar by which the universe refines itself from unbound telenesis or UBT, a primordial realm of infocognitive potential free of informational constraint. Under the guidance of a limiting (intrinsic) form of anthropic principle called the Telic Principle, SCSPL evolves by telic recursion, jointly configuring syntax and state while maximizing a generalized self-selection parameter and adjusting on the fly to freely-changing internal conditions. SCSPL relates space, time and object by means of conspansive duality and conspansion, an SCSPL-grammatical process featuring an alternation between dual phases of existence associated with design and actualization and related to the familiar wave-particle duality of quantum mechanics. By distributing the design phase of reality over the actualization phase, conspansive spacetime also provides a distributed mechanism for Intelligent Design, adjoining to the restrictive principle of natural selection a basic means of generating information and complexity. Addressing physical evolution on not only the biological but cosmic level, the CTMU addresses the most evident deficiencies and paradoxes associated with conventional discrete and continuum models of reality, including temporal

directionality and accelerating cosmic expansion, while preserving virtually all of the major benefits of current scientific and mathematical paradigms.
