Food Instagram Emily J. H. Contois,Zenia Kish,2022-05-31 Winner of the 2023 Association for the Study of Food and Society Book Prize for Edited Volume Image by image and hashtag by hashtag, Instagram has redefined the ways we relate to food. Emily J. H. Contois and Zenia Kish edit contributions that explore the massively popular social media platform as a space for self-identification, influence, transformation, and resistance. Artists and journalists join a wide range of scholars to look at food's connection to Instagram from vantage points as diverse as Hong Kong's camera-centric foodie culture, the platform's long history with feminist eateries, and the photography of Australia's livestock producers. What emerges is a portrait of an arena where people do more than build identities and influence. Users negotiate cultural, social, and economic practices in a place that, for all its democratic potential, reinforces entrenched dynamics of power. Interdisciplinary in approach and transnational in scope, Food Instagram offers general readers and experts alike new perspectives on an important social media space and its impact on a fundamental area of our lives. Contributors: Laurence Allard, Joceline Andersen, Emily Buddle, Robin Caldwell, Emily J. H. Contois, Sarah E. Cramer, Gaby David, Deborah A. Gestão da Segurança da Informação em Sistemas-de-Sistemas com Apache Jena Roberto Monteiro Dias,2023-06-27 As intensas transformações ocorridas na sociedade nesta década tornaram os sistemas de informação mais complexos. Tal complexidade está relacionada a uma categoria de sistemas definida como sistemas de sistemas (SoS). Embora o SoS ofereça benefícios às organizações, a dificuldade dos gestores de Tecnologia da Informação (TI) em lidar com a segurança da informação nesses sistemas pode deixá-los vulneráveis a ameaças e impactos causados por ataques cibernéticos. Ontologias podem ser usadas como uma solução para este problema porque definem estruturas de conhecimento e promovem um entendimento compartilhado de um domínio, tarefa ou aplicação. Nesse sentido, foi desenvolvida uma ontologia de domínio utilizando o Framework Apache Jena em Java para garantir a gestão do conhecimento em segurança SoS e seu

entendimento compartilhado para que stakeholders, gestores de TI e suas equipes possam evitar riscos, vulnerabilidades e ameaças em SoS. Vale destacar também a praticidade de extrair informações da ontologia para uso em aplicativos móveis, sites, smartwatches, smartphones e eletrodomésticos inteligentes, assistentes virtuais como Alexa (Amazon), Siri (Apple), Cortana (Microsoft), ChatGPT, entre outros. Tal utilitário simula consultas de Sistemas de Gerenciamento de Banco de Dados para uso de pequenas e médias empresas. Visual Heritage: Digital Approaches in Heritage Science Eugene Ch'ng,Henry Chapman,Vincent Gaffney,Andrew S. Wilson,2022-04-05 How we understand our shared and individual heritage, interpret and disseminate that knowledge is increasingly central to contemporary society. The emerging context for such development is the field of heritage science. Inherently interdisciplinary, and involving both the Arts and Humanities, engineering, conservation and the digital sciences, the development of heritage science is a driver for change; socially, economically and technically. This book has gathered contributions from leading researchers from across the world and provides a series of themed contributions demonstrating the theoretical, ethical, methodological and technical methods which lie at the heart of heritage science. Archaeology, conservation, museology, the arts, forensic sciences, and heritage management are represented through collaborative research with specialists in applied technologies including object and terrestrial laser scanning, multi-spectral imaging, visualisation, GIS and 3D-printing. Together, the chapters present important case studies to demonstrate the recent advances and best practise within the discipline, highlighting the value of digital transformation across the heritage community that includes objects, monuments, sites and landscapes spanning two million years of natural and cultural history from all over the world. Visual Heritage: Digital Approaches in Heritage Science is aimed at a broad academic and practice-led readership, which extends across many disciplines and will be of considerable value to scholars, practitioners, and students working within heritage and computer science at all levels. The content, which applies heritage science across two million years of cultural history will be appreciated by a general audience, as well as those wishing simply to explore the vast range of potential technical applications across all the disciplines represented in the book.
