Generation Text Michael OSIT, 2008-07-23 A teenage boy goes shopping on the Internet, sees something he likes, immediately reaches his mother via cell phone, and in a few short keystrokes, types in her credit card number and gets a shiny new lacrosse stick. Thanks to technological advances including computers, the Internet, cell phones, and satellites, today's children are faced with a world markedly more complex—and often distracting—than that of any other preceding generation. *Generation Text* examines why and how this phenomenon shapes children's values, attitudes, and behavior in a way that is fundamentally different from previous generations...and provides strategies for coping with the particular challenges of growing up in the new millennium. Parents who want to ensure that their children successfully develop key social skills, a healthy identity, and a strong work ethic need to make the right choices every step of the way. Clinical psychologist Dr. Michael Osit draws on his

professional—as well as personal—experiences working with children and teens who have been challenged by unprecedented access to information, possessions, and temptation. Using case studies and examples, the book provides reasonable, down-to-earth strategies readers can use to address the unique issues faced by children surrounded by infinite choices...and very few limits.

SR - A PSEUDOSCIENCE Si-Xian Liang, 2013-03 About the Book The book has an interesting topic that would attract curiosity. To read it only high school mathematics is needed. But physics concepts may be challenging. However, that is not a problem for those keen thinkers who pursue scientific truth with passion. Which giant will you stand by: Einstein or Newton? You would make the right decision after reading. There are 8 Sections in the main part of the book: In Section 1. The primary concepts of space and time are described. The most important concepts are attached space,

overlapping space and identity of universe instant. GT (Galilean Transformation) is a natural product from the primary concepts of space and time and there is no room left for LT (Lorentz Transformation). In Section 2. Under Einstein's Postulate of absolute velocity of light, LT is formally deduced. In searching the light wavefront sphere the missing light source system is found to be a normal Galilean system that would lead a group of Lorentz systems by determining their space and time through LT. That means LT totally relies on light source system. In Section 3. Using light source system as a stepping stone Lorentz system can be explored. It has been found that Lorentz space dilating outwards from its central plane while the systemic part of Lorentz time contracting toward the initial instant. However, the Transformation Principle of identical spatial spot at identical instant forbids these strange things happening, so that no way for LT to gain real meaning. In Section 4. The Assertion of moving rod contracts and moving clock slower and other paradoxes, as well as the relativistic mechanics, have been discussed and analyzed. It is ascertained that all are the product from a serious conceptual error of applying LT wrongly on second party body. In Section 5. It is recognized that, causing the so-called relativity of simultaneity, the local-time part of Lorentz time varies along the \hat{i} -axis in Lorentz space at a universe instant t but, once preset at initial instant, would never change. That is a shocking finding that the Lorentz local-time actually is a false time of no flux, and hence the whole Lorentz

time with a false part becomes untrustworthy. The consequence cannot be more serious. The whole building of SR would collapse immediately as a fundamental stone has to be withdrawn. In Section 6. The famous M-M Experiment has been re-interpreted carefully. After clarifying all historical mistakes involving the false concept of ether, the M-M Experiment is ascertained that, apart from negating the existence of ether, it confirms the concept of light source Galilean system but has no any support for SR. In section 7. The Doppler Effect of sound is introduced first for the sake of contrasting. Then light's Doppler Effect is profoundly analyzed. Comes out a conclusion that Doppler Effect and SR's Postulate are bound to be mutually exclusionary. It is another shocking finding that there would be no Doppler Effect for light if SR' Postulate is true, but if light really has Doppler Effect then SR's Postulate must be wrong. The existence of Doppler Effect in astronomy is unarguable evidence denying the Postulate and SR. In section 8. With so many fatal problems, SR has to be justified as a pseudoscience. In tracking Einstein's path to SR, it is discovered that he proposed the Postulate without reasonable logic in first. No wonder SR would end in a verdict of a pseudoscience.

Thomas Bradwardine Edith Wilks Dolnikowski, 1995
This volume evaluates Thomas Bradwardine's view of time as a mathematical, philosophical and theological concept within the context of ancient and medieval discussions concerning the problem of time and eternity. The book begins with an assessment of his career as a natural philosopher and theologian in order to establish the factors which influenced his treatment of time. Two succeeding chapters examine the sources of his temporal theory in classical, early medieval and thirteenth-century texts. Next, a series of chapters surveys his view of time as it related to proportionality, continuity, contingency and predestination. The final chapter establishes his place among fourteenth-century natural philosophers and theologians. Because this study traces the issue of time through several major

works, it demonstrates how the mathematical, philosophical and theological ideas of one prominent scholar converged within a setting of lively academic discourse. Thus it illuminates a fascinating dimension of one of the most important debates in late medieval thought.

The Impulse Society Paul Roberts, 2014-09-02 It's something most of us have sensed for years—the rise of a world defined only by “mine” and “now.” A world where business shamelessly seeks the fastest reward, regardless of the long-term social consequences; where political leaders reflexively choose short-term fixes over broad, sustainable social progress; where individuals feel increasingly exploited by a marketplace obsessed with our private cravings yet oblivious to our spiritual well-being or the larger needs of our families and communities. At the heart of *The Impulse Society* is an urgent, powerful story: how the pursuit of short-term self-gratification, once scorned as a sign of personal weakness, became the default principle not only for individuals, but for all sectors of our society. Drawing on the latest research in economics, psychology, political philosophy, and business management, Paul Roberts shows how a potent combination of rapidly advancing technologies, corrupted ideologies, and bottom-line business ethics has pushed us across a threshold to an unprecedented state: a virtual merging of the market and the self. The result is a socioeconomic system ruled by impulse, by the reflexive, id-like drive for the largest, quickest, most “efficient” reward, without regard for long-term costs to ourselves or

to broader society. More than thirty years ago, Christopher Lasch hinted at this bleak world in his landmark book, *The Culture of Narcissism*. In *The Impulse Society*, Roberts shows how that self-destructive pattern has grown so pervasive that anxiety and emptiness are becoming embedded in our national character. Yet it is in this unease that Roberts finds clear signs of change-and broad revolt as millions of Americans try step off the self-defeating treadmill of gratification and restore a sense of balance. Fresh, vital, and free of ideological, right-wing/left-wing formulations, *The Impulse Society* shows the way back to a world of real and lasting good.
