International Symposium on Distributed Computing and Artificial Intelligence Ajith Abraham, Juan Manuel Corchado Rodríguez, Sara Rodríguez González, Juan F. de Paz Santana, 2011-03-29 The International Symposium on Distributed Computing and Artificial Intelligence 2011 (DCAI 2011) is a stimulating and productive forum where the scientific community can work towards future cooperation on Distributed Computing and Artificial Intelligence areas. This conference is the forum in which to present application of innovative techniques to complex problems. Artificial intelligence is changing our society. Its application in distributed environments, such as internet, electronic commerce, environment monitoring, mobile communications, wireless devices, distributed computing, to cite some, is continuously increasing, becoming an element of high added value with social and economic potential, both industry, life quality and research. These technologies are changing constantly as a result of the large research and technical effort being undertaken in universities, companies. The exchange of ideas between scientists and technicians from both academic and industry is essential to facilitate the development of systems that meet the demands of today's society. This edition of DCAI brings together past experience, current work and promising future trends associated with distributed computing, artificial intelligence and their application to provide efficient solutions to real problems. This symposium is organized by the Bioinformatics, Intelligent System and Educational Technology Research Group (<http://bisite.usal.es/>) of the University of Salamanca. The present edition has been held in Salamanca, Spain, from 6 to 8 April 2011.

KI 2004: Advances in Artificial Intelligence Susanne Biundo,Thom Frühwirth,Günther Palm,2005-01-11 KI2004wasthe27theditionoftheannualGermanConferenceonArtificialIntelligence, which traditionally brings together academic and industrial researchers from all areas of AI and which enjoys increasing international attendance. KI

2004 received 103 submissions from 26 countries. This volume contains the 30 papers that were finally selected for presentation at the conference. The papers cover quite a broad spectrum of classical subareas of AI, like natural language processing, neural networks, knowledge representation, reasoning, planning, and search. When looking at this year's contributions, it was exciting to observe that there was a strong trend towards actual real-world applications of AI technology. A majority of contributions resulted from or were motivated by applications in a variety of areas. Examples include applications of planning, where the technology is being exploited for taxiway traffic control and game playing; natural language processing and knowledge representation are enabling advanced Web-based information processing; and the integration of results from automated reasoning, neural networks and machine perception into robotics leads to significantly improved capabilities of autonomous systems. The technical programme of KI 2004 was highlighted by invited talks from outstanding researchers in the areas of automated reasoning, robot planning, constraint reasoning, machine learning, and semantic Web: Jorg Siekmann (DFKI and University of Saarland, Saarbrücken), Malik Ghallab (LAAS-CNRS, Toulouse), Francois Fages (INRIA Rocquencourt), Martin Riedmiller (University of Bayreuth), and Wolfgang Wahlster (DFKI and University of Saarland, Saarbrücken). Their invited papers are also presented in this volume

Turtlebird's Double Dip Shuffle Tara Fass, 2013-02-01 Written by licensed family and marriage therapist Tara Fass, who has spent two decades helping families navigate divorce and co-parenting, Turtlebird's Double Dip Shuffle aims to be a balm for those heartbreaking moments when parent and child alike are converging toward the brink of emotional breakdown. Her goal is to turn meltdown tears into smiles of understanding and even contentment. This ditty, Old Mc Donald's Farm meets Humpty Dumpty, is intended to be read out loud and con gusto (even if it seems awkward or embarrassing) because chances are the funny, distracting and attention-getting noises created by the animal sounds will spark curiosity. The turtlebird has two homes. Up in the lovely trees with Bird and in the soothing waters with Turtle. Traveling back and forth can be confusing and complex, and the waters can be rough and trees can sway. And it can be a turbulent journey from home to home. But in the end Turtlebird feels loved in both and is on a path of self-awareness and healing. Artfully illustrated by award-winning artist Alexandra Conn.

Russia Since 1980 Steven Rosefielde,Stefan Hedlund,2009 Russia since 1980 recounts the epochal political, economic, and social changes that destroyed the Soviet Union, ushering in a perplexing new order. Two decades after Mikhail Gorbachev initiated his regime-wrecking radical reforms, Russia has reemerged as a superpower. It has survived a hyperdepression, modernized, restored private property and business, adopted a liberal democratic persona, and asserted claims to global leadership. Many in the West perceive these developments as proof of a better globalized tomorrow, while others foresee a new cold war. Globalizers contend that Russia is speedily democratizing, marketizing, and humanizing, creating a regime based on the rule of law and respect for civil rights. Opponents counterclaim that Russia before and during the Soviet period was similarly misrepresented and insist that Medvedev's Russia is just another variation of an authoritarian Muscovite model that has prevailed for more than five centuries. The cases for both positions are explored while chronicling events since 1980, and a verdict is rendered in favor of Muscovite continuity. Russia will continue challenging the West until it breaks with its cultural legacy.
