Competing for and with Human Capital J. Stewart Black, 2019-05-28 Executives say that people are their most important asset, but most don't walk the talk. They don't have systematic strategies for how to get the people they want to want them. They don't have measures and metrics for how they are doing to be the employer of choice. They don't hold leaders accountable regarding those ambitions. In many cases, this is because top leaders don't have concrete tools to help them do what they know they should. This book fills that gap in three major sections. The first section supports with clear and compelling data what executives intuitively but somewhat superficially believe—that people are their most important asset. The second section provides a systematic process and set of tools to help leaders get the people they want to want them; it shows executives how to win the competition for human capital. The third section then helps leaders position people appropriately so that they can create a sustainable competitive advantage; it shows executives how to compete with human capital. When it comes to human capital, most books get it wrong. Strategy books place human capital to the side as an enabler of competitive advantage. HR books treat human capital as a support activity to business strategy. This book places human capital where it should be—not to the side and not as an enabler or a support activity, but at the center and as the source of competitive advantage.

2021 Comprehensive Surveillance Review- Background Paper on The Surveillance Priority Ensuring Economic Sustainability International Monetary,International Monetary Fund. Strategy, Policy, & Review Department,2021-05-18 Ensuring economic sustainability is key to achieving the IMF's surveillance mandate of maintaining present and prospective balance of payments and domestic stability, assuring orderly exchange arrangements, and promoting a stable system of exchange rates. A good understanding of issues related to economic sustainability is thus essential for the IMF to provide effective surveillance and policy advice, while it requires a broad perspective and a long time horizon. With respect to the IMF's surveillance mandate, the

principle of macro-criticality, which guides the IMF's engagement with its members, is sufficiently flexible and broad, allowing the IMF to cover issues related to economic sustainability. At the same time, given the wide range of issues that are related to economic sustainability, IMF surveillance needs to be selective and focused, with the choice of issues made on a case-by-case basis, considering country circumstances. It also needs to leverage the expertise of other institutions when necessary. The IMF and other institutions have advanced work to enhance analytical frameworks and indicators related to economic sustainability, and this should continue.
