The Tangible in Music Marko Aho,2016-05-26 In the age of digital music it seems striking that so many of us still want to produce music concretely with our bodies, through the movement of our limbs, lungs and fingers, in contact with those materials and objects which are capable of producing sounds. The huge sales figures of musical instruments in the global market, and the amount of time and effort people of all ages invest in mastering the tools of music, make it clear that playing musical instruments is an important phenomenon in human life. By combining the findings made in music psychology and performative ethnomusicology, Marko Aho shows how playing a musical instrument, and the pleasure musicians get from it, emerges from an intimate dialogue between the personally felt body and the sounding instrument. An introduction to the general aspects of the tactile resources of musical instruments, musical style and the musician is followed by an analysis of the learning process of the regional kantele style of the Perho river valley in Finnish Central Ostrobothnia.

Niccolo the cricket would like to become a musician. But which instrument should he start with? The violin? The guitar? The trumpet? All at once? Well, he does have six limbs, so why not? In any case, Niccolo and his trusty companion Luciano the nightingale travel the world as they learn about musical instruments of all kinds, from simple drums to the most sophisticated church organs. Do you know what didgeridoo, shamisen, or vozembouch are? Would you rather become a member of symphony orchestra or a rock band? Let’s find out! If you are interested in music at least a little, join Niccolo and Luciano and learn the stories of musical instruments along with them.

Beautiful Music for Two String Instruments, Book II Samuel Applebaum, The study of string instruments should include ensemble playing at the earliest possible stage. There is much to be gained from the playing of duets. Each player learns how to listen to the other, and in a short time develops an awareness of balance, musical phrasing, intonation, and tone quality. This type of training is excellent preparation for participation in large groups. These four volumes of duets for two violins will help fill the need for early ensemble experience in the public schools. They should be used in string classes as a supplement to any of the standard string methods. They will also encourage music making outside of the school, with parents or with other students. These duets are ideal for recitals in the public schools and in public school festivals. They may be played by two performers, or by multiple performers on each part, with or without piano accompaniment.
