Moonstrology Sara Wiseman, 2021-01-24 I love the moon. I love its power, its mystery, the way it offers Universal connection to each of us, no matter

where we are in the world or in the time passage of our lives. I love the changeable nature of the moon-the way it sways the water in our bodies and in the greater body of Gaia's oceans. There is love, there is enchantment, and when we are very still and very aware, the moon communicates wisdom. There are many extraordinary books about the cycles of the moon, which cover phases in minute detail. These are wonderful and offer great help to people who are interested in the deep study of pagan or shamanistic paths. This book is much simpler. It is designed to be a twice-monthly (and in some months, more frequent) touchstone to help you connect to the energy of the moon in its two most powerful spiritual phases-the new moon, and the full moon. As you become aware of the new and full moons in your life, and begin to work with this moon energy, you will find you becoming spiritual clear-you set intention at new moon using the influence of the sign the moon is entering, and you release at full moon, using the influence of the sign the moon is leaving. Over the course of a year, you will visit 12 (or more) signs in both the cycle of beginning and releasing, and you will have journeyed through a complete astrological cycle-physically, emotionally and spiritually. Because the moon does not inhabit the same position on the same days every year, I have provided several moon phase calendars for the upcoming years. If you are reading this book after the last calendar listed, no problem. Simply go online and look for moon lunar phrases or moon astrological phases to determine the exact date and time of the new and full moons in upcoming years. The information is free and readily available, and will be easy to find. Finally, I've decided to present Moonstrology in the order the moon cycles normally move through a calendar year, beginning in January. For example, we often begin with a new moon in Capricorn, full moon in Cancer. This is not how it works every January, but it is the order that you will most likely experience. In cases of lunar eclipses, expanded or moon phases or solar eclipses, these also happen differently every year. I would suggest you consult the calendars, or again, research your own in later years. Finally, this book is channeled. I approach spiritual connection with the moon in the same way I do all things, which is via direct connection with the Universe: I close my eyes, breathe deeply until I am relaxed, and slip into a meditative trance state where the words flow through me onto the page. Because of the way this information is received, it is probably or even certainly different than what you will find in other books. It is my offering to you, in hopes that it will spark a new understanding and a new way of working with this marvelous Divine mystery that is the moon.

Guided by the Moon Johanna Paungger, Thomas Poppe, 2002-12-31 For centuries humans have recognized that the moon's cycles influence our lives and the world around us—the ebb and flow of the tides, women's menstrual cycles, and the most beneficial times to plant and harvest. But this ancient body of knowledge—the impact of lunar rhythms on our lives and our surroundings—has become known to fewer and fewer of us, as we have migrated from agrarian to urban living. Now in *Guided by the Moon*, authors Johanna Paungger and Thomas Poppe recapture this wisdom, providing advice to help readers determine the timing most likely to bring them success in anything they do. Paungger and Poppe cover every area of daily life, from health, beauty, and housekeeping to nutrition, gardening, and family outings. *Guided by the Moon* is the most comprehensive, accessible guide to this native wisdom—and will be an invaluable resource for everyone seeking to harness the moon's power to live happier, more harmonious lives. Not simply is this a book on lunar astrology, but a comprehensive guide to the moon's influence on our lives and surroundings—and includes charts, illustrations, and a moon calendar through 2010.
